Chief Financial Officer

Prepared by: R. Austin Wiswell
Division Chief
Aeronautics

Ref: **DRAFT CAPITAL IMPROVEMENT PLAN ELEMENT OF THE CALIFORNIA AVIATION SYSTEM PLAN**

SUMMARY

The Capital Improvement Plan (CIP) is the basis for the biennial Aeronautics funding Program, which consists of the airport development projects and airport land use compatibility plans selected by the Department, based on a priority matrix, which is then adopted by the California Transportation Commission (Commission) for State funding. The 2006 Aeronautics funding Program will come before the Commission for adoption in late spring of 2006. The CIP is an element of the overall California Aviation System Plan, the CASP, as the underpinning of the California Aid to Airport Program (CAAP). The Commission's Technical Advisory Committee on Aeronautics, the TACA, endorsed the 2005 CIP at its June 16, 2005 meeting.

The CIP contains 1542 projects totaling $2.58 billion. The funding split is 3% for State funding participation ($77.9 million), 96.7% for federal-only funding ($2.5 billion) and 0.3% for the local match participation ($7.4 million). Of the total $2.58 billion, 69% ($1.77 billion) is for primary/commercial service airports, 11% ($300 million) for reliever airports, 2% ($46 million) for General Aviation airports not in the federal National Plan of Integrated Airport Systems (non-NPIAS), and 18% ($465 million) for NPIAS general aviation airports.

BACKGROUND

The CIP element of the CASP is required by State law (Public Utilities Code Sections 21702-21706) as a ten-year capital improvement plan for each eligible airport and is updated every two years. This CIP is considered Volume 1, for the first five years, to more closely reflect the Federal Aviation Administration's (FAA) five-year Airport Capital Improvement Plan (ACIP). The Department develops the State's CIP in collaboration with Regional Transportation Planning Agencies, airport sponsors, and the Federal Aviation Administration (FAA) for projects at public-use, public-owned airports. A priority matrix is used to select projects from the CIP based on safety first, capability improvements that enhance system capacity second, and security enhancements third. A project must be in the CIP in order to obtain State funding.

An executive summary of the CIP is attached.

Attachment

Department of Transportation
California Aviation System Plan
Capital Improvement Plan (CIP)

Executive Summary

The CIP contains 1542 projects totaling $2.58 billion. Of this amount, the funding split is 3% for State funding participation ($77.9 million), 96.7% for federal-only funding ($2.5 billion) and 0.3% ($7.4 million) for local match participation. Of the total $2.58 billion, 69% ($1.77 billion) is for primary/commercial service airports, 11% ($300 million) for reliever airports, 2% ($46 million) for General Aviation airports not in the federal National Plan of Integrated Airport Systems (non-NPIAS), and 18% ($465 million) at NPIAS general aviation airports.

The biennial (odd-year) Capital Improvement Plan (CIP) is one element of the overall California Aviation System Plan (CASP). It is a tool for the Department of Transportation, Division of Aeronautics (Department) to actively participate and assist in the coordination of a continuously ongoing statewide aviation system planning and project funding (programming) effort. The CIP bridges the Department's aviation planning to programming.

- Based on the State Aeronautics Act, Public Utilities Code (PUC) Section 21702(f), the CIP is to be a ten-year capital improvement plan for each eligible airport, based on each airport's adopted Master Plan, or other comparable long-range planning document, approved by the applicable regional transportation planning agency, and submitted to the Department for inclusion in the CASP.

- The list of projects that make up the CIP is contained in a database that includes the capital needs for California's public-owned, public-use airports. The CIP serves as an unconstrained fiscal estimate for current and future airport development projects desired by airport sponsors and for funding airport land use compatibility planning documents.

- The Department, in working more closely with the Federal Aviation Administration (FAA), is considering going to an annual update of the CIP instead of the current biennial update. Further, the Department is also considering reducing the ten-year CIP to a single five-year plan, to more closely reflect their FAA's five-year document for their Airport Capital Improvement Plan (ACIP). This State CIP is considered Volume 1, for the first five years.

- The CIP is the basis for the biennial (even-year) Aeronautics funding Program, which consists of the airport development projects and airport land use compatibility plans selected by the Department, based on a priority matrix, which is then adopted by the California Transportation Commission (Commission) for State funding. The CIP is developed from the CASP. The content of the CIP is selected for funding under the California Aid to Airports Program (CAAP).

- In 2003, the Commission adopted a revised airport development project selection methodology and ranking criteria. Also in 2003, the name of the CIP was changed from a Capital Improvement "Program" to a Capital Improvement "Plan," because the CIP is a plan with no funds programmed at that time.

