**METHOD OF TEST FOR SAMPLING FRESHLY MIXED CONCRETE****A. SCOPE**

This test method describes the procedures for obtaining representative samples of fresh concrete as delivered to the project site on which tests are to be performed to determine compliance with quality requirements of the specifications under which the concrete is furnished. The test method includes obtaining samples of freshly mixed concrete from stationary, paving, and truck mixers, and from agitating and non-agitating equipment used to transport central mixed concrete and from volumetric mixing equipment.

B. PROCEDURE

Conduct the test in accordance with ASTM C172/C172M-17

C. REPORTING OF RESULTS

Not applicable

D. HEALTH AND SAFETY

It is the responsibility of the user of this test method to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use. Prior to handling, testing or disposing of any materials, testers must be knowledgeable about safe laboratory practices, hazards and exposure, chemical procurement and storage, and personal protective apparel and equipment.

Refer to the Safety Manual for your Laboratory.
