FACT SHEET State Route 138 (East) Realignment Project

EA 0Q3004 Project #0800020191 August 2016

Project Description

The project will realign the roadway, construct outside shoulders and three wildlife crossings on State Route 138 (SR-138) near Hesperia from 1.9 miles east of Interstate 15 to 0.1 mile west of Post Office Road.

Approximate Construction Cost

$23 million

Purpose and Need

The existing highway configuration has many nonstandard horizontal and vertical curves and grades as steep as 15%. The existing pavement is from 21 feet to 28 feet in width, with no paved shoulders and narrow or nonexistent earth shoulders. There are few turnouts and no passing opportunities. This project will improve operational efficiency, and upgrade and widen existing lanes and shoulders to current standards.

Construction Schedule (subject to change)

Construction expected to begin in summer 2016.

Construction expected to be complete in summer 2018.