- Projects will be selected from the CIP to form the Aeronautics funding Program. The priority matrix is used to select projects from the CIP based on safety first, capability improvements that enhance system capacity second, and, third, security enhancements. Nearly all projects fit into these three categories. The priority ranking can be found in the appendix of this CIP. The Department will present a proposed 2006 Aeronautics funding Program to the Commission in the spring of 2006.

CIP Discussion

Preface

The biennial (odd-year) Capital Improvement Plan (CIP) is one element of the overall California Aviation System Plan (CASP). It is a tool for the California Department of Transportation, Division of Aeronautics (Department) to actively participate and assist in the coordination of a continuously ongoing statewide aviation system planning and project funding (programming) effort. The CIP bridges the Department's aviation planning to programming.

- Based on the State Aeronautics Act, Public Utilities Code (PUC) Section 21702(f), the CIP is a 10-year capital improvement plan for each eligible airport, based on each airport's adopted Master Plan, or other comparable long-range planning document, approved by the applicable regional transportation planning agency, and submitted to the Department, Division of Aeronautics for inclusion in the CASP.

- The list of projects that make up the CIP is contained in a database that includes the capital needs for California's publicly owned, public-use airports. The CIP serves as an unconstrained fiscal estimate for current and future airport development projects desired by airport sponsors, and for funding airport land use compatibility planning documents in California.

- The Department is working with the Federal Aviation Administration (FAA) to consider adopting an annual update of the CIP, instead of the current biennial update. The Department is also considering to petition to State legislature to change the PUC to break the 10-year CIP into two 5-year plans, and to more closely reflect the FAA's 5-year document for the Airport Capital Improvement Plan (ACIP). This State CIP is considered Volume 1 for the first five years.

- The CIP provides the basis for the development of the biennial (even-year) Aeronautics funding Program, which consists of the airport development projects, and airport land use compatibility plans, selected by the Department and based on a priority matrix, which is then adopted by the California Transportation Commission (CTC) for State funding. The CIP is developed from the CASP; what comes out of the CIP is selected for funding under the California Aid to Airports Program (CAAP).

- In 2003, the CTC adopted a revised airport development project selection methodology and ranking criteria. Also in 2003, the name of the CIP was changed from a Capital Improvement "Program" to a Capital Improvement "Plan," because the CIP is a plan with no funds programmed at that time.

- Projects will be selected from the CIP to form the Aeronautics funding Program. The priority matrix selects projects from the CIP based on safety first, and second capability improvements that enhance capacity, and then security enhancements as the third category. Nearly all projects fit into these three categories. The priority ranking can be found in the appendix of this report.

CIP Development: Relationship to the Federal NPIAS, Airport Capital Improvement Plans (ACIP), and Interagency Cooperation with the Federal Aviation Administration (FAA)

The 2003 programming criteria focus on the Division of Aeronautics' emphasis areas in General Aviation airport safety, capability improvements, and security enhancements. The 2003 programming criteria also created certain set-asides for airport land use compatibility planning. In the 2003 methodology, NPIAS and non-NPIAS airports will be treated as separate categories, with a specific amount of funding assigned to each.

The Department recently took steps to improve the coordination of programming activities with the FAA, and to mesh the programming activities based on the CIP with the federal activities based on their ACIPs. Each airport in the National Plan of Integrated Airport Systems (NPIAS) has its own ACIP. Some publicly owned, public-use airports are not included in the NPIAS, because they do not meet the minimum entry criteria, or they are located at inadequate sites. The CIP contains both NPIAS and non-NPIAS publicly owned, public-use airports.

By statute, the Department typically matches 5% of the Airport Improvement Program (AIP) federal grant amount, as a non-federal match, when the federal share is at either 90% or 95% of the project cost. The federal share used to be at 90% before 2003. The Century of Aviation Reauthorization Act of 2003, VISION 100, increased the federal share of airport funding from 90% to 95% of project cost. In other words, at 90% federal contribution, the State match is at 4.5%, the local match is 0.5%; at 95% federal contribution, the State match is at 4.75%, and the local match is 0.25%. Based on urgency legislation enacted in 2002, the Department may also increase its match to the full 10% required non-federal match for certain "security projects" at eligible airports. The CIP report used the 95% federal contribution, with the State match at 4.75%, and the local match of 0.25% for General Aviation and Reliever airports. The broad aim of the AIP is to assist in the development of the nationwide system of public-use airports, and the CIP is the State's participation in the nationwide effort.

