CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

ITEM 1.

- Revise lighting pole and main tower lighting fixture schedules.
- Revise luminaire pull boxes and associated conduit routing into pull boxes.
- Add in-line fuses to luminaires.

Add Special Provisions Section 10-3.105 "FUSED SPLICE CONNECTORS," as shown on sheet 3.

Adjustment of Compensation at Lump Sum..... $642,646.00

Estimate of Increase in Contract Item at Contract Price:

ITEM 2.

Modify deck mounted lighting brackets.

Item No. 55: FURNISH STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
101 KG (+0.00%) @ $9.00 /KG =+$ 909.00 (+0.00%)

Item No. 56: ERECT STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
101 KG (+0.00%) @ $1.00 /KG =+$ 101.00 (+0.00%)

The quantity increases shown herein for Items #55 and 56, when combined with the quantity shown in the Engineer's Estimate, and as modified by any previous change orders or revisions to dimensions made by the Engineer, shall be the final quantity for which payment will be made.

Total Cost for Increase in Contract Item..... $1,010.00

The following revised plan sheets detail the changes addressed in this change order: 93R4, 118R3, 119R2, 123R2, 124R2, 125R1, 132R4, 132S1, 132S2, 141R2, 189R4, 194R2, 195R2, 196R1, 197R2, 198R1, 208R4, 208S1, 208S2, 211R2, 244R2, 247R3, 248R3, 249R2, 250R2, 251R1, 252R2, 253R1, 254R1, 255R1, 256R1, 257R2, 258R1, 259R1, 260R1, 268R1, 276R2, 299R2, and 906R1 (of 1204) as shown on sheets 4 through 42 of this change order.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 415, 464, 465, 466, 467, 1100R0 and 1100R1 with respect to changes listed above.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 **Suppl. No.** 0 **Contract No.** 04 – 0120F4 **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation at Lump Sum	$642,646.00
(ITEM 2) Increase in Contract Items at Contract Prices	$1,010.00
Total net pay for this change order	$643,656.00

This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$643,656.00**

By reason of this order the time of completion will be adjusted as follows: **0 Days**

Submitted by

Signature **Resident Engineer** Kannu Balan, Senior T.E. **Date** 12-14-11

Approval Recommended by

Signature **Supervising Transportation Engineer** William Casey, Sup. T.E. **Date** 12-20-11

Engineer Approval by

Signature **Supervising Transportation Engineer** William Casey, Sup.T.E. **Date** 1-6-12

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature (Print name and title) BRIAN A. PETERSEN - PROJECT DIRECTOR **Date** 03JAN12

STATE OF CALIFORNIA - DEPARTMENT OF TRANSPORTATION

CONTRACT CHANGE ORDER MEMORANDUM

TO: Tony Anziano, Program Manager /	FILE: **E.A.** 04 - 0120F4
	CO-RTE-PM SF-80-13.2/13.9

COST: **$643,656.00** INCREASE ☑ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☑ YES ☐ NO
SUPPLEMENTAL FUNDS PROVIDED: **$0.00**	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Lighting Revisions	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Revising lighting pole and main tower lighting fixture schedules. Modifying deck mounted lighting brackets. Revising luminaire pull boxes and associated conduit routing into pull boxes. Adding in-line fuses to luminaires.

Adding Special Provisions Section 10-3.105 "FUSED SPLICE CONNECTORS."

Lighting pedestals that were located on crossbeams were relocated to avoid overhanging the edge and constructability issues due to limited space. Deck and wall mounted Tower aesthetic lights did not have enough information in the plan sheets to determine placement. Mounting brackets and pull boxes are revised to avoid interferences with piping and conduits. In-line fuses were added to individually connect luminaires to the power feed. Each luminaire has a dedicated fuse so that one blown fuse will not blow the entire line.

This change order resolves the costs associated with Contractor Request For Information (RFI) numbers 415, 464, 465, 466, 467, 1100R0 and 1100R1 with respect to changes listed above.

The total cost of this change order is $642,646.00 lump sum and $1,010.00 increase in contract items for a total of $643,656.00 for this change, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Ken Terpstra (Project Manager), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

GENERAL NOTES

1. Conduit routing is diagrammatic. Pull box locations shall be located as shown on plan drawings. The Contractor shall provide additional pull boxes as required. Exact locations of equipment and devices may be adjusted depending on field conditions or by the Engineer.
2. Minimum size of conduits shall be 21 mm. Exposed conduits shall be PVC coated rigid galvanized steel, and conduits located inside girder shall be rigid galvanized steel.
3. Conduit fittings for 78 mm conduits and larger shall have a 610 mm minimum bending radius.
4. All conduits, including spares, shall be provided with pull wires prior to cable installations.
5. All equipment and devices shall be provided with nameplate tags per drawings.
6. All feeders and branch circuits shall be provided with ground wire.
7. 15 kV splice boxes shall be installed as shown and permanently marked "DANGER-HIGH VOLTAGE-KEEP OUT". The letters shall be block type and at least 50 mm in height.
8. The Contractor shall label all conductors and cables per wiring diagrams.
9. Padlocks shall be installed on all cabinets located on the platforms to prevent unauthorized access.
10. Call boxes will be State-furnished. (The Contractor shall install and terminate conductors per wiring diagram.
11. Ladder type cable trays shall be installed for each 15 kV and 600 V systems.
12. Solid bottom cable trays shall be installed for each low level signals, CALTRANS communications, fiber optic systems, and for Non-Caltrans utilities.
13. For Strong Motion Detection System general notes, see sheet E-361.
14. All E sheets are accurate for electrical work only.
15. All dimensions are in millimeters unless otherwise shown.
16. All unused conductors inside pull boxes shall be taped and coiled.
17. "Similar" when shown on the plans means this detail is applicable to different structure and conduit sizes.
18. Electrical fixtures shall not be field welded to the box girders or crossbeams. All welding to the box girders and crossbeams shall be shown on the box girder and crossbeam shop drawings for review and approval by the Engineer.
19. All welding of electrical fixtures to the tower shall be shown on the tower shop drawings for review and approval by the Engineer.
20. All connections to steel elements of the self-anchored suspension bridge superstructure of electrical equipment and fixtures, including conduits, pull boxes, lighting fixtures, messenger cables and others, shall be shop welded or bolted. All connection details shall appear on the working drawings for review and approval by the Engineer.
21. Prior to ordering any cable tray support structures, the Contractor shall:
    - o Refer to Structural sheets to determine the locations of cable tray support structures.
    - o Determine, based upon field conditions, when and where to use cable tray vertical or horizontal bends, horizontal tees or reducers.
    - o Refer to AS-sheets to determine the type of cable tray support to use based on field conditions.
    - o Cable tray support structures shown on the AS-sheets are generic and may have to be adapted to suit field conditions.
    - o All modifications to the cable tray support structures as shown on the AS-sheets shall be approved by the Resident Engineer.
22. All installation of electrical conduit, equipment or pull boxes shall be either shop welded or bolted.
23. All cable trays shall be anchored to support. Appropriate type of anchors shall be used based on the cable tray location and support type.

SHEET NOTES:

1. Conduit from barrier pullbox or other equipment down into Girder, See sheet E-97.
2. For conduit to Suspend Lighting, See sheet E-227. Typ for all PB-LTG located on the north side of the roadway.
3. Contractor shall furnish and install UP-105 per sheet E-72. For complete scope of work on platform and other related work not shown on this sheet, see Electrical Special Provisions.
4. See sheet E-67A for pylon floodlight conduit location.
5. Type PB-1B junction box is used on suspender brackets.
6. Roadway Barrier Receptacle, see Detail 1, sheet E-68.

NOTES:

1. References:
   - For typical details and locations of conduit connections to light poles, barrier outlet boxes, call boxes, overhead sign lighting, CCTV and MVDS, see sheets E-67, E-68 and E-68.
   - TOS equipment is shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-357.
   - For types of pullboxes, splice boxes and enclosures, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For Roadway Call Boxes, refer to sheet E-396.
3. For Roadway Level Lighting Pole Schedule, see sheet E-82.
4. For Roadway Level Call Box Schedule, see sheet E-397.
5. For number of lighting fixtures (main tower lights), see lighting schedule sheets E-271 and E-272.

DETAIL-1
(TYP. FOR EACH LTG. POLE)

SHEET NOTES:

1. 4#10 + #10 G single conductors. See Detail 1.
2. Conductors spliced inside pull box PB-LTG. (Pole #1032-2 only).
3. Conductors spliced inside junction box PB-2A located inside girder.
4. For SAS superstructure roadway westbound lighting schedule, see sheet E-82.
5. The Contractor shall extend and coil 5 meters of cable in manhole 25. All cables shall be tagged with circuit numbers as shown. For location of manhole 25, see sheet E-11.
6. Install 10A (ckt S-1032) and 5A (ckt A-1035) in-line fuse inside each light pole.

NOTES:

1. References:
   - For pull box schedule, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For single line diagram, see sheets E-29 through E-34.

2. For conduit to tower and suspension cable lighting see sheet E-227.
3. Contractor shall furnish and install UP-205 and LP-220 per sheet E-72. For complete scope of work on platform and other related work not shown on this sheet, see Electrical Special Provisions.
4. Roadway Barrier Receptacle, see Detail 1, sheet E-162.

NOTES:

1. References:
   - For typical details and locations of conduit connections to light poles, barrier outlet boxes, call boxes, overhead sign lighting, CMS, CCTV and MVDS, see sheets E-160 thru E-162 and E-169.
   - TOS equipment is shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-357.
   - For types of pull boxes, splice boxes and enclosures, see sheet E-169.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For Roadway Level Call Boxes, refer to sheet E-396.
3. For Roadway level, Bike Path and Belvedere Lighting Fixture Schedules, see sheets E-146, E-147 and E-165.
4. For Roadway level and Bike Path Call Box Schedule, see sheet E-397.
5. For number of lighting fixtures (main tower lights) see lighting schedule sheets E-271 and E-272.
6. All conduits and fittings routed exposed between the Bike Path and the roadway shall be galvanized rigid steel, PVC coated.
7. See sheets E-160 thru E-165 for conduit locations.

LIGHTING FIXTURE TYPE DESIGNATION

Example: MSR-2B-C (See Special provisions for additional information)
MSR = SAS Safety light
-2B = 400 Watts
-C Beam Angles

Location (Letter)		Function (Letter)	
M	SAS	A	Aesthetic light
		S	Safety light

Application (Letter)	
D	Downward flood light
U	Upward flood light
R	Roadway light
T	Pylon flood light
M	Marker light
P	Pylon marker light
B	Bike path light
V	Belvedere light
L	Light pipe

Number/ Lamp Wattage	
1	1000 W
2	400 W
3	250 W
4	175 W
5	100 W
6	50 W

Beam Angles (Letter)
A
B
C

Mounting Type (Letter)	
C	Cable
D	Roadway deck
PB	Pier Base/ Pole mount
RC	Roadway at Cross beam
P	Pole mounted without lower/raiser
L	Pole mounted with lower/raiser

BIKE PATH FIXTURE SCHEDULE

Location	Mounting	Ltg. Fixture Type	Number/ Wattage	Remarks
Bike Path Structure	Bike Path Railway	MSB	1-40 W	Compact Fluorescent

BELVEDERE LIGHTING POLE AND FIXTURE SCHEDULE

SHEET NOTES:

1. For additional conduits and actual location from PB-LTG, see SAS Superstructure Roadway Plans:
   E-46 (Westbound)
   E-135 (Eastbound)
2. Type PB-1F junction box is mounted on main suspension cable.
3. Type PB-1B junction box is mounted on suspender brackets.
4. For additional conduits from noted junction box, see Aviation Lighting Plans sheet E-291.
5. Flexible conduits attached to suspender cables. See SAS Superstructure Roadway Plans for continuation.
6. For tower and suspension cable lighting mounting details, see sheets E-251 and E-257 to E-261.
7. Deleted.

NOTES:

1. For tower and suspension cable lighting schedule see sheets E-271 to E-272.
2. For pull box schedule see sheets E-83 & E-169.
3. For 480 V main suspension cable lighting wiring diagrams, see sheets E-236 through E-240 and E-243 through E-247.
4. For circuit and conduit/cable tray schedules, see sheets starting at E-401.
5. For other related work not shown on this sheet, see Electrical Special Provisions.

SHEET NOTES:

1. 2/C #10 + G See Detail 1 (1)
2. Conductors spliced inside pull box PB-1B (1)
3. Conductors spliced inside junction box PB-2A located inside girder.
4. The Contractor shall extend and coil 5 meters of cable in manhole 25. All cables shall be tagged with circuits numbers as shown.
5. (1) Install 5A in-line fuse per light fixture, inside PB-1B.

NOTES:

1. Use multi-conductor cable if circuit is routed via trays.
2. References:
   - For typical pull box schedule, see sheets E-83 and E-169.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
3. For number of lighting fixtures see Lighting Fixture Schedule sheets E-271 and E-272.

SHEET NOTES:

(1) 2/C #10 + G See Detail 1. 1

(2) Conductors spliced inside junction box located at tower base.

(3) The Contractor shall extend and coil 5 meters of cable in manhole 25. All cables shall be tagged with circuits numbers as shown.

1
(4) Splice conductor and install 5A in-line fuse per light fixture, inside PB-1B for A-3057-1 through A-3057-4.

(5) Install 5A in-line fuse per light fixture, inside the remote ballast housing for A-3057-5 through A-3057-16.

NOTES:

1. Use multi-conductor cable if circuit is routed via cable trays.
2. References:
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
3. For lighting schedule see sheet E-231.

SHEET NOTES:

1. Conductors spliced inside junction box located at tower.
2. The Contractor shall extend and coil 5 meters of cable in Manhole-25. All cables shall be tagged with circuit numbers as shown. For location of Manhole-27, see sheet E-11.
3. Conductors spliced inside junction box PB-1F located at Suspender Main Cable.
4. For connection to RTU #10W, #10E, #11W and #11E, see sheets E-330, E-331, E-332 and E-333 respectively.
5. Conductors spliced inside junction box PB-2A located inside girder.
6. Install 5A in-line fuse for AV-1 light fixture, inside PB-1B. PB-1B is located inside main tower NW quadrant at elev. 156.750, see Detail 1.
7. Install 5A in-line fuse per AV-2 light fixture, inside PB-1F located along the Suspender main cable, see Detail 1.

NOTES:

1. References:

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 Suppl. No. 1 Contract No. 04 – 0120F4 Road SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

Eliminate the furnishing of roadway and belvedere lighting poles from the SAS Project. The Department will furnish twelve (12) roadway light poles (20 M each) and eight (8) belvedere light poles (3.5 M each) for the Contractor to install per Contract. The pole fixtures are included in CCO 167 S0/S1 and are also to be installed per Contract. All work is to be performed per the Contract Special Provisions, Standard Specifications, and Standard Plans.

The following revised plan sheets detail the changes addressed in this change order: 143R1, 144R1, 145R1, 146R1, 147R1, 148R1, 214R1, and 318R1 (of 1204) as shown on sheets 2 through 9 of this change order.

For this reduction, the Contractor agrees to credit the Department a lump sum of ($517,753.00). This sum constitutes full and complete compensation, including all markups for this change.

Adjustment of Compensation at Lump Sum..... ($517,753.00)

Extra Work at Force Account:

For any additional work as directed by the Engineer, necessary for installation of the poles or attachment of any components to the poles that are not shown on the contract plans, that has cost not covered by the lump sum amount above and the original scope of the contract.

Labor, equipment and material authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated Cost of Extra Work at Force Account..... $100,000.00

Estimated Cost: Increase ☐ Decrease ☒ ($417,753.00)

By reason of this order the time of completion will be adjusted as follows: 0 Days

Submitted by

Signature	**Resident Engineer** Kannu Balan, Senior T.E.	**Date** 1-23-12

Approval Recommended by

Signature	**Supervising Transportation Engineer** William Casey, Sup. T.E.	**Date** 1-31-12

Engineer Approval by

Signature	**Supervising Transportation Engineer** William Casey, Sup. T.E.	**Date** 2-3-12

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature	(Print name and title) BRIAN A. PETERSEN - PROJECT DIRECTOR	**Date** 02FEB12

CCO DESCRIPTION: State Furnished Light Poles	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percenlage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Eliminating the furnishing of roadway and belvedere lighting poles from the SAS Project. The Department will furnish twelve roadway light poles and eight belvedere light poles for the Contractor to install per Contract. Force account will compensate for any additional work necessary for installing the poles or attaching components to the poles that are not shown on the contract plans.

