Memorandum

Flex your power!
Be energy efficient!

To: Central Region Office Engineer

Date: May 29, 2013

MICHAEL HUTCHISON
Design Engineer

SCOTT GUIDI
Project Manager

From: **ROBERT JAMES**
Office Chief, Central Region Construction

Subject: Receipt of Electronic Version of Cross Sections for 10-0T160

The "electronic" cross sections (in PDF file format) for project 10-0T160 have been received by this office via email. This memorandum is provided for RTL certification in accordance with the requirements of Mark Leja's Cross Section Preparation and Delivery memorandum dated July 30, 2004.

It is presumed that these Cross-sections are the FINAL version providing all the cross section information required for constructing the project. It is important to note that these cross sections may be used by potential bidders during contract advertisement and the resident engineer. Therefore, if the plans and/or specifications are modified between now and the project advertisement date such that the cross sections require revision, the project manager, the district office engineer and the design senior recognize that a new set of cross-sections file(s) will need to be submitted to this office for review.

If there are any questions regarding this verification memorandum, please call Margaret Shaeffer at (559) 230-3115.
