No ironworkers showed up today. Barges have been switched from Pier 7.
RT testers (DSC02337) were on site and closed off access to the North end of the platform. No one could go up from below or those working above had to stay on the south end of the platform.
Pilebutts were installing a support frame within the E2E column cages (DSC02339). They would not tell me what it was for.
Office work includes reading plans/RFIs for E2.