The FAA defines airports by categories of airport activities, including commercial service (primary and non-primary), reliever, and general aviation airports. These categories affect both federal and State funding in California, and they are defined as follows:

a. **Commercial Service Airports** are publicly owned airports that have at least 2,500 passenger boardings each calendar year and receive scheduled passenger service. Passenger boardings refer to the revenue passenger boardings on an aircraft in service in air commerce whether or not in scheduled service. This definition also includes passengers who continue on an aircraft in an international flight that stops at an airport in any of the 50 States for a non-traffic purpose, such as refueling or aircraft maintenance, rather than passenger activity. There are two kinds of commercial service airports:

    1. **Non-primary commercial service airports (CM)** are commercial service airports that have at least 2,500 and no more than 10,000 passenger boardings each year.

    2. **Primary Airports (PR)** are commercial service airports that have more than 10,000 passenger boardings each year.

Commercial service airports are not eligible for State funding under the California Aid to Airports Program (CAAP), which is the Department's local assistance program for State-aid to eligible public-use airports.

b. **Reliever Airports (RL)** are airports designated by the Federal Aviation Administration to relieve congestion at Commercial Service Airports, and to provide improved general aviation access to the overall system. These airports may be publicly or privately owned. Publicly owned reliever airports are eligible for both State CAAP and federal AIP funding.

c. **General Aviation Airports (GA)** comprise the largest group of airports in the State's and national airport system. This category includes privately owned, public-use airports that enplane 2,500 or more passengers annually, and receive scheduled airline service. All publicly owned, public-use general aviation airports are eligible for State CAAP funding. Only those also included in the NPIAS are eligible for federal AIP funding. The selection of GA airports into the NPIAS is at the FAA discretion.

Regulatory Context and References

California Aid to Airports Program (CAAP): California Code of Regulations Title 21, Div. 2.5, and Chapter 4. The purpose of the CAAP is to assist in establishing and improving a statewide system of safe and environmentally compatible airports whose primary benefit is for general aviation (GA). The Department recently undertook efforts to synchronize the State CAAP programming process with the federal programming process, and to create a unified federal/state joint application form. This coordination with the FAA will prevent duplicative efforts, and provide better service to the Department's customers, who are local airport sponsors, airport land use commissions, regional transportation planning agencies, the FAA, the aviation community, and the public.

Although project specific, the 10-year plan is not a commitment to fund all included projects. The commitment is limited to the selected projects from the first three years of the plan, upon adoption by the CTC. The last seven-year period of the plan is subject to modification during the biennial update.

All projects in the CIP will be subject to the provisions of the State Aeronautics Act (Public Utilities Code Article 4, Sections 21680-21688) and the California Code of Regulations Title 21, Division 2.5, Chapters 4 and 5, the California Aid to Airports Program and Airport Loan Program.

The inclusion of an airport development project, or an airport land use compatibility plan, in the CIP does not imply, on its own, that the project complies with the National Environmental Policy Act (NEPA) or the California Environmental Quality Act (CEQA).

California Airports CIP Project Needs Summary May 2005

Primary/Commercial Airports	2006	2007	2008	2009	2010	Total

	Apron Lighting (new)	14	**7**

Each project applied for funding in the NPIAS and Non-NPIAS set-asides will be ranked and assigned points using the list above. For tiebreakers and special projects, the Department will have the discretion to assign up to 20 points for each set-aside. Discretionary points can be distributed to one or more projects. Projects above the level of funding for each set-aside are included in the biennial Aeronautics Program.

RE: «Airport»
Fiscal Year 2006 - 2010 Airport Capital Improvement Plan
Fiscal Year 2005 Application for Federal Assistance

We are updating the Airport Capital Improvement Plan (ACIP) of the airports in our District. In an effort to improve the ACIP process, the Federal Aviation Administration (FAA) is working closely with California Department of Transportation, Division of Aeronautics for inputs on the airport's ACIP. Airport sponsors are requested to send their ACIP concurrently to both the FAA Western-Pacific Region Airports Division and California Department of Transportation, Division of Aeronautics.

The FAA will use the ACIP to better distribute Airport Improvement Program (AIP) funds based on long range capital improvement planning, priority ratings and local need for development. All proposed projects must be compliant to National Environmental Policy Act (NEPA), depicted on a FAA approved Airport Layout Plan (ALP) and listed in the ACIP in order to be eligible for AIP funding. The California Department of Transportation, Division of Aeronautics, will use the ACIP for the State Capital Improvement Program (CIP), which is also being updated this year. To receive State funding, including AIP matching funds, the project must be included in the ACIP. For questions regarding the State CIP, please contact Ivan Karnezis of California Department of Transportation, Division of Aeronautics at (916) 654-5082.

