CALIFORNIA IS THINKING BIG, REALLY BIG

The California Department of Transportation (Caltrans) is working with our partners to create the California Interregional Blueprint (CIB) – an innovative planning process designed to respond to SB 391 and create more sustainable mobility solutions. Using new tools and technology, we're asking how all transportation modes can work together more effectively. The CIB isn't just another plan. It's an opportunity to create a new vision for California's future transportation system.

Jump on board this unique opportunity for transportation partners and stakeholders to provide critical input on crafting a new vision. Topics include:

- Creating smarter and more effective mobility solutions for the people of California
- Planning the efficient movement of people and goods
- Reaching California's climate change goals
- Creating more sustainable communities
- Describing our progress in the December 2012 interim report

Workshops will be hosted in Sacramento and Los Angeles, and feature informational presentations, large group discussions and interactive, real-time, electronic polling (allowing instant feedback). Workshops will also be simulcast on the Internet, allowing both in-person and webcast participants to participate in interactive polling exercises. (Please note: If you intend to participate via webcast, you will need a computer with a high-speed Internet connection and speakers.)

Register for the workshops by clicking on the link below:
http://camsys.qualtrics.com/SE/?SID=SV_eVRnFPHu5F6Oze4

After registering, you'll receive a confirmation email with directions to the workshop. If you have questions, please contact Caroline Leary, Cambridge Systematics, at Cleary@camsys.com or via phone at (510) 879-4350 or 711 (TTY). For physical accommodations or other assistance, please contact Caroline as soon as possible but no later than two working days prior to the workshop you plan to attend.
