PORTAL DESIGN DETAIL

THE DESIGN OF THE NORTH PORTALS EMPHASIZES THE BLENDING OF VARIOUS NATURAL ROCK OUTCROPPINGS LOCATED AT THE PROJECT SITE.

THE PORTALS PROTRUDE MINIMALLY FROM THE SLOPE OF SAN PEDRO MOUNTAIN. THE FACES OF THE PORTALS ARE IN LINE WITH THE ANGLE OF THE MOUNTAIN, AND ARE SKEWED TO THE APPROACHING ROADWAY.

THE PORTALS IN THEIR SHAPE AND TEXTURE PAY HOMAGE TO THE OCEANIC INFLUENCES OF THE PACIFIC COAST AND ITS UNDERWATER SEALIFE.