Please submit all projects for which AIP funding is desired in the Federal Fiscal Years 2006-2010 using the enclosed ACIP Data Sheet. Describe each project as clearly as possible and enclose a short narrative, justification, and sketch as further described by and in support of the following:

- Please submit projects for only the fiscal years 2006 through 2010. If you have no projects for any particular year, please state so in the form. Funding decisions and priorities will be based solely on the information submitted

- Projects should be well justified and a general consistency should be transparent from year to year. A few of the things that demonstrate justification and consistency include (but not limited to):

    - ACIP/Project consistency from year to year.
    - Project consistent with the FAA approved forecast and specifics of the last Master Plan.

- Projects supported by the current Pavement Management Maintenance Plan for the airport.
- Consistency with an FAA approved ALP, conforming to AC 150/5300-13, change 7.

- The ALP must be updated for FAA approval or revalidation every three (3) years. A current ALP, in conformance with AC 150/5300-13, Change 7, is a prerequisite for AIP funding eligibility. An ALP checklist is available through the FAA Western-Pacific Region Airports Division for your use. Please note, a current, updated and FAA approved ALP is required. If 3 years have passed since the last FAA approval, an update to your ALP may be included in the ACIP; this is an eligible work item.

- Compliance with the NEPA is required for the proposed projects prior to the FAA approval of the ALP and/or approval of projects to be funded by AIP grants or Passenger Facility Charges. For projects that may qualify for a categorically exclusion, please contact your FAA Program Manager. If the FAA had previously issued a Finding of No Significant Impact (FONSI) or Record of Decision (ROD), please submit a copy of the FAA decision document with the ACIP.

- Sketch should be a reproducible 8 ½" x 11" up to 11" x 17" size Airport Layout Plan (or airport drawing). Each project listed on the ACIP form must be clearly referenced and shown, may use a separate sketch for each fiscal year.

- Airport sponsors should evaluate the Runway Safety Areas (RSA's) at their respective airports. As a result, sponsors should be able to certify that their RSA's either meet current airport design standards in accordance with Advisory Circular 150/5300-13, or that they have included/identified projects in their five year ACIP to improve the RSA's to the maximum extent practicable.

- One of the FAA's highest priorities is to reduce surface incidents (vehicle/pedestrian deviations) and runway incursions at the nation's airports. Airport sponsors should evaluate their airport to identify any locations or areas that lend themselves to surface incidents and runway incursions and develop a plan to mitigate that potential. Sponsors should be able to certify that they have evaluated their airport and have included projects, as appropriate, to mitigate the potential for runway incursions in their ACIP.

- The FAA has a national goal to base 90% of all AIP grant offers on bids. If, at a particular airport, there is not the ability to "front" design costs to facilitate a grant based-on-bids, we encourage design only grants or contact California Department of Transportation, Division of Aeronautics for alternative funding sources. Under these circumstances, please complete the ACIP accordingly (i.e. identify design only in FY06 and construction in FY07, the project name should be consistent).

- For airports with a relationship with the Transportation Security Administration (TSA), please ensure that any required security projects have been coordinated with the TSA Representative.

- There is an ongoing focused emphasis and concentrated effort placed on completing and closing AIP grants within four years from the date the grant was executed. Please plan the ACIP and associated projects accordingly.

Appendix D

- Sponsors should be taking advantage of the Letter of Credit process and requesting reimbursements or drawdowns every 30 days (unless other arrangements have been made).

Submit your ACIP and all required documentation concurrently to the FAA Western-Pacific Region Airports Division and California Department of Transportation, Division of Aeronautics no later than **November 19, 2004.** If there are any questions, please contact your program/project manager at FAA Western-Pacific Region Airports Division. If available, please submit your ACIP as an excel file electronically to ivan.karnezis@dot.ca.gov and maryellen.williams@faa.gov. An electronic copy of the ACIP forms can be located at http://www.faa.gov/arp/awp/acip/.

We also request you to submit a signed Project Application for projects you identified in your Fiscal Year (FY) 2005 ACIP no later than **February 25, 2005.**

The Standard Form 424 (SF 424) for federal grant application has been revised to include the Data Universal Number System (DUNS) number. This number is required as of 2004 for grant applications. The revised form and instructions on how to obtain the DUNS number can be accessed at the Office of Management and Budget's web site http://www.whitehouse.gov/omb/grants/grants_forms.html. The required attachments to the SF 424 can be accessed at http://www1.faa.gov/arp/financial/aip/index.cfm?ARPnav=aip. If there are any questions on the Project Application, please contact your Project Manager.