The pentagonal light poles on the new SFOBB East Span are unique to the new Bay Bridge and as part of the original design each individual contract was to furnish and install the poles in their project limits. Due to the uniqueness of the poles and for architectural and functional consistency of the poles, they were eliminated from all contracts so that one fabricator under a separate contract can fabricate them. Bay Area Toll Authority (BATA) has awarded a procurement contract to purchase all of the poles and provide them as State furnished.

This change order is ($517,743.00) credit lump sum and $100,000.00 force account for a total credit of ($417,753.00), which can be returned to the contingency fund. A detailed cost analysis is on file. The cumulative total of CCO 43S0 and 43S1 is $225,903.00.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Pete Siegenthaler (Prin. TE), Ken Terpstra (Project Manager), Rich Foley (HQ Oversight), and Wenyi Long (Design Oversight). Maintenance concurrence is not required.

GENERAL NOTES:

SPECIFICATIONS
Design: AASHTO standard specifications for structural supports for highway signs, luminaires and traffic signals 1994 as revised by interim Specifications-bridges 1986-1989, 1991, 1993 and 1994.

LOADING:
Wind Loading: 190 km/h velocity (at bridge deck) AASHTO

UNIT STRESS
Structural Steel: fy = 345 MPa tapered steel tube and base plate
fy = 248 MPa unless noted otherwise
Stainless steel: ASTM A666, type 316N, fy = 240 MPa
Stainless steel bolts and studs: ASTM F593, group 316L, fy = 205 MPa

WELDING
All welding continuous unless otherwise noted on the plans. All welding to be done in accordance with the standard specifications.

Notes

1. Pole details shall suit the lowering device. Pole details shall be submitted to the engineer for approval.
2. For pole finish see Special Provisions.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

ITEM 1.

- Revise lighting pole and main tower lighting fixture schedules.
- Revise luminaire pull boxes and associated conduit routing into pull boxes.
- Add in-line fuses to luminaires.

Add Special Provisions Section 10-3.105 "FUSED SPLICE CONNECTORS," as shown on sheet 3.

Adjustment of Compensation at Lump Sum..... $642,646.00

Estimate of Increase in Contract Item at Contract Price:

ITEM 2.

Modify deck mounted lighting brackets.

Item No. 55: FURNISH STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
101 KG (+0.00%) @ $9.00 /KG =+$ 909.00 (+0.00%)

Item No. 56: ERECT STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
101 KG (+0.00%) @ $1.00 /KG =+$ 101.00 (+0.00%)

The quantity increases shown herein for Items #55 and 56, when combined with the quantity shown in the Engineer's Estimate, and as modified by any previous change orders or revisions to dimensions made by the Engineer, shall be the final quantity for which payment will be made.

Total Cost for Increase in Contract Item..... $1,010.00

The following revised plan sheets detail the changes addressed in this change order: 93R4, 118R3, 119R2, 123R2, 124R2, 125R1, 132R4, 132S1, 132S2, 141R2, 189R4, 194R2, 195R2, 196R1, 197R2, 198R1, 208R4, 208S1, 208S2, 211R2, 244R2, 247R3, 248R3, 249R2, 250R2, 251R1, 252R2, 253R1, 254R1, 255R1, 256R1, 257R2, 258R1, 259R1, 260R1, 268R1, 276R2, 299R2, and 906R1 (of 1204) as shown on sheets 4 through 42 of this change order.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 415, 464, 465, 466, 467, 1100R0 and 1100R1 with respect to changes listed above.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 **Suppl. No.** 0 **Contract No.** 04 – 0120F4 **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation at Lump Sum	$642,646.00
(ITEM 2) Increase in Contract Items at Contract Prices	$1,010.00
Total net pay for this change order	$643,656.00

This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$643,656.00**

By reason of this order the time of completion will be adjusted as follows: **0 Days**

Submitted by

Signature **Resident Engineer** Kannu Balan, Senior T.E. **Date** 12-14-11

Approval Recommended by

Signature **Supervising Transportation Engineer** William Casey, Sup. T.E. **Date** 12-20-11

Engineer Approval by

Signature **Supervising Transportation Engineer** William Casey, Sup.T.E. **Date** 1-6-12

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Revising lighting pole and main tower lighting fixture schedules. Modifying deck mounted lighting brackets. Revising luminaire pull boxes and associated conduit routing into pull boxes. Adding in-line fuses to luminaires.

Adding Special Provisions Section 10-3.105 "FUSED SPLICE CONNECTORS."

Lighting pedestals that were located on crossbeams were relocated to avoid overhanging the edge and constructability issues due to limited space. Deck and wall mounted Tower aesthetic lights did not have enough information in the plan sheets to determine placement. Mounting brackets and pull boxes are revised to avoid interferences with piping and conduits. In-line fuses were added to individually connect luminaires to the power feed. Each luminaire has a dedicated fuse so that one blown fuse will not blow the entire line.

This change order resolves the costs associated with Contractor Request For Information (RFI) numbers 415, 464, 465, 466, 467, 1100R0 and 1100R1 with respect to changes listed above.

The total cost of this change order is $642,646.00 lump sum and $1,010.00 increase in contract items for a total of $643,656.00 for this change, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Ken Terpstra (Project Manager), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 43 Suppl. No. 1 Contract No. 04 – 0120F4 Road SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

Eliminate the furnishing of roadway and belvedere lighting poles from the SAS Project. The Department will furnish twelve (12) roadway light poles (20 M each) and eight (8) belvedere light poles (3.5 M each) for the Contractor to install per Contract. The pole fixtures are included in CCO 167 S0/S1 and are also to be installed per Contract. All work is to be performed per the Contract Special Provisions, Standard Specifications, and Standard Plans.

The following revised plan sheets detail the changes addressed in this change order: 143R1, 144R1, 145R1, 146R1, 147R1, 148R1, 214R1, and 318R1 (of 1204) as shown on sheets 2 through 9 of this change order.

For this reduction, the Contractor agrees to credit the Department a lump sum of ($517,753.00). This sum constitutes full and complete compensation, including all markups for this change.

Adjustment of Compensation at Lump Sum..... ($517,753.00)

Extra Work at Force Account:

For any additional work as directed by the Engineer, necessary for installation of the poles or attachment of any components to the poles that are not shown on the contract plans, that has cost not covered by the lump sum amount above and the original scope of the contract.

Labor, equipment and material authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated Cost of Extra Work at Force Account..... $100,000.00

Estimated Cost: Increase ☐ Decrease ☒ ($417,753.00)

By reason of this order the time of completion will be adjusted as follows: 0 Days

CCO DESCRIPTION: State Furnished Light Poles	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Eliminating the furnishing of roadway and belvedere lighting poles from the SAS Project. The Department will furnish twelve roadway light poles and eight belvedere light poles for the Contractor to install per Contract. Force account will compensate for any additional work necessary for installing the poles or attaching components to the poles that are not shown on the contract plans.

The pentagonal light poles on the new SFOBB East Span are unique to the new Bay Bridge and as part of the original design each individual contract was to furnish and install the poles in their project limits. Due to the uniqueness of the poles and for architectural and functional consistency of the poles, they were eliminated from all contracts so that one fabricator under a separate contract can fabricate them. Bay Area Toll Authority (BATA) has awarded a procurement contract to purchase all of the poles and provide them as State furnished.

This change order is ($517,743.00) credit lump sum and $100,000.00 force account for a total credit of ($417,753.00), which can be returned to the contingency fund. A detailed cost analysis is on file. The cumulative total of CCO 43S0 and 43S1 is $225,903.00.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Pete Siegenthaler (Prin. TE), Ken Terpstra (Project Manager), Rich Foley (HQ Oversight), and Wenyi Long (Design Oversight). Maintenance concurrence is not required.

2490 Day(s)	**0** Day(s)	**0** Day(s)	**0** %	**22**

THIS CHANGE ORDER PROVIDES FOR:
Providing additional funds for installation of the roadway light poles.

Contract Change Order (CCO) 43 S0 "Lighting Revisions" modified mounting brackets and pull boxes for Tower lights. CCO 43 S1 "State Furnished Light Poles" eliminated furnishing of roadway and belvedere lighting poles from the SAS Project so that one fabricator under a separate contract could fabricate them for the entire bridge but left installation of the poles under the SAS contract. Bay Area Toll Authority (BATA) awarded a procurement contract to purchase all of the poles and provide them as State furnished.

Most of the light poles are mounted on concrete pedestals; however ten SAS roadway light poles are mounted on steel pedestals. Steel poles mounted on steel pedestals require a mill-to-bear tolerance specification, which was omitted from the BATA contract specifications. The poles were delivered and mounted on the SAS steel pedestals before it was discovered that the bearing surfaces of ten of the poles and pedestals did not completely bear over the entire area. In order to ensure a proper fit up, these ten poles were removed from the SAS steel pedestals and the shipped to the fabricator for the necessary milling process, which was compensated under a separate BATA change order. When the poles returned, fixtures, cameras and MVDS units were reattached and the poles were re-erected.

As part of CCO 43 S1, force account funds were provided for any additional work necessary to install the state furnished poles due to changes from the contract plans. This change order provides the remainder of the expected cost to remove and disassemble the poles, handle and load onto trucks, and unload, reassemble, and reinstall after their return from the fabricator.

The total cost of this change order is $70,000.00 force account, which can be financed from the contingency fund. A detailed cost analysis is on file. The cumulative total of CCO 43 S0, S1, and S2 is $295,903.00.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order will obtain concurrence from William Casey (Supervising TE), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

CCO: 44 Suppl. No. 0 Contract No. 04 – 0120F4 Road SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

ITEM 1.

Modify the steel barriers including, but not limited to, the following:

- Revise pipe connector for the barrier mounted sign support
- Modify call boxes, pull boxes, utility panels, lighting panels, and conduit supports and routing in the barriers
- Change barrier connection types
- Revise deck drainage details
- Revise barrier and connection details
- Provide receptacle mounting detail
- Revise sign supports
- Provide cut out details for utility penetrations
- Modify luminaire support boxes
- Modify railings attached at call box locations on the barrier
- In lieu of caulk, provide seal welds at the barrier base plate

Revise Special Provisions Section 10-3.08 "SUPPORT HARDWARE FOR CONDUITS, CABLE TRAYS AND WIREWAYS," subsection "CONDUIT AND TRAY SUPPORTS" as shown on sheet 3 of this change order.

The following revised plan sheets detail the changes addressed in this change order: 32R1, 72R1, 83R1, 118R2, 121R2, 127R1, 130R1, 131R1, 131S1, 132R3, 133R3, 189R2, 190R2, 192R2, 193R2, 200R2, 203R1, 207R1, 207S1, 207S2, 208R3, 209R2, 210R2, 217R1, 218R2, 311R1, 312R1, 313R1, 314R1, 351R2, 352R2, 353R1, 354R2, 355R1, 358R1, 360R2, 361R2, 362R1, 363R1, 364R1, 367R1, 367S1, 368R1, 369R1, 370R2, 371R2, 373R1, 374R1, 375R1, 376R1, 386R1, 387R1, 388R1, 389R1, 390R2, 391R1, 392R2, 393R2, 394R1, 395R1, 396R2, 397R2, 398R1, 399R2, 400R1, 622R1, 636R1, 638R2, 669R2, 671R1, 673R1, 742R2, 876R2, 877R1, 878R2, 889R5, 889S1, 890R6, 890S1R5, 890S2R2, 890S3R2, 895R1, 903R1, 903S1R1, 904R3, 905R4, 908R1, 965R1 and 966R2 (of 1204) as shown on sheets 4 through 92 of this change order.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 102, 103, 104R1, 157R0, 157R1, 202, 207, 217R2, 222, 242, 301, 302, 334R0, 334R1, 432R0, 464, 490, 530R0, 565R2, 565R3, 565R4, 611, 612, 613, 678R0, 678R1, 681, 743, 839, 897R0, 897R1, 933R0, 933R1, 1064, 1092R0, 1168, 1985R1, 2042, 2292, 2302, TC-RFI-0040R1, TC-RFI-0068R0, TC-RFI-0104R0, and TC-RFI-0130R0 with respect to changes listed above.

Adjustment of Compensation at Lump Sum..... $1,688,826.00

ITEM 2.

The items identified above in this change order have been paid as part of CCO 108S1 resolution. Therefore, the amount due under this change order will be adjusted by the amount paid under CCO 108S1 to prevent a double payment. Total amount paid under CCO 108S1, and to be credited to this change, is $300,000.00.

Adjustment of Compensation at Lump Sum Price..... <$300,000.00>

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 44 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation at Lump Sum.....	$1,688,826.00
(ITEM 2) Amount paid under CCO 108S1 for this change order	<$300,000.00>
Total net pay for this change order	$1,388,826.00

This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Estimated Cost: Increase ☒ **Decrease** ☐ **$1,388,826.00**

By reason of this order the time of completion will be adjusted as follows: 0 Days

Submitted by

Signature Kannu Balan **Resident Engineer** Kannu Balan, Senior T.E. **Date** 12-6-4

Approval Recommended by

Signature **Program Manager** Jim Tapping for Tony Anziano, Program Manager **Date** 12/7/11

Engineer Approval by

Signature Tony Anziano **Program Manager** Tony Anziano, Program Manager **Date** 1/5/12

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature (Print name and title) BRIAN A. PETERSEN - PROJECT DIRECTOR **Date** 03JAN12

CCO DESCRIPTION: Barrier Modifications	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Modifying the steel barriers including:

- Revising the pipe connector for the barrier mounted sign support
- Modifying call boxes, pull boxes, utility panels, lighting panels, conduit supports and routing in the barriers
- Changing barrier connection types
- Revising deck drainage details
- Revising barrier and connection details
- Providing receptacle mounting detail
- Revising sign supports
- Providing cut out details for utility penetrations
- Modifying luminaire support boxes
- Modifying railings attached at call box locations on the barrier
- In lieu of caulk, providing seal welds at the barrier base plate

Revising Special Provisions Section 10-3.08 "SUPPORT HARDWARE FOR CONDUITS, CABLE TRAYS AND WIREWAYS," subsection "CONDUIT AND TRAY SUPPORTS."

Sign pipe connectors are modified due to interference with water piping. Conflicting plan sheets are resolved and missing details are provided. Conduit routing through the barrier is improved. Barrier connection types are modified to accommodate fabrication tolerances and edge distance issues. Barriers, deck drainage, and luminaire support boxes are revised to resolve interference and clearance issues. Barrier dimensions vary due to variable floorbeam spacing and bolt spacing is changed to clear welds. The barrier to flume bolted connection is revised for proper fit-up. Tensioning of the luminaire support anchor rods is revised due to the short length of the rods. Seal welds will provide better water resistance and protect against corrosion.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 102, 103, 104R1, 157R0, 157R1, 202, 207, 217R2, 222, 242, 301, 302, 334R0, 334R1, 432R0, 464, 490, 530R0, 565R2, 565R3, 565R4, 611, 612, 613, 678R0, 678R1, 681, 743, 839, 897R0, 897R1, 933R0, 933R1, 1064, 1092R0, 1168, 1985R1, 2042, 2292, 2302, TC-RFI-0040R1, TC-RFI-0068R0, TC-RFI-0104R0, and TC-RFI-0130R0 with respect to changes listed above.

The amount of $300,000.00 for changes prior to November 17, 2009, was paid in CCO 108S1 (Fabrication Recovery). The additional cost of this change order is $1,388,826.00 for changes that occurred after November 17, 2009, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Peter Siegenthaler (Principal TE), William Casey (Sup. TE), Rich Foley (HQ Oversight), Ken Terpstra (Project Manager), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design) August 30, 2011.

Toll Bridge Program Oversight Committee (TBPOC) approved CCOs 44 S0 and S1 on December 1, 2011, for a value of

SHEET NOTES:

(1) Conduit from barrier pullbox or other equipment down into Girder, See sheet E-97.

(2) For conduit to Suspend Lighting, See sheet E-227. Typ for all PB-LTG located on the north side of the roadway.

(3) Contractor shall furnish and install UP-105 per sheet E-72. For complete scope of work on platform and other related work not shown on this sheet, see Electrical Special Provisions.

(4) See sheet E-67 for pylon floodlight conduit location.

(5) Type PB-1C junction box is used on suspender brackets.

(6) Roadway Barrier Receptacle, see Detail 1, sheet E-68.

NOTES:

1. References:
   - For typical details and locations of conduit connections to light poles, barrier outlet boxes, call boxes, overhead sign lighting, CCTV and MVDS, see sheets E-67, E-68 and E-68.
   - TOS equipment is shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-357.
   - For types of pullboxes, splice boxes and enclosures, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For Roadway Call Boxes, refer to sheet E-396.
3. For Roadway Level Lighting Pole Schedule, see sheet E-82.
4. For Roadway Level Call Box Schedule, see sheet E-397.
5. For number of lighting fixtures (main tower lights), see lighting schedule sheets E-271 and E-272.

