## How to Establish Business Credit for the First Time

**Continued from page 3**

ellite TV, web hosting and other utility services are all agreements your company makes with providers.

**Business Credit Cards** – One of the most important tools to keep your personal and business purchases separate is a secured or unsecured business credit card. It's essential that you apply for a business credit card that reports only to the business credit agencies so you can protect your personal credit as well.

These are five ways you can establish credit for business for the first time. It's important to ...ely monitor your business credit reports and scores on a regular basis to ensure the information reporting is accurate and up to date.

Remember, by establishing business credit; banks, lenders, suppliers, retailers, insurers & investors will now be able to better access the viability and creditworthiness of your business. Ultimately, your business credit report will impact the amount of credit, payment terms, interest rates and insurance premiums your business will pay.

## Pain-In-The-Neck People

**Continued from page 2**

what you expect of them? The only way to determine this is to meet with the employee and get him to tell you his understanding of your expectations, his job responsibilities, the limits of his authority. You may be surprised at what a limited view he expresses. Explain clearly that you want him to make decisions, take initiative and think for himself. Be sure that you encourage, support and recognize initiative when it is taken. Whenever the person fails to take the extra step, use each instance as an opportunity to indicate what you expect by illustrating what should have been done.

Here are some additional approaches that will help you survive those "special" people.

- Be neutral. Do not let your emotions cloud your judgment. To gain a feeling of personal power, difficult people are often skilled manipulators of other peoples' emotions.
- Listen and inquire. Listen to the situation or complaint and request additional information until you can get to the underlying problem. Often difficult people will camouflage the real issue with a lot of surface complaints. Insist that each point be explained thoroughly before moving on to the next.
- Set boundaries. Being willing to listen does not mean that the other person has complete control or can push you in any direction. Your boundaries might be that yelling is unacceptable and foul language ends the conversation immediately.
- Move to conclude or solve. Once you understand the problem or difficulty, start asking questions that will give you an idea of what it would take to create a solution you can both live with. Choose questions like, "What do you suggest?" "Where do we go from here?" "Let me propose this for consideration."

**Caution: DBE regulation (49 CFR Part §26.88) grants certifying agencies, such as Caltrans, authority to suspend DBE firms. Events that can trigger suspension include; death or incarceration of the DBE owner, DBE failing to notify in writing of any material change or if a DBE fails to timely complete and return its Annual Affidavit of no change mailed to it by a certifying agency. Certifying agencies will be implementing this policy beginning September 1, 2015.**

**Note: Contractors are cautioned to verify the real-time DBE database prior to hiring DBE firms. A suspended firm will have a notation on its DBE profile. While suspended, DBE firms may not be considered for contract goal on new contracts. The decision to immediately suspend a DBE is not appealable to the US Department of Transportation.**

The Disadvantaged Business Enterprise (DBE) Database contains information on certified DBE firms and is **updated daily**. Use the database query form to find certified DBE firms to meet DBE goals on contracting requirements.

- **Click here to Access the DBE Query Form (Export options: CSV | Excel | XML | PDF)**
  **DBE Query Form Instructions / Tutorial**
  **Sample Database Query / Powerpoint**
- **Click here to access the Work Code Guide**
  **Click here to view Caltrans District Map**

Where there is a DBE goal on a contract, a Bidder must show that it took all necessary and reasonable steps to achieve a DBE goal or other requirement of Appendix "A" to Part 26, by their scope, intensity, and appropriateness to the objective, could reasonably be expected to obtain sufficient DBE participation, even if they were not fully successful.

**Quick Search Tips:**

- To find firms doing Construction Area Signs in Caltrans District 11, use [Caltrans Districts]> [11] [Work Category Codes] > scroll and select [C1200 Construction Area Signs]> [Start Search].
- To get a list of Landscape Contractors in Caltrans District 7, use [Caltrans Districts]> [07]> [License Type]> [C 27 Landscape Contractor] > [Start Search – PDF or Excel] – this will give you all firms located in Caltrans District 7.
- Search results will show firms located in a particular area, plus those firms that indicate they can work statewide will have "00" in counties and District..
- You may need to upgrade you Browser to view/download data.

*****DBE CERTIFICATION DOES NOT EXPIRE*****

**NOTE: Please note that the California UCP (including Caltrans) does not issue DBE Certificates as evidence of certification. A copy of a printout from the DBE Database should be sufficient for the bid package.**

**If you have any questions or need verification of a DBE firm, please call our office (916) 324-1700, or the DBE's own tifying Agency.**

**The North American Industry Classification System (NAICS) Code:**

The NAICS Code is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. Use the U.S. Census Bureau NAICS Search page to determine the NAICS Code.

The Work Codes supplement NAICS Codes that are used by the UCP during DBE certification process. It is classification scheme of equivalent detail and specificity, describing work a DBE firm states it can perform, whether on initial certification or when a new type of work is added to an existing certification.

These codes provide a general overview of the process used to determine code assignment, which in part considers description of work and any licenses necessary to prove control of the business by a disadvantaged owner.

The Work Code Template provided above is not an all encompassing list of work DBE firms perform and should be used as a guide only. DBE firms can always request their certifying agency (any time) to review their business activities and add or remove codes as and when necessary. DBE Firms are required to be certified with appropriate codes prior to bid date.

About Opt-in: Opt-in is a new feature on our website that allows contractors to be considered for subcontractor or supplier bids without ordering a planset from our plans desk. Prime contractors looking for suppliers will see the information you provide when they search for non-bidding planholders on our site. Please use this form to let others know what services you are available to offer for this project.

All data is entered by users of our website, not by the Department, and Caltrans makes no claims to the validity of the data shown. Please validate DBE, SBE, and DVBE at the following locations:

- DBE's: http://www.dot.ca.gov/hq/bep/find_certified.htm

- SBE's and DVBE's: http://www.pd.dgs.ca.gov/smbus/default.htm

Thank you for using the Opt-In Search Tool. Please note that the Opt-In Search Tool does not replace good faith efforts as described in the contract documents.

Be aware that opt-in users will not receive updates when addenda are issued. Please check our addenda page.

## Introduction to NAICS

The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

NAICS was developed under the auspices of the Office of Management and Budget (OMB), and adopted in 1997 to replace the Standard Industrial Classification (SIC) system. It was developed jointly by the U.S. Economic Classification Policy Committee (ECPC), Statistics Canada, and Mexico's Instituto Nacional de Estadistica y Geografia, to allow for a high level of comparability in business statistics among the North American countries.

This official U.S. Government Web site provides the latest information on plans for NAICS revisions, as well as access to various NAICS reference files and tools. Additional information on the background and development of NAICS is available in the History section of this Web site.
