ASSISTANT RESIDENT ENGINEER'S DAILY CCO 106 Skyway Lowering **REPORT**

Location & Description of Operation Two mechanics from Peterson CAT bore 4" diameter holes at WB after drilling the pilot holes yesterday. They have two boring machines to expedite the work. By the end of the day, all four of the 4"Ø holes are bored. ABF ironworkers are at WB for all but a couple of hours elsewhere on the job (not in this diary) to lower the WB-NW shear key to the intermediate/inclined position. Operators and crane also support coring operations on the footing at Pier E2. Scott Hensler and a technician from MTC/BATA are working on the time lapse camera at the end of the WB Skyway. They are doing maintenance and modification work to the camera. For the jacks being calibrated at Schwager Davis, we receive (1100) and approve (1400) a quote for refurbishing the jacks. ABF removes the compressor (ID 000002) and fuel tank (ID 002189) from Hinge A today.