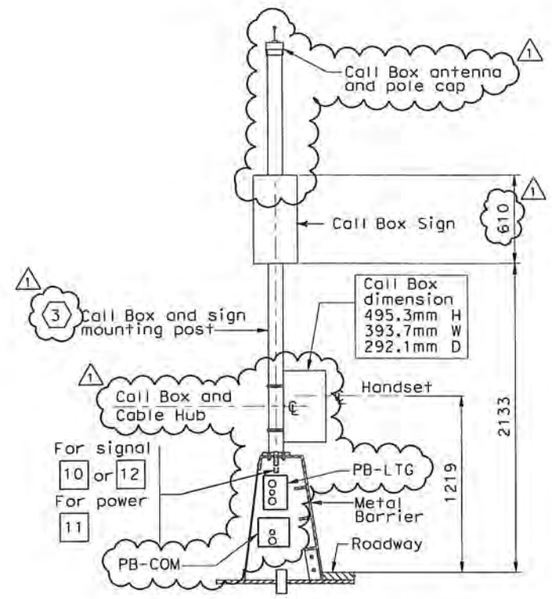
PLAN

CONDUIT STUB AND MOUNTING
OF CALL BOX AT BARRIER
SCALE 1:4



SECTION A-A

1 SCALE 1:20

NOTES:

1. References:
   - For pull box schedule, see Sheet E-83.
   - For light pole schedule, see Sheet E-82.
   - For call box schedule, see Sheet E-307
2. For location of pull boxes inside girder, see Sheet E-96 through E-101.
3. For mounting hole detail of call box on roadway metal barrier, see sheet AS-13.

SHEET NOTES:

1. Bond grounding bushing to pole ground lug with #6 bare copper wire.
2. For conduit location inside lighting pole, see Sheet E-68.
3. For call box mounting detail, see AS Sheets.
4. For typical conduit support locations inside barrier diaphragm, see Details 1, 2, and 3 of Sheet E-66A.
5. Locate Pull Box at approximate center of diaphragm. For typical PB-LTG and conduit support inside barrier diaphragm, see Details 4 and 6 sheet E-66A.
6. Locate Pull Box at approximate center of diaphragm. For typical PB-COM and conduit support inside barrier diaphragm, see Detail 5 sheet E-66A.
7. Provide conduit clamp for each conduit.
8. Strut channel, 41 mm. support for pull box and installed by Contractor.

SAS SUPERSTRUCTURE CONDUIT - PLAN

SHEET NOTES:

1. Conduit from barrier pullbox or other equipment down into Girder Box, see sheet E-182.
2. For conduit to tower and suspension cable lighting see sheet E-227.
3. Contractor shall furnish and install UP-205 and LP-220 per sheet E-72. For complete scope of work on platform and other related work not shown on this sheet, see Electrical Special Provisions.
4. Roadway Barrier Receptacle, see Detail 1, sheet E-162.

NOTES:

1. References:
   - For typical details and locations of conduit connections to light poles, barrier outlet boxes, call boxes, overhead sign lighting, CMS, CCTV and MVDS, see sheets E-160 thru E-162 and E-169.
   - TOS equipment is shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-357.
   - For types of pull boxes, splice boxes and enclosures, see sheet E-169.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For Roadway Level Call Boxes, refer to sheet E-396.
3. For Roadway level, Bike Path and Belvedere Lighting Fixture Schedules, see sheets E-146, E-147 and E-165.
4. For Roadway level and Bike Path Call Box Schedule, see sheet E-397.
5. For number of lighting fixtures (main tower lights) see lighting schedule sheets E-271 and E-272.
6. All conduits and fittings routed exposed between the Bike Path and the roadway shall be galvanized rigid steel, PVC coated.
7. See sheets E-160 thru E-165 for conduit locations.

SAS SUPERSTRUCTURE - CONDUIT AND CABLE TRAY PLAN

SHEET NOTES:

1. Conduit up to PB-LTG located in barrier, see sheet E-137.
2. Conduit up to PB-COM located in barrier, see sheet E-137.
3. PB-2A, locate on top of floor.
4. For cable tray run and lighting inside crossbeam, see sheet E-116.
5. For lighting inside crossbeam, see sheet E-119.
6. For future light pipes, see sheets E-202 thru E-204. For light pipe schedule, see sheet E-217.
7. For cable tray & ground bar support, refer to sheet E-208.
8. For fiber splice tray detail. Refer to sheet E-355.

NOTES:

1. References:
   - TOS equipment is shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-357.
   - For types of pull boxes, splice boxes and enclosures, see sheet E-169.
   - For bridge grounding plan, see sheet E-196.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For other work related to items not shown on this sheet, see Electrical Special Provisions.
3. The girder lighting fixtures are shown diagrammatically. Contractor shall install fixtures at railing posts with a maximum of 8000 mm between fixtures. For types and typical lighting fixture installation details, see sheet E-206.
4. The cable trays are shown diagrammatically. For typical girder cable tray plans and sections, see sheets E-207 and E-208.

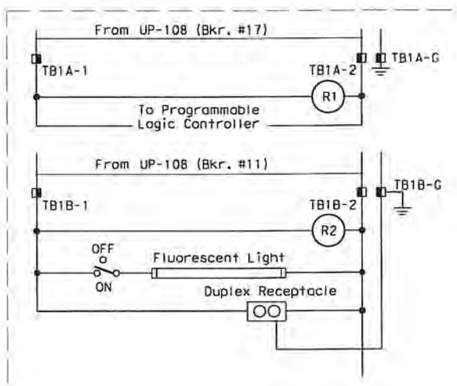
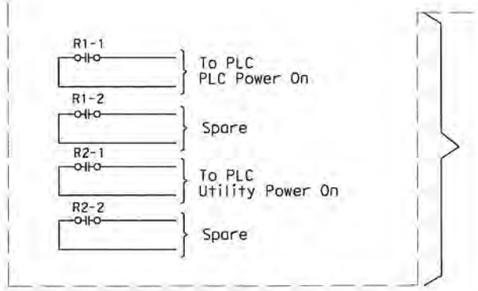
CONNECTION DIAGRAM - RTU #11W





ELEMENTARY DIAGRAM - RTU #11W

SHEET NOTES:

(1) For connection diagram to call boxes, see sheet E-398.

(2) For connection diagram to scada system, see Table A, sheet E-325.

(3) For connection diagram to dehumification controllers, see sheets E-79.

(4) Connections to panel door switch. For remote alarm status to RTU.

(5) Field to tape cable overall shield wire.

(6) Conductors spliced inside junction box PB-2A located inside the girder.

(7) The Contractor shall install resistors, approximately equal to the impedance (Zo) of the twised pairs, at the extreme ends of the multidrop network.

NOTES:

1. All spare conductors shall be coiled and taped at conductor ends unless terminated.
2. Terminate cable shields to low level ground bus.
3. References:
   - For UP-108 panel schedule, see sheet E-63.
   - For RTU #11W panel layout, see sheet E-320.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.

FRAMING PLAN

1:250

ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE SHOWN

LEGEND:

- East anchorage
- Top anchorage plate
- Blockout for modular joint (see Note 7)

NOTES:

1. For girder splice details, see "Typical Girder Details" sheets.
2. "W" Line floorbeams from PP120.5 through PP124.5, and PP126, PP127.5 and PP128 are radial with respect to "W" Line curve.
3. "E" Line floorbeams from PP120.5 through PP124.5, and PP126, PP127.5 and 128 are aligned with "W" Line floorbeams and radial with respect to "E" Line curve.
4. "W" and "E" Line floorbeams from PP118 through PP120 are parallel.
5. "W" and "E" Line floorbeams from PP125 through PP127 are parallel.
6. For typical girder details, see "Typical Girder Details" sheets. For girder details and transition at East transition PP118 through PP128, see "Girder at East Transition" and "Girder At Pier E2" sheets.
7. For modular joint details, see "Hinge A Expansion Joint Details" sheets.
8. For Hinge A bulkheads, floorbeams, and joint blockout, see "Hinge A Details" sheets.
9. For "K" and vertical plates, see "Girder at East Transition Details" sheets.
10. For service platform details, see "Road Plans". For girder access details, see "Girder Access Details" sheets.
11. From PP115 through PP128, the distance between center line of girder splice and adjacent floorbeam is 800.

SUSPENDER TYPES 1 & 2

NTS

10. Type 1 Suspender ropes shall have a metallic area of at least 2742 mm² and a nominal diameter no greater than 78 mm. The vertical component of dead load on the four rope parts of one suspender shall be limited to 3200 kN.

11. Type 2 Suspender ropes shall have a metallic area of at least 4460 mm² and a nominal diameter no greater than 102 mm. The vertical component of dead load on the four rope parts of one suspender shall be limited to 4800 kN.

12. At locations where cable railing interferes with web PL, drilling a 10 mm Dia hole in the bracket web PL is acceptable, subject to review and approval of the Engineer.

NOTES:

1. For steel barrier to box girder connection details, see "Typical Girder Details" sheets.
2. Inlets and flume plates exist on south barrier of each deck only.
3. For locations and details of drainage features, see "Deck Drainage Details" sheets.
4. For Detail A, see "Barrier Details No. 2" sheet.
5. For conduit penetration thru deck and beveled plate detail, see "Utility Details" sheets.
6. For utilities inside barrier, pipe supports and other attachments to barrier, see "Road Plans".
7. For "Barrier Details" sheets, the Contractor shall verify all controlling field dimensions before ordering or fabricating any material.
8. The Contractor shall provide cutouts for conduit penetrations as required. Conduit penetrations shall be arranged so as to allow removal of cover plate. 5 For conduit penetration details, see "Barrier Details No. 1A" sheet.
9. Barrier length and diaphragm spacing varies west of PP 9 and from PP 118 to Hinge A. See Detail D on "Girder at Pier W2 No. 3" sheet and "Girder Framing Plan No. 4" sheet.
10. Following installation of all HS Bolts all A354 (GR BC) bolts for barrier segment shall be installed snug tight. They shall then be tightened by an additional one-half turn of the nut.
11. For receptacle mounting see "Utility Details No. 2". For locations see "Road Plans".

15. At the Contractor's option, M12 cap screw may be used. Also at the Contractor's option, tapped hole may be used.
16. At the Contractor's option, 16 Dia oversize holes may be used in the cover plate with washer of sufficient size to cover the oversize holes, subject to review and approval of the Engineer.

12. For 22 Dia bolts, use 24 Dia holes in steel deck plates and 27 Dia holes in barrier base plate.
13. For conduit and box support details, see "Road Plans".
14. At the Contractor's option, a seal weld may be used in lieu of caulk seal between:
- Base PL 25 & PL 12
- Base PL 25 & PL 16
- PL 16 & PL 12,
subject to review and approval of the Engineer.

REVISIONS

7. For call box penetrations and locations see "Road Plans".
8. Cut line for cover PLs located 3300 west of panel points listed under Type 1 in "Drainage Type Location Table" on "Deck Drainage Detail No. 3" sheet.
9. For details not shown, see "Barrier Details No. 1" sheet.
10. For 22 Dia bolts, use 24 Dia holes in steel deck plates and 27 Dia holes in barrier base plate.
11. For conduit and box support details, see "Road Plans"
12. In lieu of the 6 mm fillet weld, an equivalent PJP weld may be provided.
13. Backer rod and caulk shall be provided between the diaphragm flange and both the diverter plate and the cover plate. At the Contractors' option, foam filler may be used in lieu of backerrod and caulk, subject to review and approval of the Engineer.
14. At the Contractor's option, a seal weld may be used in lieu of caulk seal between:
    - Base PL 25 & PL 12
    - Base PL 25 & PL 16
    - PL 16 & PL 12,

    subject to review and approval of the Engineer.
15. At the Contractor's option, M12 cap screw may be used. Also at the Contractor's option, tapped hole may be used.
16. At the Contractor's option, 16 Dia oversize holes may be used in the cover plate with washer of sufficient size to cover the oversize holes, subject to review and approval of the Engineer.
17. At the Contractor's option, the continuous caulk bead may be applied along the seam between the interior barrier face plate and the OBG deck plate after barrier segments have been aligned, subject to review and approval of the Engineer.
18. At the Contractor's option, the PL 8 may be removed provided the caulk with backer rod is extended to the top of steel deck, subject tp review and approval of the Engineer.

NOTES:

1. For steel barrier to box girder connection details, see "Typical Girder Details" and "Barrier Details No. 1" sheets.
2. Inlets and flume plates exist on south barrier of each deck only.
3. For locations of drainage features, see "Deck Drainage Details No. 2" sheet. Slot cover over Diverter plate where shown on "Deck Drainage Details No. 1" sheet.
4. For conduit penetration thru deck and beveled plate detail, see "Utility Detail" sheets.
5. For utilities inside barrier, see "Road Plans".
6. Barrier length and diaphragm spacing varies west of PP 9 and from PP 118 to Hinge A. See Detail D on "Girder At Pier W2 No. 3" sheet, and "Girder Framing Plan No. 4" sheet.

ALL DIMENSIONS ARE IN MILLIMETERS UNLESS OTHERWISE SHOWN

NOTES:

1. For steel barrier to box girder connection details, see "Typical Girder Details" and "Barrier Details No.1" sheets.
2. Inlets and flume plates exist on south barrier of each deck only.
3. For locations of drainage features, see "Deck Drainage Details No. 2" sheet. Slot cover over Diverter plate where shown on "Deck Drainage Details No.1" sheet.
4. For conduit penetration thru deck and beveled plate detail, see "Utility Detail" sheets.
5. For utilities inside barrier support details, conduit and box, see "Road Plans".
6. Barrier length and diaphragm spacing varies west PP 9 and from PP 118 to Hinge A. See Detail D on "Girder At Pier W2 No. 3" sheet and "Girder Framing Plan No. 4" sheet.

7. For call box penetrations and locations see "Road Plans".
8. Cut line for cover PLs located 3300 west of panel points listed under Type 1 in "Drainage Type Location Table" on "Deck Drainage Detail No.3" sheet.
9. For details not shown, see "Barrier Details No.1" sheet.
10. For 22 Dia bolts, use 24 Dia holes in steel deck plates and 27 Dia holes in barrier base plate.
11. A spacing of 55 mm shall be used between PP 47 and Hinge A.
12. At the Contractor's option, the 3-M22 bolt pattern at each barrier end may be replaced with 4-M22 bolts using 25x319x243 plates between PP 8 and PP 47. For details of PL 25x319x243 not shown, see "Barrier Details No.2" sheet.
13. At the Contractor's option, a seal weld may be used in lieu of caulk seal between:
    - Base PL 25 & PL 12
    - Base PL 25 & PL 16
    - PL 16 & PL 12,

    subject to review and approval of the Engineer.
14. At the Contractor's option, M12 cap screw may be used. Also at the Contractor's option, tapped hole may be used.
15. At the Contractor's option, 16 Dia oversize holes may be used in the cover plate with washer of sufficient size to cover the oversize holes, subject to review and approval of the Engineer.
16. At the Contractor's option, the continuous caulk bead may be applied along the seam between the interior barrier face plate and the OBG deck plate after barrier segments have been aligned, subject to review and approval of the Engineer.
17. At the Contractor's option, the PL 8 may be removed provided the caulk with backer rod is extended to the top of steel deck, subject to review and approval of the Engineer.

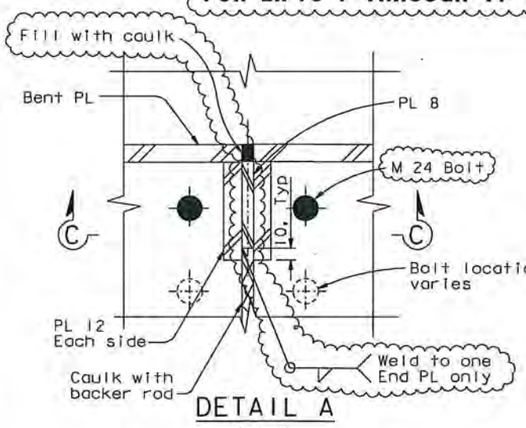
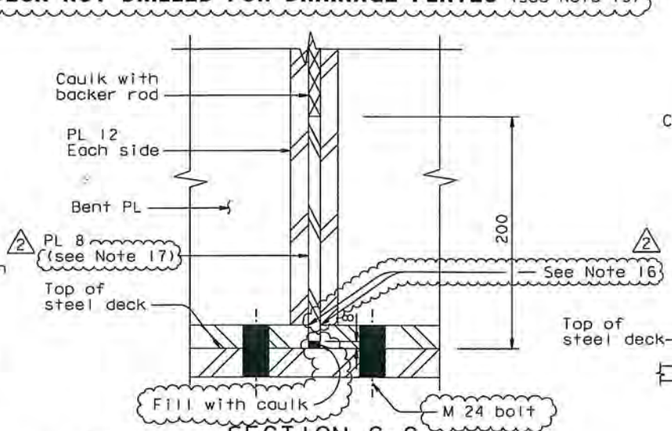
FOR LIFTS 7 THROUGH 14: DECK NOT DRILLED FOR DRAINAGE PLATES (See Note 13)



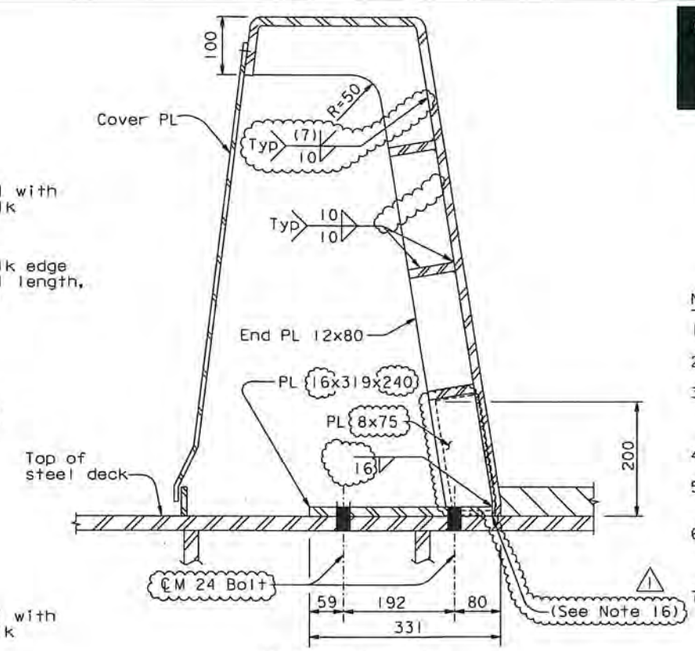
DETAIL A

1:2.5



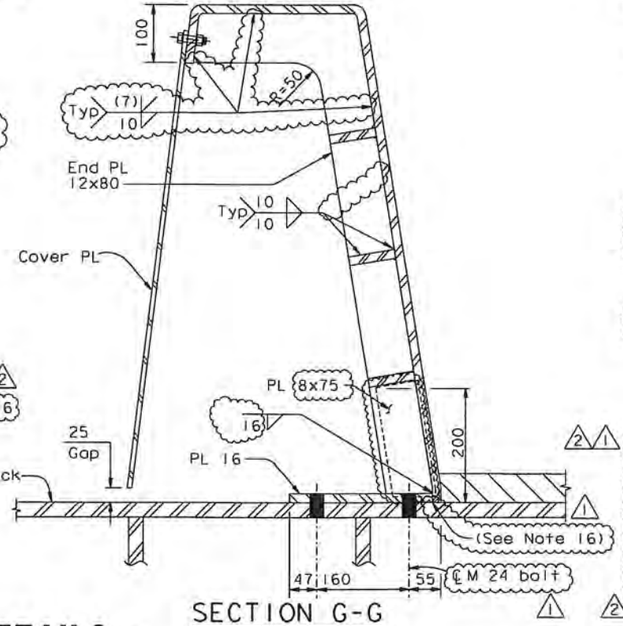
SECTION C-C

1:2.5



SECTION F-F

1:5



SECTION G-G

1:5

NOTES:

1. For steel barrier to box girder connection details, see "Typical Girder Details" sheets.
2. Inlets and flume plates exist on south barrier of each deck only.
3. For locations and details of drainage features, see "Deck Drainage Details" sheets. Slot cover over Diverter plate where shown on "Deck Drainage Details No. 1" sheet.
4. For conduit penetration thru deck and beveled plate detail, see "Utility Details" sheets.
5. For utilities inside barrier, pipe supports and other attachments to barrier, see "Road Plans".
6. The contractor shall provide cutouts for conduit penetrations as required. Conduit penetrations shall be arranged so as to allow removal of cover plate.
7. Barrier length and diaphragm spacing vary west of PP 9 and from PP 118 to Hinge A. See Detail D on "Girder at Pier W2 No. 3" sheet and "Girder Framing Plan No. 4" sheet. Bolt spacings may be varied within the requirements of "Bolt Dimension Table" on "Typical Girder Details No. 1" sheet.
8. For receptacle mounting see "Utility Details No. 2". For locations see "Road Plans".
9. For conduit and box support details, and for call box penetrations and locations, see "Road Plans".
10. Between PP 120+350 and PP 120+1250, the Contractor shall provide shim plates under the barrier base plates and under the barrier connections as required to fill the gap caused by the OBG kink. The 68 Dia drainage cut-out in the barrier diaphragm shall not be blocked, and the caulk shall be thickened under the barrier along the curb lines between these panel points.
11. Bolt holes shall be standard size in the deck PL and oversize in the barrier.
12. All bolts between the barrier and the deck shall be tensioned prior to load transfer.
13. For Section B-B and Details not shown for Lines W2/E5, see "Barrier Details No. 2".
14. Drainage PL 25x319x698 not required. Fill all drilled holes with M22 HS bolts.
15. Following installation of all HS bolts all anchor rods for barrier segment shall be installed snug tight. They shall then be tightened by an additional one-half turn of the nut.
16. At the Contractor's option, a seal weld may be used in lieu of caulk seal between:
    - Base PL 25 & PL 12
    - Base PL 25 & PL 16
    - PL 16 & PL 12, subject to review and approval of the Engineer.
17. At the Contractor's option, the PL 8 may be removed provided the caulk with backer rod is extended to the top of steel deck, subject to review and approval of the Engineer.

RAILING AT CALL BOX

NOTES:

1. The details in this sheet are intended for both SAS and Skyway structures. Use applicable details as required.
2. Tube splice may be located 450 mm away from either end of rail support.
3. A grout pad to level rail base plates shall be used for concrete barrier.
4. Tube splice required at steel barriers only.
5. Cut angle and provide a 15 mm gap at steel barrier joint.
6. For call box locations, see "Road Plans".
7. Adjust bolt spacing to miss the barrier diaphragm.

NOTES:

1. Surfaces of plates shall be milled level to ensure bearing.
2. For location of pipe sleeves, see "Road Plans".
3. The Contractor shall submit for approval by the Engineer details of conduit penetration through deck plate. Conduit penetration details shall be completely sealed to ensure no water leakage into support box.
4. For Geometry of luminaire base plate, conduit openings and locations of bolts, see "Road Plans".
5. For details of utilities opening through luminaire support box, see "Road Plans".
6. Pipe sleeves shall be completely sealed at support box side plates to ensure no water leakage into support box.
7. For location of luminaire, see "Road Plans" sheets.
8. Pipe sleeves shall typically be concentric with the carried utility line. For utility locations, see the "Road Plans". For 4 NPS pipe sleeve, place the sleeve with 0 gap at the face of support box front plate, and aligned vertically on the utility line.
9. The side plates are normal to the deck.
10. Grind weld flush at pipe sleeve.
11. Pipe sleeve locations for pedestals @ PP 119 and sign post, see "Road Plans".
12. At locations where cable railing interferes with luminaire support box, terminate railing at eye bolts, each side of support box, subject to review and approval of the Engineer.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 44 **Suppl. No. 1** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

Modify the West End barrier including, but not limited to, the following:

- Extend and stub out conduits and install pull boxes in the concrete barrier to the contract limits at Hinge K.
- Change the RGS conduit with PVC coated rigid conduit at the transition of the metal barrier to the concrete barrier.
- Add a new call box mounting attachment on the barrier at Station 58+70 Eastbound South for an equipment mounting pole.

The following revised plan sheets detail the changes addressed in this change order: 83R4, 117R2, 131S1R1, 131S2, 149R3, 188R3, 207S3, 352R3, 357R2, 358R2, 359R2, 360R3, 366R1, 367R2, 368R2, 369R2, 370R3, 371R3, 377R2, and 407S16 (of 1204) as shown on sheets 2 through 21 of this change order.

For this work, the Contractor will receive a lump sum price of $24,202.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Adjustment of Compensation at Lump Sum.....$24,202.00

Estimated Cost: Increase ☒ **Decrease** ☐ **$24,202.00**

By reason of this order the time of completion will be adjusted as follows: **0 Days**

Submitted by

Signature **Resident Engineer** Kannu Balan, Senior T.E. **Date** 12-6-11

Approval Recommended by

Signature **Program Manager** Jon Tapping for Tony Anziano, Program Manager **Date** 12-6-11

Engineer Approval by

Signature **Program Manager** Tony Anziano, Program Manager **Date** 1/5/12

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

SUPPLEMENTAL FUNDS PROVIDED: **$0.00**	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: West End Barrier Conduit	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Modifying the West End barrier by extending and stubbing out conduits and installing pull boxes in the concrete barrier to the contract limits at Hinge K, changing the RGS conduit with PVC coated rigid conduit at the transition of the metal barrier to the concrete barrier, and adding a new call box mounting attachment on the barrier at Station Number 58+70 Eastbound South for an equipment mounting pole.

These changes will facilitate future extension and use of power and communication circuitry between Yerba Buena Island and the new Bay Bridge. Changing to PVC coated conduit will extend the life of the conduit and protect it from possible moisture and water intrusion at the transition area.

The total cost of this change order is $24,202.00, which can be financed from the contingency fund. A detailed cost analysis is on file. The cumulative total of CCO 44S0 and 44S1 is $1,413,028.00.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order has concurrence from Peter Siegenthaler (Principal TE), Ken Terpstra (Project Manager), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

Toll Bridge Program Oversight Committee (TBPOC) approved CCOs 44 S0 and S1 on December 1, 2011, for a value of $1,413,028.

CONDUIT PLAN
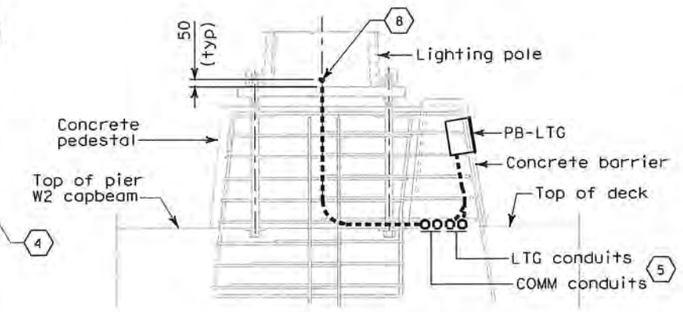
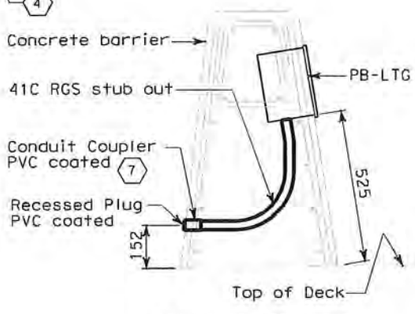
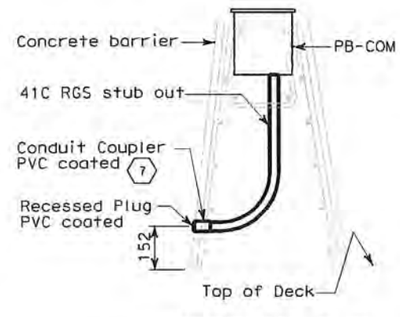
SCALE: 1:100



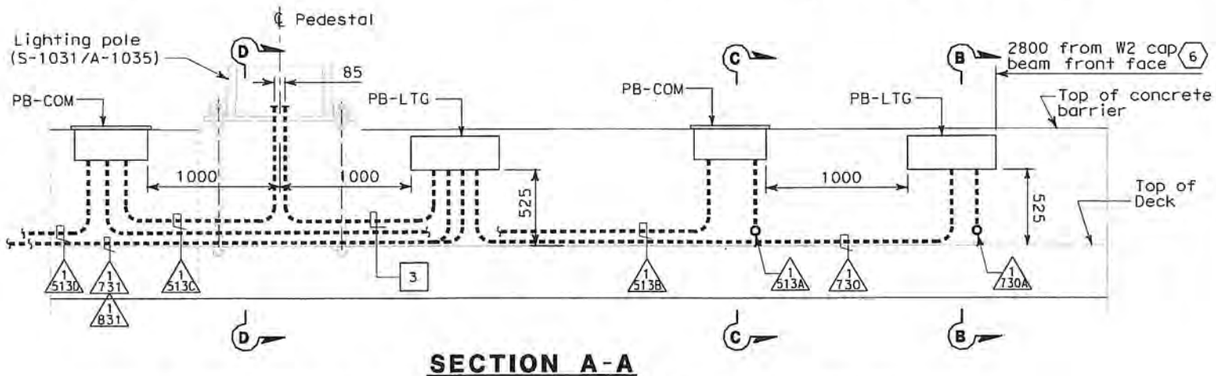
SECTION D-D
NO SCALE



SECTION B-B
NO SCALE
Typical for PB-LTG in concrete barrier.



SECTION C-C
NO SCALE
Typical for PB-COM in concrete barrier.



SECTION A-A
NO SCALE
Similar for installation of PB-LTG and PB-COM on north side concrete barrier.
Conduit routing varies, see conduit plan.

SHEET NOTES:

1. Conduit from barrier pullbox or other equipment down into Girder, see sheet E-96.
2. For conduit to Suspend Lighting, see sheet E-226. Typ for all PB-LTG located on the north side of the roadway.
3. Roadway Barrier Receptacle, see Detail 1, sheet E-68.
4. See drawing E-46 for continuation of conduits.
5. Conduit arrangement may be adjusted to suit field condition.
6. Contractor shall verify dimension and locate PB-LTG with sufficient distance to accommodate required clearance for the expansion joint.
7. Stub-out conduits are furnished and installed by Contractor. Conduit shall stub-out at the non-roadway side of the barrier with the coupler flushed to the barrier face wall and provided with plug.
8. Capped end of conduit stub-ups.

NOTES:

1. For general notes, see E-46.

SHEET NOTES:

1. Contractor shall coil 70 meters inside cable tray at PP15 for feed into PB-COM by others.
2. Railing lights are conrtractor furnished and installed by others.
3. Roadway Barrier Receptacle, see Detail 1, sheet E-68.
4. See drawing E-135 for continuation of conduits.
5. Conduit arrangement may be adjusted to suit field condition.
6. Contractor shall verify dimension and locate PB-LTG with sufficient distance to accommodate required clearance for the expansion joint.
7. Stub-out conduits are furnished and installed by Contractor. Conduit shall stub-out at the non-roadway side of the barrier with the coupler flushed to the barrier face wall and provided with plug.
8. Capped end of conduit stub-ups.
9. Bike path electrical components west of PP-9 are furnished by Contractor and installed by others.

NOTES:

1. For additional general notes, see E135.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO 45	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Reimburse the Contractor for added work to load and transport the pipe material from the painter's facility to Pier 7, including the additional cost to off-load the pipe at Pier 7.

Labor, equipment and material authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated Cost of Extra Work at Force Account $20,000.00

Adjustment of Compensation at Lump Sum:

The fifth paragraph under subsection, "MATERIALS, Pipe and Fittings for Line 4 NPS or Greater", in Section 10-4.03, "CCSF Water Mains and Sewage Force Main", of the Special Provisions is replaced as follows:

From: "Ductile iron pipe and fittings shall have cement mortar lining and seal coating conforming to ANSI/AWWA C104/A21.4. Pipe shall have a bituminous outside coating conforming to ANSI/AWWA C151/A21.51, and fittings shall have a bituminous outside coating conforming to ANSI/AWWA C110/A21.10."

To: "Ductile iron pipe and fittings shall have cement mortar lining and seal coating conforming to ANSI/AWWA C104/A21.4. Pipe and fittings shall have a moisture-cured urethane primer outside coating conforming to ANCI/NSF Standard 61 and have finish paint in accordance with Section 10-1.69, "Clean and Paint Structural Steel" of the Special Provisions."

The specified bituminous coating will be eliminated and, in lieu of, a moisture-cured urethane (MCU) universal primer and finish paint shall be shop applied. This change will apply to the following bid items and associated fittings:

Item 121 - CCSF Reclaim Water (6 NPS)
Item 122 - CCSF Sewer Forced Main (10 NPS)
Item 123 - CCSF Water Main (12 NPS)

The fifth paragraph under Section 5-1.25, "PAYMENTS" of the Special Provisions shall include the following material used on the ductile iron pipe for inclusion in the payment of materials furnished but not incorporated in the work:

"P. CCSF Reclaimed Water (6 NPS) and fittings
Q. CCSF Sewer Forced Main (10 NPS) and fittings
R. CCSF Water Main (12 NPS) and fittings"

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO 45	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

For this work, the Contractor agrees to accept a lump sum payment of $258,930.00. This sum constitutes full and complete compensation, including all markups for furnishing the CCSF pipe.

Adjustment of Compensation at Lump Sum $258,930.00

Determination of cost due to a change in character of the pipe installation due to the addition of the finish paint is deferred.

Total Estimated Cost of this Change Order $278,930.00

Estimated Cost: Increase ☑ Decrease ☐ **$278,930.00**

By reason of this order the time of completion will be adjusted as follows: 0 days

Submitted by

Signature	Resident Engineer William Shedd for Gary Pursell, P.E., Sup.T.E.	Date 8-25-08

Approval Recommended by

Signature	Supervising Transportation Engineer Gary Pursell, P.E., Sup. TE	Date 8/25/08

Engineer Approval by

Signature	Supervising Transportation Engineer Gary Pursell, P.E., Sup. TE	Date 8/29/08

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as may otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

SUPPLEMENTAL FUNDS PROVIDED: $0.00	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Paint Primer on Ductile Iron Pipe	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	0 Day(s)	30 Day(s)	1 %	0

THIS CHANGE ORDER PROVIDES FOR:

Modifying the fifth paragraph under Section 10-4.03, "CCSF Water Mains and Sewage Force Main", subsection, "MATERIALS, Pipe and Fittings for Line 4 NPS or Greater", of the Special Provisions as follows:

From; "Ductile iron pipe and fittings shall have cement mortar lining and seal coating conforming to ANSI/AWWA C104/A21.4. Pipe shall have a bituminous outside coating conforming to ANSI/AWWA C151/A21.51, and fittings shall have a bituminous outside coating conforming to ANSI/AWWA C110/A21.10."

To; "Ductile iron pipe and fittings shall have cement mortar lining and seal coating conforming to ANSI/AWWA C104/A21.4. Pipe and fittings shall have a moisture-cured urethane primer outside coating conforming to ANCI/NSF Standard 61 and have finish paint in accordance with Section 10-1.69, "Clean and Paint Structural Steel" of the Special Provisions."

The bituminous coating will be replaced with a urethane primer and a shop applied finish paint. This change will apply to contract item numbers 121 "CCSF Reclaim Water (6 NPS)", 122 "CCSF Sewer Forced Main (10 NPS)", and 123 "CCSF Water Main (12 NPS)". All associated hardware and fittings shall also have moisture-cured urethane primer and finish paint coating applied.

Finish painting the pipes and fittings to match the bridge structure is not addressed in the contract documentation. These pipes and fittings are visible to the public and are also exposed to the elements. The architectural requirements, for elements visible to the public, cannot be met by the factory applied bituminous pipe coating. Finish painting over the bituminous pipe coating is not recommended due to the incompatibility of the coatings which will result in higher maintenance cost. Therefore this CCO addresses deleting the factory applied bituminous pipe coating and applying a moisture-cured urethane primer coating along with a finish paint coating to pipes and associated fittings.

For cleaning, priming and painting the pipes, the Contractor will receive a lump sum payment of $258,930.00. A detailed cost analysis is on file.

Additional cost to transport pipes from painting facility, in lieu of directly to the jobsite, and additional handling costs will be paid for as Extra Work at Force Account for an estimated amount of $20,000.00, which can be financed from the contingency fund.

This material will be paid for as Material On Hand until incorporated in the work to protect the Department from future price escalations.

The total estimated cost of this Contract Change Order is $278,930.00.

There is no time adjustment due to this change, as it does not affect the controlling operation.

Costs associated with the change in character to install the pipe will be addressed in a supplement change order.

THIS CHANGE ORDER PROVIDES FOR:

Providing additional funds for Ductile Iron Pipe handling and other related maintenance expenses as directed by the Engineer.

During the storage of the pipe as directed by the Engineer, it was observed that additional maintenance expenses would be incurred to protect and maintain the pipe not anticipated in the original estimate. The pipe was purchased under the original change order due to a change in the pipe material specified by the Engineer and to protect the Department from future price escalations.

Payment for this supplemental change will be at Extra Work at Force Account for an estimated amount of $50,000.00, which can be financed from the contingency fund. This will result in a cumulative amount of $328,930.00 for this change order. A detailed cost analysis is in the project records.

No adjustment of contract time is warranted, as this change order does not affect the controlling operation.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Rich Foley (HQ Const), Ken Terpstra (Project Manager) and Pete Siegenthaler (Principal TE). Design and Maintenance concurrences are not required for this change.

The Resident Engineer received an Issue and Approve from the Division of Construction for this Change on October 14, 2009.

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**1**

THIS CHANGE ORDER PROVIDES FOR:

Performing additional handling measures to protect the painted ductile iron pipe and fittings during transport from Pier 7 to the job site and during installation. As directed by the Engineer, performing touch up painting on the ductile iron pipe after installation.

CCO 45S0 added paint to the ductile iron pipe and fittings for the 6" City and County of San Francisco (CCSF) reclaimed water, 10" CCSF sewer force main, and 12" CCSF water lines. In order to install these lines as directed by the Engineer, the plumbing subcontractor will have to take additional measures during handling and installation to protect the already painted surfaces. Additional time will be spent safely rigging the pipes with protective material, using nylon slings, and slowing movement to avoid contact. An extra work at force account portion of this supplement will pay for the painting contractor to touch up scratches to the paint that may occur during installation.

The cost of this supplemental change is $173,008.00, which can be financed from the contingency fund. This will result in a cumulative amount of $501,938.00 for CCO 45S0, 45S1, and 45S2. A detailed cost estimate is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Peter Siegenthaler (Principal TE), Ken Terpstra (Proj. Manager), and Rich Foley (HQ Oversight). Design and Maintenance concurrence are not required for this change.

The Resident Engineer requests Headquarters CCO Desk "Issue and Approve".

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 45 **Suppl. No. 3** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Lump Sum:

After all repairs are made to the uninstalled ductile iron pipe that was stored at Pier 7 as of November 16, 2011, apply two coats of 3 to 5 mil Carboline Carboxane 2000 at ABC's paint shop as per State Letter 05.03.01-010208.

For this work, the Contractor will receive a lump sum price of $20,996.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Extra Work at Lump Sum..... $20,996.00

Estimated Cost: Increase ☒ **Decrease** ☐ **$20,996.00**

By reason of this order the time of completion will be adjusted as follows: 0 Days

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Applying two coats of 3 to 5 mil polysiloxane paint on the Ductile Iron Pipe (DIP) at ABC's paint shop.

The DIP and fittings for the 6" City and County of San Francisco (CCSF) Reclaimed Water, 10" CCSF Sewer Force Main, and 12" CCSF Water lines were painted per CCO 45S0. Approximately 70% of this DIP has been transported to the bridge and incorporated into the work. Caltrans' Material Engineering and Testing Services Branch (METS) inspected installed DIP and determined that the dry film thickness of the primer and paint, that was specified and applied, was insufficient to prevent corrosion. METS recommended that two additional coats of 3 to 5 mil polysiloxane paint be applied. This change order will provide for applying additional paint coat to the 30% of DIP that has not yet been incorporated into the work. The remaining 70% of DIP will be painted in a subsequent change order.

The cost of this supplemental change is $20,996.00, which can be financed from the contingency fund. This will result in a cumulative amount of $522,934.00 for CCO 45S0, 45S1, 45S2, and 45S3. A detailed cost estimate is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 45 **Suppl. No. 4** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Lump Sum:

Repair areas with subsurface imperfections per National Association of Pipe Fabricators Specification NAPF-500-03-03. The repair areas are to be prepared in accordance with the Society of Protective Coatings specifications SSPC-SP2 or SSPC-SP3, then shall be painted with two (2) coats of Wasser MC-Ferroclad Ductile Iron Primer, or other approved product, to a dry film thickness of 6 to 10 mils. The primer shall be feathered into the existing paint system to expose a minimum of 13 mm of each coat. During the re-application of the paint, care must be used to ensure that each coat of paint is only applied within the following areas. The undercoat shall only be applied to the surface of the bare metal and the existing undercoat, which has been exposed by feathering. The finish coat shall not extend beyond the areas which have been feathered or lightly sanded. All repairs shall be made in a manner to blend the patched area with the adjacent coating. The finished surface of the patched area shall have a smooth even profile with the adjacent surface. The first repair area shall be used as a test section and no more repairs made until the methods are approved by the Engineer, and an approved addendum to a Paint Quality Work Plan (PQWP). A finish coat of 3 to 5 mils of Carboline Carboxane 2000 or an approved alternative shall be applied over the repaired and primed areas.

After repairing and recoating of the subsurface imperfections, the entire surface of the installed DIP shall be prepared in accordance with Society of Protective Coatings specifications SSPC-SP2 or SSPC-SP3, then two (2) finish coats of 5 to 7 mils of Carboline Carboxane 2000 or an approved alternative shall be applied in accordance with an approved addendum to a PQWP. DIP on the Pier W2 cap and column shall have two finish coats of grey Federal Standard 595B #26492 applied, in lieu of the white paint.

For this work, the Contractor shall receive a lump sum price of $182,495.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Extra Work at Lump Sum..... $182,495.00

THIS CHANGE ORDER PROVIDES FOR:

Repairing and repainting areas with surface imperfections on the Ductile Iron Pipe (DIP) which has been transported to the bridge and incorporated in the work. After paint repair has been completed, preparing the DIP in accordance with Society of Protective Coatings specifications and applying two finish coats of 5 to7 mils of Carboline Carboxane 2000. DIP on the Pier W2 cap and column shall have two finish coats of grey Federal Standard 595B #26492 applied, in lieu of white paint.

The DIP and fittings for the 6" City and County of San Francisco (CCSF) Reclaimed Water, 10" CCSF Sewer Force Main, and 12" CCSF Water lines were painted per CCO 45S0. Approximately 70% of this DIP has been transported to the bridge and incorporated into the work. Caltrans' Material Engineering and Testing Services Branch (METS) inspected installed DIP and determined that the dry film thickness of the primer and paint, that was specified and applied, was insufficient to prevent corrosion. METS recommended that two additional coats of 5 to 7 mil polysiloxane paint be applied. This change order will provide for applying additional paint coat to the 70% of DIP that has been incorporated into the work. The remaining 30% of DIP was painted in CCO 45S3. The paint color at Pier W2 is changed to grey to match the cap and column.

The cost of this supplemental change is $182,495.00, which can be financed from the contingency fund. This will result in a cumulative amount of $705,429.00 for CCO 45S0, S1, S2, S3, and S4. A detailed cost estimate is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Ken Terpstra (Proj. Manager), Rich Foley (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design).

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 46	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Provide additional materials, equipment, labor and services for Item 36, High Strength Prestressing Rod (75MM), which are not otherwise provided for in the plans and Special Provisions, as directed by the Engineer. Additional materials, equipment, labor, and services will include, but will not be limited to:

1. An additional 26-each High Strength Prestressing Rod assemblies, including Denso tape coating and transportation to the job site.
2. 304-each Aluminum Anchor Caps.
3. Support labor and equipment, not otherwise provided by the manufacturer, required to complete the work of stressing High Strength Prestressing Rods. Support labor and equipment shall be agreed upon by the Engineer in advance of stressing operations.
4. Required insurance policies, such as California Workmen's Compensation Insurance, not otherwise provided by the High Strength Prestressing Rod vendor.
5. Securing the availability of stressing jack(s) in advance of field operations as directed by the Engineer.

Additional materials, equipment, labor, and services to be paid through CCO 46 will not include:

1. Manufacturer's technical representative or stressing services requested by the Contractor.
2. Transportation and accommodations for Manufacturer's representatives.
3. Jacks and support equipment provided by the manufacturer.
4. Shipping for jacks and support equipment provided by the manufacturer.
5. Variances in the GBP/USD exchange rate, except the actual exchange rate will be applied to payments made for additional materials, equipment, labor, and services ordered pursuant to CCO 46.

Payments authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $150,000.00

Estimated Cost: **Increase** ☑ **Decrease** ☐ **$150,000.00**

CCO DESCRIPTION:
Additional Macalloy Bars

PROJECT DESCRIPTION:
CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**30** Day(s)	**1** %	**0**

THIS CHANGE ORDER PROVIDES FOR:

New and unforeseen materials, equipment, labor and services related to Contract Item 36, High Strength Prestressing Rod (75MM), which were not otherwise provided for in the contract Special Provisions. The plans and specifications required the installation of 304-each high strength prestressing rods, which were to be manufactured and supplied by Macalloy Limited, of the UK, the only known source that could meet the requirements for the contract. The Department entered into a sole source agreement with Macalloy prior to bid opening. This CCO provides for rectifying several inconsistencies between the sole source agreement and the contract special provisions, and provides for payment for extra high strength bars ordered by the Engineer. Specific changes include the following:

1) The contractor was directed by the Engineer, to provide an additional 28-each High Strength Prestressing Rod assemblies, including Denso tape coating and transportation to the job site. These rods were ordered to reduce the risk of project schedule delays.

   During initial tensile testing of the planned rods, one lot of rods failed the required minimum test criteria resulting in 54-each rod assemblies being rejected. The supplier then proceeded with re-fabrication of additional lots of bars to replace the 54 rejected bars. Failure of any of the replacement lots would have resulted in a delay of several months to the schedule since the testing facility, an educational institution in Germany, was scheduled to be shut down for the summer.

   The Resident Engineer ordered the additional bars as extra for backup to avoid schedule delays in the event of further failures, or if the planned bars become lost or damaged prior to installation for any reason whatsoever. Toll Bridge Program management has advocated such schedule risk reduction measures.

   Two of the 28 additional bars ordered were utilized for destructive tensile testing. The two destroyed bars are considered included in the price of the remaining 26 bars to be purchased and shipped.

2) A total of 304 anchor caps are required to protect the stressing nuts and ends of the High Strength Prestressing Rods. However, the contract Special Provisions did not indicate the caps were required, and the caps were not included in the price quoted from Macalloy to Caltrans for rod assemblies. Since the specifications did not include any material properties for the caps nor reference the caps, the Contractor is entitled for payment of these caps and will be compensated as extra work at force account.

3) The Special Provisions indicate a price of $700/day as the manufacturer's charge for stressing the prestressing rods, including all necessary labor and equipment. However, in the agreement between Caltrans and Macalloy, the $700/day only included the technician and the jack, and not necessary support equipment such as furnishing compressed air, lifting equipment, and support labor. Therefore, the Contractor is entitled for payment of the additional support equipment and labor, as agreed upon by the Engineer, and will be paid as extra work at force account.

ADA Notice: For individuals with sensory disabilities, this document is available in alternate formats. For information call: (916) 654-6410 or TDD (916) 654-3880 or write Records and Forms Management, 1120 N Street, MS-89, Sacramento, CA 95814.

4) The sole source agreement between Macalloy and Caltrans specifically excluded required local insurance policies, such as California Workmen's Compensation Insurance. However, the Special Provisions did not indicate such insurance for manufacturer's representative was excluded from the prices quoted by Macalloy. Therefore, the Contractor is entitled for reimbursement of such insurance and will be paid for as extra work at force account.

5) As part of the agreement with Macalloy, jacks are to be provided to tension the high strength prestressing rods. Because the jacks are designed to fit the unique threads of the Macalloy rods and fit into the confined space, jacks are not readily available from any other suppliers. The rods are scheduled to be installed late in 2007; however, the rods are not scheduled to be stressed with the jacks until 2010, during installation of the Hinge K pipe beam. To assure the availability of jacks when needed in 2010, and avoid potential project schedule delays, the Engineer may order the delivering of the jacks sometime in advance of the need in 2010. If ordered to do so, the Contractor is entitled for reimbursement of the jacks that are to be rented, leased, or purchased with a buyback provisions as agreed upon with Macalloy, and the cost of securing the jacks early will be paid for at force account.

Payment for this work will be at Extra Work at Force Account for an estimated cost of $150,000.00, which can be financed from the contingency fund. A detail of the costs will be placed in the project files.

No adjustment of contract time is warranted, as this change does not affect the controlling operation.

Maintenance concurrence is not required for this change order.

This change order received an Issue and Approve from Division of Construction on Oct. 26, 2007.

CCO No. 046 **Sup. No.** 0 **Rev. No.** 0

Per Your Submittal Dated: 10/26/2007 **CCO Category Code:** C - H - S - A

PROVIDES FOR RESOLVING DIFFERENCES BETWEEN THE CONTRACT SPECIAL PROVISION REQUIREMENTS AND THE SOLE SOURCE AGREEMENT CONCERNING THE HIGH STRENGTH PRESTRESSING RODS (75 MM) SUPPLIED BY MACALLOY LIMITED. ALSO PROVIDES FOR RISK MITIGATION IN THE FORM OF SUPPLY OF 28 ADDITIONAL ASSEMBLIES TO MINIMIZE POTENTIAL PROJECT SCHEDULE DELAYS. IN ADDITION, REQUIRES ANCHOR CAPS TO PROTECT THE RODS AND PROVIDES FOR ADDITIONAL JACKING COSTS.

ISSUE AND APPROVE IS CONDITIONAL ON THE FOLLOWING:

1. OBTAINING THE PROJECT ENGINEER'S SIGNATURE ON THE SPECIFICATION CHANGE AND SO NOTING ON THE CCO MEMO.

2. RESOLVING THE DIFFERENCE BETWEEN THE NUMBER OF ADDITIONAL RODS LISTED IN THE CCO (26) AND MEMO (28).

THE TOTAL COST FOR THIS CHANGE IS SHOWN AS $150,000.00 WITH NO TIME ADJUSTMENT.

Items:	$0.00
Force Account:	$150,000.00
Agreed Price:	$0.00
Adj. of Comp.	$0.00
Total:	**$150,000.00**

4) The sole source agreement between Macalloy and Caltrans specifically excluded required local insurance policies, such as California Workmen's Compensation Insurance. However, the Special Provisions did not indicate such insurance for manufacturer's representative was excluded from the prices quoted by Macalloy. Therefore, the cost of such insurance is considered extra work and will be compensated for accordingly.

5) As part of the agreement with Macalloy, jacks are to be provided to tension the high strength prestressing rods. Because the jacks are designed to fit the unique threads of the Macalloy rods and fit into the confined space, jacks are not readily available from any other suppliers. The rods are scheduled to be installed late in 2007; however, the rods are not scheduled to be stressed with the jacks until 2010, during installation of the Hinge K pipe beam. To assure the availability of jacks when needed in 2010, and avoid potential project schedule delays, the Engineer may order the delivering of the jacks sometime in advance of the need in 2010. If so, the jacks will be rented, leased, or purchased with a buyback provisions as agreed upon with Macalloy, and the cost of securing the jacks early will be paid for at force account.

Payment for this work will be at Extra Work at Force Account for an estimated cost of $150,000.00, which can be financed from the contingency fund. A detailed cost analysis is on file.

No adjustment of contract time is warranted, as this change does not affect the controlling operation.

Design and Maintenance concurrences are not required for this change order.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 46	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Provide additional materials, equipment, labor and services for Item 36, High Strength Prestressing Rod (75MM), which are not otherwise provided for in the plans and Special Provisions, as directed by the Engineer. Additional materials, equipment, labor, and services will include, but will not be limited to:

1. An additional 26-each High Strength Prestressing Rod assemblies, including Denso tape coating and transportation to the job site.
2. 304-each Aluminum Anchor Caps.
3. Support labor and equipment, not otherwise provided by the manufacturer, required to complete the work of stressing High Strength Prestressing Rods. Support labor and equipment shall be agreed upon by the Engineer in advance of stressing operations.
4. Required insurance policies, such as California Workmen's Compensation Insurance, not otherwise provided by the High Strength Prestressing Rod vendor.
5. Securing the availability of stressing jack(s) in advance of field operations as directed by the Engineer.

Additional materials, equipment, labor, and services to be paid through CCO 46 will not include:

1. Manufacturer's technical representative or stressing services requested by the Contractor.
2. Transportation and accommodations for Manufacturer's representatives.
3. Jacks and support equipment provided by the manufacturer.
4. Shipping for jacks and support equipment provided by the manufacturer.
5. Variances in the GBP/USD exchange rate, except the actual exchange rate will be applied to payments made for additional materials, equipment, labor, and services ordered pursuant to CCO 46.

Payments authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $150,000.00

Estimated Cost: **Increase** ☑ **Decrease** ☐ **$150,000.00**

THIS CHANGE ORDER PROVIDES FOR:

Providing additional funds for material, equipment, labor and services for Item 36, High Strength Prestressing Rod (75 mm) as specified in CCO 46 Supplement 0.

Additional force account will be issued to cover the remainder of the expected cost for the high strength prestressing rods.

This work will be paid as extra work at force account and the Department estimates it to total $45,000.00, which can be financed from the contingency fund. A detailed cost analysis is on file. The cumulative total of CCO 46S0 and CCO 46S1 is $195,000.00, which can be financed from the contingency fund.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Brian Boal (Supervising BE) and Wenyi Long (Design Oversight).

Modify the Tower Steel Structure as follows:

The following revised plan sheet details the changes addressed in this change order: 575R1 (of 1204) as shown on sheet 3 of this change order.

This change order resolves the costs associated with Contractor Request For Information (RFI) numbers 761, 935R0, 935R1, 935R2, 935R3, 935R4, 1186, 1614, and 2169 with respect to changes listed below.

Adjustment of Compensation at Lump Sum:

ITEM 1.

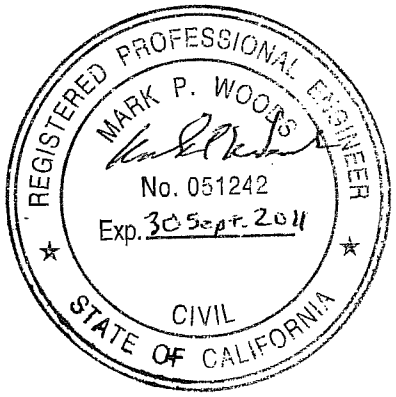
Provide polytetrafluoro-ethylene (PTFE) film at the interface between the seal angles and the top and bottom Tower façade plates. Bolts at the PTFE connections are to be snug-tight.

Adjustment of Compensation at Lump Sum.....$531,137.00

ITEM 2.

In Special Provisions Section 10-1.59 "STEEL STRUCTURES," subsection "FABRICATION," subsection "Bolted Connections," add bullet "Q" as follows:

"Q. At the option of the Contractor, "Extra Thick" style washers may be used in lieu of standard thickness "Circular" style washers. "Extra Thick" style washers shall conform to all the requirements of ASTM F 436M, except the thickness shall be accordance with ASTM F 436."



Adjustment of Compensation at Lump Sum.....$0.00

COST: **$531,137.00** INCREASE ☑ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☑ YES ☐ NO
SUPPLEMENTAL FUNDS PROVIDED: **$0.00**	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Tower Strut Façade	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**227** Day(s)	**9** %	**6**

THIS CHANGE ORDER PROVIDES FOR:

Providing polytetrafluoro-ethylene (PTFE) film at the interface between the seal angles and the top and bottom Tower façade plates. Installing bolts at the PTFE connections that are snug-tight.

In Special Provisions Section 10-1.59 "STEEL STRUCTURES," subsection "FABRICATION," subsection "Bolted Connections," add bullet "Q" as follows:

"Q. At the option of the Contractor, Extra Thick style washers may be used in lieu of standard thickness Circular style washers. Extra Thick style washers shall conform to all the requirements of ASTM F 436M, except the thickness shall be accordance with ASTM F 436."

The Designer's original intent was to have PTFE at the Tower façade plates, but it was not reflected in the Contract documents. Since the F436M specifications do not provide a metric dimension for "double thick"washers, Special Provisions is revised to address this issue.

This change order resolves the costs associated with Contractor Request For Information (RFI) numbers 761, 935R0, 935R1, 935R2, 935R3, 935R4, 1186, 1614, and 2169 with respect to changes listed above.

The total cost of this change order is $531,137.00, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted as this change order does not affect the controlling operation.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Supervising Bridge Engineer), Peter siegenthaler (Principal TE), Ken Terpstra (Project Manager), Wenyi Long (Design Oversight), Bill Zanetich (Structure Maintenance) and Rich Foley (HQ Oversight).

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 48 **Suppl. No. 1** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

Trim the polytetrafluoro-ethylene (PTFE) film on the Tower Façades where it extends beyond the angles and tabs. Cut back PTFE flush with the edge of the tab or angle and remove necessary adhesive so that the caulk and paint can adhere to a clean surface.

Cleaning of the surfaces where the PTFE is removed shall be performed in accordance with Special Provisions Section 10-1.69 "Clean and Paint Structural Steel."

For this work, the Contractor will receive a lump sum price of $40,680.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Adjustment of Compensation at Lump Sum.....$40,680.00

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO 49	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Provide transportation and transportation related expenses for the Engineer in the vicinity of Shanghai, China, and at fabrication facilities as directed by the Engineer. Transportation shall include, but not be limited to, the following:

1. Shuttle and other transportation services to/from the Engineer's assembly point and the port facility or fabrication facilities located in and around Shanghai, China.
2. Transportation services and expenses at fabricator's facilities.
3. Supplemental accommodations required due to the lack of available transportation, until such time transportation becomes available as deemed necessary by the Engineer.
4. Applicable insurance and incidentals related to transportation services ordered by this change order.

Transportation and transportation expenses shall be provided for official use only by the State of California and its officials and agents in connection with execution of Contract 04-0120F4.

Labor, equipment and material authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $200,000.00

Estimated Cost: Increase ☑ Decrease ☐ **$200,000.00**

By reason of this order the time of completion will be adjusted as follows: 0 days

THIS CHANGE ORDER PROVIDES FOR:

Providing transportation and other transportation related expenses for the Engineer in the vicinity of Shanghai, China, and at fabricator facilities as directed by the Engineer.

The contract provides for transportation for the Engineer at the project site, but not at overseas fabrication facilities where a major portion of the work is being performed. The Engineer requires transportation to/from assembly points near accommodations and within the fabrication facilities to inspect the material to be used on this project. Direct public transportation is not available to fabrication facilities and Department staff are not permitted to drive themselves while working in China. The most effective and efficient method to transport the Engineer's staff is by hired shuttle bus, with arrangements and schedules to be agreed upon in advance. It is anticipated this transportation will be required for the next three years during fabrication processes.

This work is not covered by any contract items. Therefore, payment for this work will be at Extra Work at Force Account for an estimated cost of $200,000.00. Supplemental funds in the amount of $215,200.00 have been allotted for "Additional Transportation for the Engineer".

No time adjustment is warranted, as this change order does not affect the controlling operation.

Design and Maintenance concurrence is not needed for this change order since this change is addressed in the supplemental funds.

The change order was approved by the Resident Engineer on 9/10/2007.

CONTRACT CHANGE ORDER MEMORANDUM

TO: Mike Forner, Prin. TE / Gary Pursell, P.E., Sup T.E.	FILE: E.A. 04 - 0120F4
FROM: Gary Pursell, P.E., Sup.T.E.	CO-RTE-PM SF-80-13.2/13.9
	FED. NO.
CCO#: 49 SUPPLEMENT#: 1 Category Code: CXXX	CONTINGENCY BALANCE (incl. this change) $124,150,513.40
COST: $500,000.00 INCREASE ☑ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☑ YES ☐ NO
SUPPLEMENTAL FUNDS PROVIDED: $15,200.00	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Provide Additional Funds	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	0 Day(s)	30 Day(s)	1 %	2

THIS CHANGE ORDER PROVIDES FOR:

Providing additional funds for transportation and other related facility support for the Engineer at fabrication facilities. This change also provides funds to furnish boat, boat operator and crew for after hours and other transportation related expenses as directed by the Engineer.

The contract does not provide for transportation and other related field office support for Department personnel at overseas fabrication facilities. The Department's staff requires transportation to/from assembly points near accommodations and within the fabrication facilities to inspect the material to be used on this project. This is required as public transportation is not available to the fabrication facility and the Department's staff is not permitted to drive themselves while working in China. The most effective and efficient method to transport the Engineer's staff is by dedicated shuttle bus, which will be paid at Extra Work at Force Account. Remote fabrication facilities provide facility support in order for Department personnel to perform there required duties. No other resources are available at these remote locations to provide this required facility support. Additional after hours Pier 7 boat service is also included in this change order to furnish boat, boat operator and crew as required under Special Provisions section 10-1.12, Transportation for the Engineer.

This work is not covered by any contract items. Therefore, payment for this work will be at Extra Work at Force Account for an estimated cost of $500,000.00 (Cumulative total of CCO 49 and this supplement is $700,000.00). A total of $215,200.00 is available from the supplemental funds for this work, the remaining balance of $484,800.00 will be financed from the contingency fund.

This cost increase is due to the unanticipated use of an additional shuttle bus for the Engineers in Shanghai, higher bus rates than initially estimated and additional insurance. Copies of the estimate are in the project files.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order received concurrence from Gary Pursell (R.E.), Richard Morrow (Struct. Rep.), Peter Siegenthaler (Principal T.E.), Ken Terpstra (Project Manager), Patrick Treacy (HQ Rep), and Tony Anziano (TB Manager). Design and Maintenance concurrence is not needed for this change order.

The Resident Engineer requests approval of this Change Order.

2490 Day(s)	**0**	**150** Day(s)	**6** %	**6**

THIS CHANGE ORDER PROVIDES FOR:

Supplementing CCO 49 with additional funds. This change order provides transportation and other related field office support for Department personnel at overseas fabrication facilities. After hours Pier 7 boat service is also provided by this change order to furnish boats, boat operators, and crews as required under Special Provisions section 10-1.12, Transportation for the Engineer.

Additional funds are needed for transportation and related field office support at oversees fabrication facilities due to the extended duration of fabrication. Recent events at the project site, which include supporting the SFOBB Labor-Day shutdown and emergency repair work, have also impacted the change order funds beyond the amount originally estimated. This supplement will provide additional funds to support extended overseas fabrication and replenish funds utilized to support additional unanticipated work at the project site.

This work is not covered by any contract items, therefore, payment for this work will be at Extra Work at Force Account for an estimated cost of $500,000.00 (Cumulative total of CCO 49 and this supplement is $1,200,000.00). A total of $215,200.00 is available from the supplemental funds for this work, with the remaining balance of $984,200.00 to be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order received concurrence from Gary Pursell (R.E.), Richard Morrow (Struct. Rep.), Peter Siegenthaler (Principal T.E.), Ken Terpstra (Project Manager), Rich Foley (HQ Rep), and Tony Anziano (TB Manager). Design and Maintenance concurrence is not needed for this change order.

This change order received Headquarter I&A on November 3, 2009, in the amount of $800,000.00 (Cumulative I&A total of CCO 49 is $1,300,000.00). . This change order does not require TBPOC approval since the cumulative amount is less than $1 Million in excess of the $215,200.00 allotted in supplemental funds.

CCO: 50 Suppl. No. 0 Contract No. 04 – 0120F4 Road SF-80-13.2/13.9 FED. AID LOC.:

To: AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Provide additional reinforcement to the shear plates at Hinge A as shown on sheets three (3) through six (6) of this change order.

The following revised sheets detail all changes:

Revised Contract Plan Sheet Nos. 631R1, 633R1, 675R1 and 697R1 (of 1204).

Estimate of Increase in Contract Items at Contract Unit Price:

Item #55 (F), FURNISH STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)

6,081 kg (+ 0.02 %) @ $9.00 /kg = +$54,729.00 (+ 0.65 %)

Item #56 (F), ERECT STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)

6,081 kg (+ 0.02 %) @ $1.00 /kg = +$6,081.00 (+ 0.65 %)

The quantity increase shown herein for Item #55, FURNISH STRUCTURAL STEEL (BRIDGE) (BOX GIRDER), when combined with the quantity shown in the Engineer's Estimate, and as modified by any previous change orders or revisions to dimensions made by the Engineer, shall be the final quantity for which payment will be made.

The quantity increase shown herein for Item #56, ERECT STRUCTURAL STEEL (BRIDGE) (BOX GIRDER), when combined with the quantity shown in the Engineer's Estimate, and as modified by any previous change orders or revisions to dimensions made by the Engineer, shall be the final quantity for which payment will be made.

Estimated total cost of Increase in Contract Item..... $60,810.00

Adjustment of Compensation at Agreed Lump Sum:

Perform additional detailing, painting and Engineering work required for this change.

For this work, the Contractor will receive a sum of $15,356.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools, Chinese Value Added Taxes (VAT) and incidentals including all markups by reason of this change.

Estimated cost of Adjustment of Compensation at Lump Sum $15,356.00

CCO: 50 Suppl. No. 0 Contract No. 04 – 0120F4 Road SF-80-13.2/13.9 FED. AID LOC.:

Consideration of a time adjustment will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

Estimated Total Cost of this Change Order..... $76,166.00

Estimated Cost: Increase ☒ Decrease ☐ **$76,166.00**

By reason of this order the time of completion will be adjusted as follows: Deferred

CONTRACT CHANGE ORDER MEMORANDUM

DATE: 6/8/2009

TO: Pete Siegenthaler, Prin. TE / Gary Pursell, P.E., Sup T.E.	FILE: E.A. 04 - 0120F4
FROM: Gary Pursell, Sup.TE	CO-RTE-PM SF-80-13.2/13.9
	FED. NO.
CCO#: 50 SUPPLEMENT#: 0 Category Code: CHPT	CONTINGENCY BALANCE (incl. this change) $67,005,863.40
COST: $76,166.00 INCREASE ☑ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☐ YES ☑ NO
SUPPLEMENTAL FUNDS PROVIDED: $15,356.00	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO

CCO DESCRIPTION:
Hinge A Reaction - Shear Plates

PROJECT DESCRIPTION:
CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time	Time Adj. This Change:	Previously Approved CCO Time Adjustments	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	DEF Day(s)	30 Day(s)	1 %	7

THIS CHANGE ORDER PROVIDES FOR:

Installing additional reinforcement to the shear plates at Hinge A.

The Skyway Hinge A reaction force transfer to the SAS was determined to be higher than the force shown in the contract plans. The Department's Design Oversight and Designer of Record agree that it is prudent risk management to provide additional reinforcement to the shear plates at Hinge A.

The increase of contract items at contract unit prices results in a net increase of $60,810.00.

For the changes in character of work related to additional detailing, engineering and painting the structural steel beyond contract item work, the Contractor will receive a lump sum payment of $15,356.00.

The total cost of this change order is $76,166.00, which can be financed from the contingency funds. A total of $2,152,000.00 for Geometry Control (Hinge A and K Reactions) of Supplemental Funds is allotted for this work. Although Cadb does not allow the use of Supplemental Funds to finance increases in contract item work the needed funds will be transferred manually for this work. A cost analysis is in the project files.

Adjustment of contract time is deferred pending completion of the work specified in this change as it may affect the controlling operation.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Ken Terpstra (Project Manager), Pete Siegenthaler (Principal TE), Marwan Nader (Design of Record), Reza Valizadeh (Ct Oversight), Bill Zanetich (CT Struct. Maintenance) and Rob Kobal (HQ).

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 51	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Provide payment for Department travel expenses in Shanghai, China, as directed by the Engineer.

Payments authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $50,000.00

Estimated Cost: **Increase** ☑ **Decrease** ☐ **$50,000.00**

By reason of this order the time of completion will be adjusted as follows: 0 days

CCO DESCRIPTION: Travel in China	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**30** Day(s)	**1** %	**0**

THIS CHANGE ORDER PROVIDES FOR:

Payment of travel expenses in Shanghai, China, as directed by the Engineer.

Department project staff have been assigned to Shanghai, China, to oversee structural steel fabrication efforts for the tower, box girders and cable. The Department has entered into a lease agreement with the Marriott Hotel in Shanghai to provide office facilities and accommodations for said staff.

Due to the lack of an approved State budget, the Departmental is unable to make lease payments directly and, as a result, the Marriott has indicated they will attach employee's personal credit cards, or could evict the employees from the accommodations, resulting in the employees returning stateside.

Steel fabrication has been identified as the highest risk to the project budget and schedule. It is crucial that key oversight staff remain at the fabrication shops to facilitate timely resolution of issues, thus avoiding unnecessary project delays and costs.

This change order will provide for payment of travel expenses, through the Contractor, until such time the State budget is passed. Payments made by the Contractor, at the direction of the Engineer, will be reimbursed as Extra Work at Force Account. The estimated cost is $50,000.00, which can be financed from the contingency fund. The approved project construction allocation includes $5,380,000 for Out of State Travel Expenses.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This CCO was requested by Toll Bridge Program management. Design and Maintenance concurrence is not required for this change order since this change is addressed in the supplemental funds.

CCO DESCRIPTION:
Remove Concrete Pier W2 Top Slab

PROJECT DESCRIPTION:
CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**30** Day(s)	**1** %	**0**

THIS CHANGE ORDER PROVIDES FOR:

Removing existing concrete along the top slab of Pier W2 as directed by the Engineer.

Field observations have shown that the concrete at the top of the W2W and W2E columns was poured higher than what is shown in the contract plans. The excess concrete shall be removed to a grade that will allow the form work for the cap beam to be set at the correct elevation.

Payment for this work will be at Extra Work at Force Account for an estimated cost of $50,000.00, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order received concurrences from the Project Manager and Construction Management. Maintenance and Design concurrences are not required for this change.

The Resident Engineer, a Supervisory T.E., gave the Contractor an Authority to Proceed to perform this work on November 9, 2007. A copy of this letter is in the project files.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 52	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Remove existing concrete along the top slab of Pier W2 as directed by the Engineer.

Labor, equipment and material authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $50,000.00

Estimated Cost: Increase ☑ Decrease ☐ **$50,000.00**

By reason of this order the time of completion will be adjusted as follows: 0 days

THIS CHANGE ORDER PROVIDES FOR:

Removing existing concrete along the top slab of Pier W2 as directed by the Engineer.

Field observations have shown that the concrete at the top of the W2W and W2E columns was poured higher than what is shown in the contract plans. The excess concrete shall be removed to a grade that will allow the form work for the cap beam to be set at the correct elevation.

Payment for this work will be at Extra Work at Force Account for an estimated cost of $50,000.00, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order received concurrences from the Project Manager and Construction Management. Maintenance and Design concurrences are not required for this change.

The Resident Engineer, a Supervisory T.E., gave the Contractor an Authority to Proceed to perform this work on November 9, 2007. A copy of this letter is in the project files.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 53 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum Price:

Revise Special Provisions, Section 10-1.59, "STEEL STRUCTURES," subsection "FIELD WELDING," Item "E" as follows:

From: E. The final external weld surface shall be ground smooth and flush. The direction of final grinding marks shall be parallel to the axis of the tower or bridge.

To: E. The final external weld surface shall be ground smooth and flush. The direction of final grinding marks, where surface roughness exceeds 3μm (microns), shall be parallel to the axis of the tower or transverse to the bridge deck.

For this work, the contractor will be paid the sum of $0.00. This lump sum price constitutes full compensation, including markups, for this change.

Extra Work at Agreed Lump Sum Price:

Perform additional grinding pursuant to the Engineer's direction up through September 24, 2008.

For this work, the contractor will be paid the sum of $7,860.00. This lump sum price constitutes full compensation, including markups, for this change.

Cost of Extra Work at Lump Sum Price.....$7,860.00

This change order resolves Contractor Request for Information (RFI) Nos. 153, 153R1, 199, 199R1, 1481 and Contractor Request for Change Order (RFCO) No. 30 with respect to the changes relative to this change order.

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$7,860.00**

$7,860.00 INCREASE ☒ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? YES ☒ NO ☐
SUPPLEMENTAL FUNDS PROVIDED $	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? YES ☒ NO ☐
CCO DESCRIPTION: Grind OBG Deck Plates	**PROJECT DESCRIPTION** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time	Time Adj.: This Change	Previously Approved CCO Time Adjustments	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**227** Day(s)	**9** %	**6**

THIS CHANGE ORDER PROVIDES FOR:

Performing additional grinding on the OBG deck plate welds pursuant to the Engineer's direction up through September 24, 2008 and Revising Special Provisions, Section 10-1.59, "STEEL STRUCTURES," subsection "FIELD WELDING," Item "E."

Additional grinding on the OBG deck plate welds was performed, on a trial basis, to determine grinding requirements needed for adequate fatigue performance over the 150-year design life of the bridge. It was determined by the Engineer of Record that Special Provisions be revised and also to clarify the direction of allowable bridge deck grinding marks. It was also determined by the Engineer of Record that the previously large amount of extra grinding work, that received an ATP, is no longer required. Therefore, the original scope of extra work was significantly reduced by performing the trial grinding only.

This change order resolves Contractor Request for Information (RFI) Nos. 153, 153R1, 199, 199R1, 1481 and Contractor Request for Change Order (RFCO) No. 30 with respect to the changes relative to this change order.

This work is not covered by any contract items. Therefore, payment for the Extra Work will be a Lump Sum of $7,860.00, which can be financed from the contingency fund. A detailed cost analysis is on file.
No adjustment of contract time is warranted, as this change does not affect the controlling operation.

This change order received concurrences from Gary Pursell (Resident Engineer), Rick Morrow (Structure Rep.), Pete Siegenthaler (Principal Engineer), Brian Maroney (Project Engineer), Marwan Nader (Designer of Record), Rich Foley (HQ Liaison) and Ken Terpstra (Project Manager).

This Change Order received an Authority To Proceed (ATP) from Headquarter Construction on 8/4/2008. The Resident Engineer requests an Issue and Approve (I&A) from Headquarter Construction for this change.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 54	Suppl. No. 0	Contract No. 04 - 0120F4	Road SF-80-13.2/13.9	FED. AID LOC.:

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Remove and dispose of additional buried man-made objects as directed by the Engineer. All work shall be performed in accordance with the contract documentation.

Payments for Extra Work at Force Account authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Consideration of a time adjustment regarding Extra Work at Force Account will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

Estimated cost of Extra Work at Force Account $100,000.00

Extra Work at Lump Sum:

Remove and dispose of buried concrete object, referenced in ABF-CAL-LTR-000316, located on Yerba Buena Island at Pier W2. This work shall be in accordance with Section 19-1.04, "Removal and Disposal of Buried Man-Made Objects," of the Standard Specifications.

For this work, the contractor will be paid the sum of $26,024.00. This sum constitutes full compensation, including markups, for this change.

It has been determined in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)," of the Special Provisions that no adjustment of time is warranted for this work.

Estimated cost of Extra Work at Lump Sum $26,024.00

Estimated Cost: **Increase** ☑ **Decrease** ☐ **$126,024.00**

By reason of this order the time of completion will be adjusted as follows: Deferred

THIS CHANGE ORDER PROVIDES FOR:

Removing and disposing of buried man-made objects not shown in the contract documentation in accordance with Section 19-1.04, "Removal and Disposal of Buried Man-Made Objects," of the Standard Specifications and as directed by the Engineer.

This change order shall reimburse the Contractor for unanticipated removal and disposal of buried man-made objects in conflict with construction activities around Yerba Buena Island (YBI) and the San Francisco Bay. All work associated with this change shall be done in accordance with project permits and documents.

Payment for removing and disposal of a buried man-made object along W2 will be paid for as Extra Work at Lump Sum Price for a cost of $26,024.00 which can be financed from the contingency fund.

To remove and dispose of additional work outside of the W2 area, the Contractor will be paid for at Extra Work at Force Account at an estimated amount of $100,000.00, which can be financed from the contingency fund.

A detailed account of the costs shall be placed in the project files.

Adjustment of contract time is deferred pending completion of the work specified in this change as it may affect the controlling operation.

Design and Maintenance concurrence is not required for this change.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 54 **Suppl. No. 1** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Extra Work at Force Account:

Provide additional funds to remove and dispose of additional buried man-made objects as directed by the Engineer. All work shall be performed in accordance with the contract documentation.

Payments for Extra Work at Force Account authorized by the Engineer, as necessary, will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Consideration of a time adjustment will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

Estimated cost of Extra Work at Force Account $400,000.00

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$400,000.00**

By reason of this order the time of completion will be adjusted as follows: **Deferred**

Submitted by

Signature N. L **Resident Engineer** William Shedd for Gary Pursell, SupTE **Date** 10-8-09

Approval Recommended by

Signature Gary Pursell **Supervising Bridge Engineer** Gary Pursell for Richard Morrow, SupTE **Date** 10/8/09

Engineer Approval by

Signature Gary Pursell **Supervising Transportation Engineer** Peter Siegenthaler, PrinTE **Date** 10/14/09

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature (NOT REQUIRED) (Print name and title) **Date**

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 55 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

ITEM 1.

- Modify service platforms including, but not limited to, electrical components, conduit routing and types, wireways, pipe sleeves, bolting connections, grating, handrail post base plates, electrical panel supports, and guardrails and pull box supports.
- Waive the galvanizing requirement for service platform framing members below the walkway grating.
- New steel and welds on electrical panel and cable tray supports inside the crossbeams at the service platforms shall be cleaned, primed, and finish painted in accordance with Special Provisions Section 10-1.69 "CLEAN AND PAINT STRUCTURAL STEEL."

Revise Special Provisions Section 10-3.17 "ELECTRICAL EQUIPMENT," as shown on sheets 3 through 6 of this change order.

Adjustment of Compensation at Lump Sum.....$832,437.00

Estimate of Increase in Contract Item at Contract Price:

ITEM 2.

- At utility platform locations, increase the size of thickened crossbeam plates for pipe sleeve penetrations

Item No. 55: FURNISH STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
2,393 KG (+0.01%) @ $9.00 /KG =+$ 21,537.00 (+0.01%)

Item No. 56: ERECT STRUCTURAL STEEL (BRIDGE) (BOX GIRDER)
2,393 KG (+0.01%) @ $1.00 /KG =+$ 2,393.00 (+0.01%)

The quantity increases shown herein for Items #55 and 56, when combined with the quantity shown in the Engineer's Estimate, and as modified by any previous change orders or revisions to dimensions made by the Engineer, shall be the final quantity for which payment will be made.

Total Cost for Increase in Contract Item..... $23,930.00

The following revised plan sheets detail the changes addressed in this change order: 72R7, 73R1, 75R4, 75S1, 82R3, 82S1R2, 83R2, 83S1R2, 83S2R2, 83S3R2, 111R1, 113R1, 114R1, 126R1, 127R2, 128R1, 129R1, 130R2, 134R1, 134S1R1, 135R1, 135S1R1, 136R1, 136S1R1, 137R1, 137S1R1, 138R1, 138S1, 139R1, 139S1, 139S2, 139S3, 139S4, 139S5, 142R3, 166R2, 166S1, 166S2, 167R2, 168R2, 169R2, 170R2, 176S1R1, 176S2R1, 199R1, 200R3, 201R1, 202R1, 203R2, 204R1, 205R1, 206R1, 212R3, 232S1R1, 232S2R1, 271S5, 308R1, 361R4, 362R3, 363R3, 373R3, 374R3, 375R3, 386R2, 387R2, 388R2, 389R2, 393R3, 394R2, 395R2, 396R3, 403R2, 407S5, 407S6, 407S7, 407S8, 407S9, 407S10, 407S11, 407S12, 407S13, 407S14, 407S15, and 660R2 (of 1204) as shown on sheets 7 through 90 of this change order.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 317R0, 317R1, 317R2, 317R3, 451R0, 451R1, 583, 729, 834R0, 834R1, 1136, 1225, 1554, 1670, 1901R0, 1901R1, and 2036 with respect to changes listed above.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 55 **Suppl. No.** 0 **Contract No.** 04 – 0120F4 **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation at Lump Sum	$832,437.00
(ITEM 2) Increase in Contract Items at Contract Prices	$23,930.00
Total net pay for this change order	$856,367.00

This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$856,367.00**

By reason of this order the time of completion will be adjusted as follows: **0 Days**

Submitted by

Signature **Resident Engineer** Kannu Balan, Senior T.E. **Date** 10-7-11

Approval Recommended by

Signature **Supervising Transportation Engineer** William Casey, Sup. T.E. **Date** 10/7/11

Engineer Approval by

CCO DESCRIPTION: Service Platforms Electrical Changes	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Modifying service platforms including electrical components, conduit routing and types, wireways, pipe sleeves, bolting connections, grating, galvanizing and painting, handrail post base plates, electrical panel supports, and guardrails and pull box supports.

Revising Special Provisions Section 10-3.17 "ELECTRICAL EQUIPMENT."

The conduit routing from inside the crossbeam to the service platforms is not constructible due to horizontal offsets and vertical clearances. There are conflicts between the platform framing and the conduit routing from the cable trays to pipe sleeves. Service platform electrical items are modified to accommodate redesigned conduit routing. Panel racks are revised to avoid interference with the stairway from the top of crossbeam to the platform. The crossbeam slope at PP 14 is not 2% as per plan sheet standard detail therefore the support detail needs to be modified to account for a different slope. Additional pipe sleeves are needed for the lighting circuit inside the crossbeam and the ground cable. The handrailing posts are moved to eliminate conflicts with the gusset plates on the service platforms. By allowing bolted connections instead of field welding, the platforms and racks can be partially or completely assembled in the shop in order to avoid field welding access challenges. The Contractor has been unable to find the grating designated in the plan sheets, therefore the Department has approved an equivalent grating.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 317R0, 317R1, 317R2, 317R3, 451R0, 451R1, 583, 729, 834R0, 834R1, 1136, 1225, 1554, 1670, 1901R0, 1901R1, and 2036 with respect to changes listed above.

