Dear Susan Simpson,

It is my opinion that Cal. Trans. should do a cost + Value of life / time evaluation of the Marin freeway expansion Vs. waiting. And during the hold period measure the cost/value of reinstating the real old Railroad-- My personal 1st Choice.

But Solve the traffic problem by implementing the big Car Ferrys as are used in Seattle + Van Couver.

The Car ferrys Can run in + out of the petaluma river to cyote pt, and any other existing ferry port.

This will also bring down the Ecotopia as foreseen by Jerry Brown + Greens.

PS 2

and bring a new romance to the Area.

Any questions or comments call or write to me

sincerely

Stephanie M. Jackson