Sincerely,

Tony Garcia
Acting Supervisor, Standards Section
FAA Western-Pacific Region Airports Division

R. Austin Wiswell, Chief
Division of Aeronautics

Subject:Non-NPIAS 2005 CA CIP submittals to Caltrans Aeronautics

Dear Airport Manager, ALUC, RTPA, and other CIP contacts:

In accordance with the State Public Utilities Code, Section 21704, we are presently revising the 2005 California 10-year capital improvement plan (CIP). You are receiving this email because your address is included in our database attached to a Non-NPIAS public use airport. We are already in receipt of copies of FAA ACIP's from our NPIAS airports, and are in the process of using those ACIP's to revise the State CIP. Now we are asking for RTPA submittals of CIP's for **Non-NPIAS** public use airports that are *owned by public entities*. **Only projects included in the adopted CIP are eligible for future State Aeronautics grant funding.** Only airports owned by public entities are eligible for State funding. A list of our Non-NPIAS airports and instructions follow:

Non-NPIAS airports (If your airport is listed below but is *not* owned by a public entity, please disregard the instructions.):
ADIN
AGUA CALIENTE SPRINGS AIRPORT
AGUA DULCE AIRPARK
ALPINE COUNTY AIRPORT
ANDY MCBETH AIRPORT
BERMUDA DUNES AIRPORT
BLUE CANYON AIRPORT
CALIFORNIA PINES AIRPORT
CHIRIACO SUMMIT AIRPORT
CLIFF HATFIELD MUNICIPAL AIRPORT
CORCORAN AIRPORT
DESERT CENTER AIRPORT
ELK GROVE AIRPORT
ELK HILLS-BUTTONWILLOW AIRPORT
EUREKA MUNICIPAL AIRPORT
EXETER
FLABOB AIRPORT
FORT BIDWELL AIRPORT
GRAVELLY VALLEY AIRPORT
HERLONG AIRPORT
HYAMPOM AIRPORT
JACUMBA AIRPORT
KINGDON AIRPARK AIRPORT
LODI AIRPARK AIRPORT
LODI AIRPORT
MONTAGUE-YREKA, ROHRER FIELD
MOUNTAIN VALLEY AIRPORT
NEW JERUSALEM AIRPORT
OCEAN RIDGE AIRPORT
OCOTILLO AIRPORT
PARADISE SKYPARK AIRPORT
PARRETT FIELD AIRPORT
POSO-KERN COUNTY AIRPORT
RANCHAERO AIRPORT

RAVENDALE AIRPORT
ROSAMOND SKYPARK AIRPORT
ROY WILLIAMS AIRPORT
SANTA PAULA AIRPORT
SELMA AIRPORT
SIERRAVILLE DEARWATER AIRPORT
SILVERWOOD AIRPORT
SONOMA SKYPARK AIRPORT
SONOMA VALLEY AIRPORT
SOUTHARD FIELD AIRPORT
SPAULDING AIRPORT
STOVEPIPE WELLS AIRPORT
WARD FIELD AIRPORT
WATTS - WOODLAND AIRPORT
YUCCA VALLEY AIRPORT

2. Instructions:

Airport Mangers and other preparers:

Go to our website (http://www.dot.ca.gov/hq/planning/aeronaut/htmlfile/index.html).
Click "Technical Service" (on the upper left side).
Click "Capital Improvement Plan, California Aviation Systems Plan"(2nd box from the bottom).
Click "Projects by Airport".
Click "File" - "Save-As" and save to a preferred location on your local drive. This will save the entire file (sorry saving a single selection does not work), giving it your airport name as the file name.
Open your new Excel file.
Begin editing by deleting all extra worksheets and information about the other airports, until you have reduced the file down to only your airport(s).
Update the CIP information. Show only future projects with intended start years from 2006 to 2016.
Recheck dollar amounts. Include all planned airport and ground access projects. **Do not include** completed projects, projects under construction, or projects having any State Aeronautics grant allocation or agreement.
Email your final spreadsheet to your RTPA for endorsement, asking the RTPA to return it to our office c/o Lee Provost at the address below.

Airport Land Use Commissioners:

Follow instructions 1 thru 8 above, except that in instruction 7, delete all projects and enter your fund requests for Airport Land Use Compatibility Plans (ALUCP's).

RTPA's

Compile and edit the updates for each airport
Supplement them with any additional ground access projects
Return them by **email** to this office (**Lee.Provost@dot.ca.gov**) *as soon as possible*.
Fax or mail signed paper copies to the following address:
