ASSISTANT RESIDENT ENGINEER'S DAILY REPORT

Location & Description of Operation: CCO 106 Skyway Lowering

No work at the Skyway today because ABF does not have enough 4" shim pancakes for reconfiguration of more locations. At the warehouse at Pier 7, ABF loads timbers for the counterweight onto a barge. Conversation with Jim Davidson: ABF will have enough shims to reconfigure on Thursday. Conversation with Dave Adams: for the counterweight limits, start at expansion joint blackout and go 7m to the east. The counterweight does not need to be centered in this zone. The counterweight does not need to extend over the expansion joint blackout despite limits going 1m that direction. The counterweight goes on the longitudinal diaphragm, which is visible on the deck, so ABF does not need to go inside bridge to locate it. Conversation with Dave Meche: counterweight work on Thursday morning with reconfiguring mid morning after get shims.
