ASSISTANT RESIDENT ENGINEER'S DAILY REPORT

Location & Description of Operation CCO 106 Skyway Lowering

Ironworkers continue working on shear key modifications and air arcing welds the connect the shim stack pieces. Jack calibration is happening today at Schwager Davis. ABF planned on having calibrated jacks back on site Monday or Tuesday next week, but there have been problems with the jacks during calibration. One of the four jacks calibrated so far has leaky seals and the other three worked but were clogged with sand and water in the jack oil. ABF is looking into repair ~~and~~ or replacement options. Regarding calibrations for the remaining four jacks, I tell Jim Davidson to proceed so we can find out if the other jacks have similar problems.

HOURS - ITEM NO.

WEATHER: Clear

EQUIPMENT AND / OR LABOR:
