P185-R		Compressor							8	Ingersoll Rand		
		Welding Machine	8.00	2.00						Lincoln Vantage 500		
		Generator	8.00	2.00						MQ Power 25		

I was not at work for the first half of the day due to a Dr's appointment and came in after lunch at which time I went to the site where the ABF crew continues to weld the stringers to the Cap Beams & Carrier Beams and working on the soffit placement. All the work is concentrated around E2W and toward the center line of the Bridge.

Gil told me that pursuant to a conversation he had with R. Morrow earlier this morning, he wants to have a tabulation of all survey data obtained by CT & ABF on the 4 structures at the job site: The skyway, Piers E2, T1, and W2. I told him that I will contact R. Erskin for shooting grades on the Skyway and ask M. Vilcheck for the latest information on T1 for he had just got the scanning of the T1 completed.

For work at Birth 7, please refer to Massoud Modanlou's report.
