RESUME

Name: WARREN M. BULLOCK February 4, 2007
Construction Consultant

Education: University of Canterbury - New Zealand
Bachelor's Degree in Civil Engineering

Mr. Bullock's initial professional experience after his graduation in 1954 from the University of Canterbury, New Zealand, was with the New Zealand Ministry of Works as an assistant engineer in earth dam and hydro-electric power plant design. From 1957 to 1959 he was employed as an inspection engineer on earth and rockfill dam construction and as a site engineer for tunnelling and under ground power house construction with Canadian firms.

During the 1960's and 1970's Mr. Bullock held engineering and management positions with Downer & Company in New Zealand as a project engineer and project manager on civil, bridge, marine, tunnel and highway projects and with Leighton Contractors in Australia as the chief civil engineering estimator. He was Project Manager for an international joint venture on a major tunnel contract in New Zealand from 1970-1972.

Mr. Bullock joined Guy F. Atkinson Company in 1976 as Project Manager of the Botany Bay Port Development in Sydney, Australia, a $70 million project completed in 1978. On completion of Atkinson's work at Botany Bay, he was transferred to the United States as Project Manager for the Nine Mile Nuclear Power Plant in Oswego, New York. Walsh Construction Company, an Atkinson Division, held a $241 million contract at this site for the civil and concrete construction of all major structures.

In May 1981 Mr. Bullock was appointed Vice President, Finance and Administration, of Guy F. Atkinson Construction Company. He had responsibility for the division finance and accounting, personnel, purchasing, labor relations and safety. In January 1984 he became Vice President and Chief Administrative Officer of Guy F. Atkinson Company and in January 1985 he was named Vice President-Construction, for Guy F. Atkinson Construction Company and for Monterey Construction Company, both divisions of Guy F. Atkinson Company. In the latter position he had managerial responsibility for bridges, dams and hydroelectric power plants (including tunnel work), under construction by the Company. From January 1994 until he retired in February 1996, Mr. Bullock was Senior Vice President in charge of Atkinson's International Operations.

Since retirement he has been self-employed as a Construction Consultant with considerable involvement in alternate contract dispute resolution. He has had direct involvement in a number of mediations, and has served, or is serving on forty-eight Dispute Review Boards on various construction projects totaling some $4.75 Billion in contract value. Mr Bullock is, or has been Chairman on twenty-four of these DRB's.

The Boards served on have been primarily transportation projects, including construction of the new San Francisco-Oakland Bay Bridge, the widening of the San Mateo Bridge, the seismic retrofit of the North Approach to the Golden Gate, the Carquinez Straits, and the Richmond-San Rafael Bridges, all in the State of California, the Hood Canal Bridge Retrofit and East Half Replacement (in Washington State), two major contracts on the Central Artery/Tunnel project in Boston, as well as three design and construct highway contracts, one in Washington State, one in Oregon, the other in New Mexico. Additional DRB's include the construction of a sanitary sewer tunnel in soft ground near Sacramento, California, the strengthening of an earthfill dam in Southern California, and a light rail transit project in Arizona.

Mr. Bullock is a Graduate Civil Engineer, a Member of the American Society of Civil Engineers, The Moles, and the Dispute Resolution Board Foundation, Inc.

WARREN M. BULLOCK

DISPUTE REVIEW BOARD EXPERIENCE-SUMMARY

1998, 1999, 2006 - DRBF Administration and Practice Workshop