The total cost of this change order is $832,437.00 lump sum and $23,930.00 increase in contract items for a total of $856,367.00 for this change, which can be financed from the contingency fund. A detailed cost analysis is on file.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order has concurrence from Michael Forner (Principal TE), Ken Terpstra (Project Manager), Rick Morrow (Sup. BE), Robert Kobal (HQ Oversight), Wenyi Long (Bridge Design), Lina Ellis (Maintenance), and Jing Chen (District Design) March 9, 2009.

(A) Utility Panel, UP-104, 100A 208/120 V, 3-phase, 4-wire
- (A1) 480 V Breaker for (A2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (A2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D

(C) Controller Cabinet #TOS-4WA Size: 1625 H X 615 W X 768 D

(L) TOS/COM-4WA Pull Box (PB-2B)

(N) Controller Cabinet #TOS-4WB (Temporary) Size: 1625 H X 615 W X 768 D

Equipment for Eastbound

(D) Utility Panel, UP-204, 100A MLO 208/120 V, 3-phase, 4-wire
- (D1) 480 V Breaker for (D2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (D2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (D3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.

(E) Lighting Panel LP-219, 100A MLO 208/120 V, 3-phase, 4-wire
- (E1) 480 V Breaker for (E2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (E2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (E3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.

(F) Controller Cabinet #TOS-4EA Size: 1625 H X 615 W X 768 D

(M) TOS/COM-4EA Pull Box (PB-2B)

Equipment Common for Westbound/Eastbound

(G) Telephone Terminal Box #TEL-4 (PB-7C)

(H) Communication Terminal Box #COM-4 (PB-7B)

SHEET NOTES:

1. For electrical panel support details, see AS-sheets.
2. 600 V Stainless steel wireway, Nema 4X with cover.
3. Low level Stainless steel wireway, Nema 4X with cover.

NOTES:

1. The contractor shall verify the sizes and mounting dimensions of all rack mounted equipment prior to the fabrication of service platform racks. The contractor shall also verify the wireway mounting dimensions and support locations and make adjustment as needed to suit field condition.
2. Contractor to provide cover plate and sealant to all cabinets with open bottom. Cover plate shall be of the same material. See Sheet E-78B for details.
3. References:
   - For platform 4 conduit, lighting and grounding plan, see sheet E-114.
   - For location of platform 4, see sheet E-46.
   - TOS are shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-361.
   - For schedule of utility panel UP-104, see sheet E-59.
   - For schedule of utility panel UP-204, see sheet E-150.
   - For schedule of lighting panel LP-219, see sheet E-155.
   - For typical panel arrangement details of SCADA communications terminal box, see sheet E-321.
   - For pull box schedule, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For platform elevations, see sheet E-71A.

EQUIPMENT ARRANGEMENT PLAN
SCALE 1:40

WIREWAY PLAN
SCALE 1:40

EQUIPMENT SCHEDULE:

Equipment for Westbound

- (A) Utility Panel, UP-105, 100A 208/120 V, 3-phase, 4-wire
  - (A1) 480 V Breaker for (A2) (Nema 4X) Size: 495 H X 232 W X 124 D
  - (A2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (B) Strong Motion Recorder #2 (Box A) Size: 1900 H X 1620 W X 660 D
- (C) Remote Terminal Unit RTU #10W Size: 1830 H X 940 W X 610 D
- (D) Strong Motion Recorder #2 (Box B) Size: 1900 H X 1620 W X 660 D
- (M) TOS/COM-5WA Pull Box (PB-2B)

Equipment for Eastbound

- (E) Utility Panel, UP-205, 100A MLO 208/120 V, 3-phase, 4-wire
  - (E1) 480 V Breaker for (E2) (Nema 4X) Size: 495 H X 232 W X 124 D
  - (E2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
  - (E3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (F) Lighting Panel LP-220, 100A MLO 208/120 V, 3-phase, 4-wire
  - (F1) 480 V Breaker for (F2) (Nema 4X) Size: 495 H X 232 W X 124 D
  - (F2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
  - (F3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (G) Remote Terminal Unit RTU #10E Size: 1830 H X 940 W X 610 D
- (P) TOS/COM-5EA Pull Box (PB-2B)

Equipment Common for Westbound/Eastbound

- (I) Navigation Relay Cabinet NAP-5 (PB-6C)
- (J) Telephone Terminal Box #TEL-5 (PB-7C)
- (K) Communication Terminal Box COM-5 (PB-7B)

SHEET NOTES:

1. For electrical panel support details, see AS-sheets.
2. 600 V Stainless steel wireway, Nema 4X with cover.
3. Low level Stainless steel wireway, Nema 4X with cover.

NOTES:

1. The contractor shall verify the sizes and mounting dimensions of all rack mounted equipment prior to the fabrication of service platform racks. The contractor shall also verify the wireway mounting dimensions and support locations and make adjustment as needed to suit field condition.
2. Contractor to provide cover plate and sealant to all cabinets with open bottom. Cover plate shall be of the same material. See Sheet E-78B for details.
3. References:
   - For platform 5 conduit, lighting and grounding plan, see sheet E-115.
   - For location of platform 5, see sheet E-47.
   - TOS are shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-361.
   - For schedule of utility panel UP-105, see sheet E-60.
   - For schedule of utility panel UP-205, see sheet E-151.
   - For schedule of lighting panel LP-220, see sheet E-156.
   - For typical panel arrangement details of SCADA communications terminal box, see sheet E-321.
   - For pull box schedule, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For platform elevations, see sheet E-72A.

EQUIPMENT ARRANGEMENT PLAN
SCALE 1:40

WIREWAY PLAN
SCALE 1:40

EQUIPMENT SCHEDULE:

Equipment for Westbound

- (A) Utility Panel, UP-107, 100A 208/120 V, 3-phase, 4-wire
- (A1) Main Breaker for UP-107 (Nema 4X) Size: 495 H X 232 W X 124 D
- (A2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4x) Size: 375 H X 485 W X 311 D
- (C) Controller Cabinet #TOS-7WA Size: 1625 H X 615 W X 768 D
- (L) TOS/COM-7WA Pull Box (PB-2B)

Equipment for Eastbound

- (D) Utility Panel, UP-207, 100A, MLO 208/120 V, 3-phase, 4-wire
- (D1) Main Breaker for (D2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (D2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (D3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (E) Lighting Panel LP-222, 100A MLO 208/120 V, 3-phase, 4-wire
- (E1) Main Breaker for (E2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (E2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (E3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (F) Controller Cabinet #TOS-7EA, Size: 1625 H X 615 W X 768 D
- (M) TOS/COM-7EA Pull Box (PB-2B)

Equipment Common for Westbound/Eastbound

- (G) Telephone Terminal Box #TEL-7 (PB-7C)
- (H) Communication Terminal Box #COM-7 (PB-7B)

SHEET NOTES:

(1) For electrical panel support details, see AS-sheets.

(2) 600 V Stainless steel wireway, Nema 4X with cover.

(3) Low level Stainless steel wireway, Nema 4X with cover.

NOTES:

1. The contractor shall verify the sizes and mounting dimensions of all rack mounted equipment prior to the fabrication of service platform racks. The contractor shall also verify the wireway mounting dimensions and support locations and make adjustment as needed to suit field condition.
2. Contractor to provide cover plate and sealant to all cabinets with open bottom. Cover plate shall be of the same material. See Sheet E-78B for details.
3. References:
   - For platform 7 conduit, lighting and grounding plan, see sheet E-117.
   - For location of platform 7, see sheet E-49.
   - TOS are shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-361.
   - For schedule of utility panel UP-107, see sheet E-62.
   - For schedule of utility panel UP-207, see sheet E-153.
   - For schedule of lighting panel LP-222, see sheet E-157.
   - For typical panel arrangement details of SCADA communications terminal box, see sheet E-321.
   - For pull box schedule, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For platform elevations, see sheet E-74A.

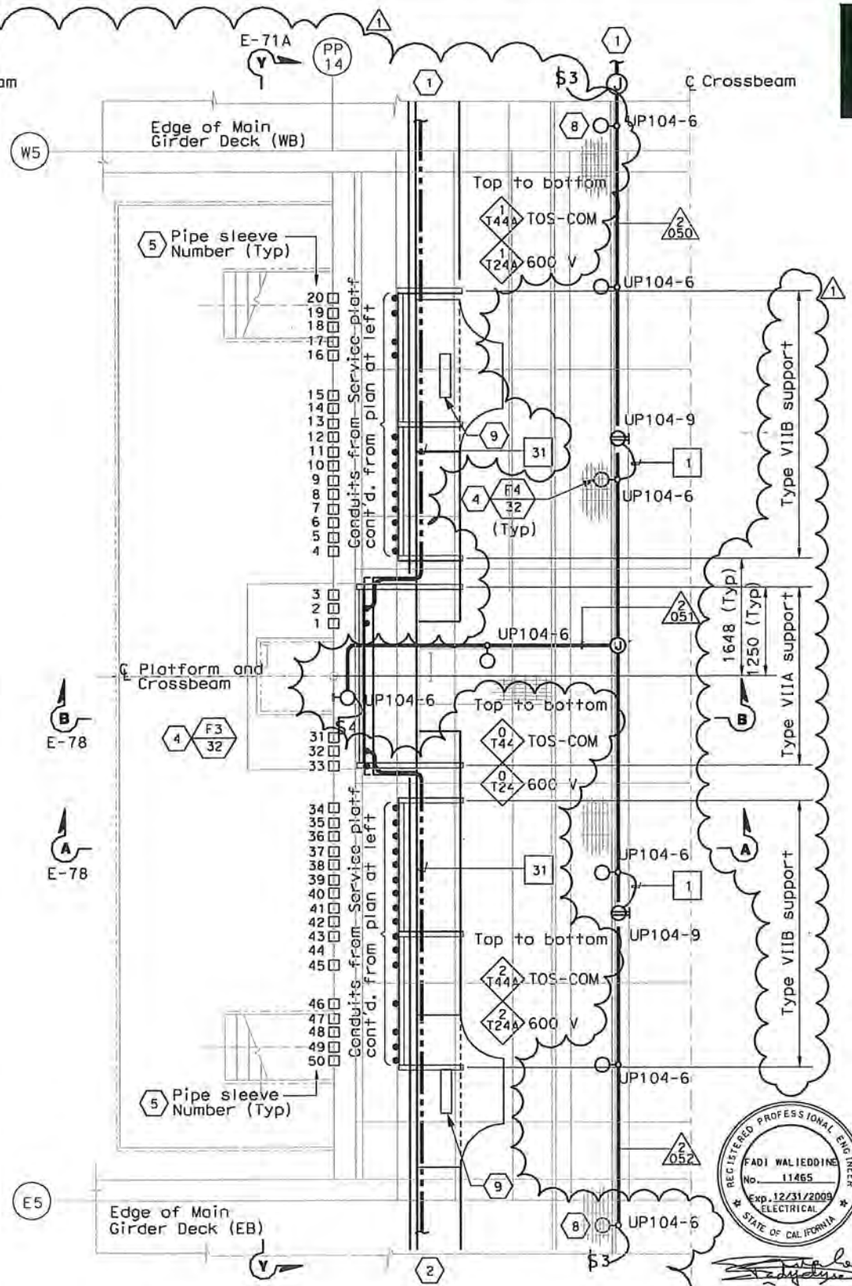
WIREWAY AND CONDUIT PLAN AT SERVICE PLATFORM

SCALE 1:40



CABLE TRAY AND CONDUIT PLAN INSIDE CROSSBEAM

SCALE 1:40

SHEET NOTES:

1. For continuation inside WB girder, see sheets E-96 and E-114A. 1
2. For continuation inside EB girder, see sheet E-184 and E-114A.
3. For typical ground bar installation, see Detail 5 sheet E-78.
4. For typical lighting fixture installation see Details 2 and 3, sheet E-123.
5. Pipe sleeve without conduit going through is spare. Contractor to provide plug or cap at both ends. For location see Section Y-Y on sheet E-71A.
6. TOS-4WB for the temporary mobile CMS. Control cabinet shall remain for future use. U.O.N.
7. For wireway numbers, see sheet E-71.
8. Locate light fixture approximate half way between girder wall and girder walkway.
9. Fiber splice tray, see sheet E-355.
10. Terminate conduits at Terminal Box #TEL-4.
11. Terminate conduits at Terminal Box #COM-4.

NOTES:

1. Reference:
   - For circuit, conduit/cable tray schedules, see sheets starting at E-401.
2. For wireway support details, see AS sheets. 2
3. For location of pipe sleeves at the utility platform crossbeams, see Typical Crossbeam Details sheets. 1
4. For platform elevations, see sheet E-71A.

CABLE TRAY PLAN - DETAIL 4

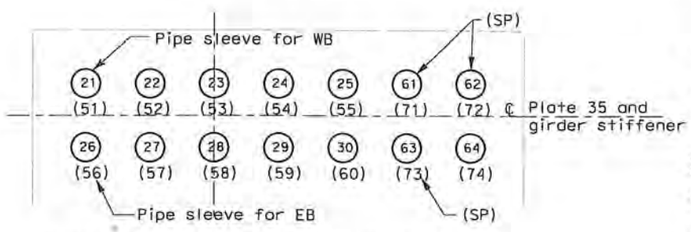
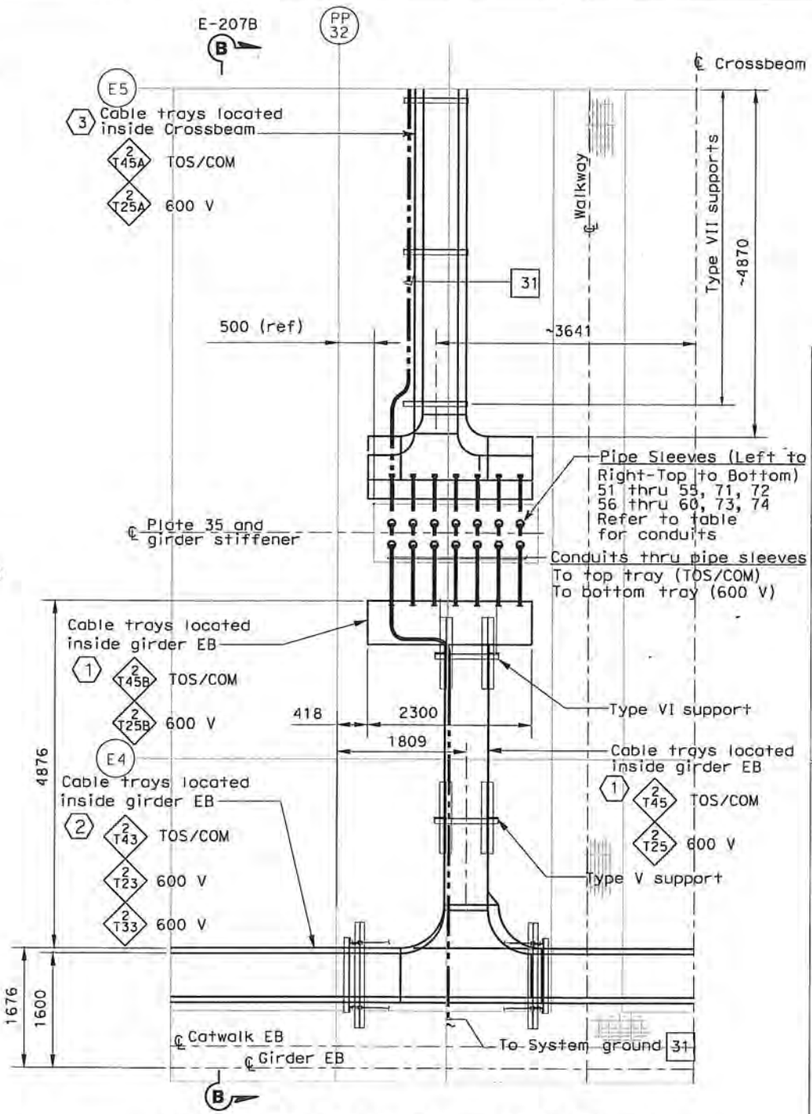
(TYPICAL FOR PP 32, PP 50, PP 80 AND PP 110)
SCALE 1:40



PIPE SLEEVE LOCATION

NO SCALE



CABLE TRAY PLAN - DETAIL 5

(TYPICAL FOR PP 32, PP 50, PP 80 AND PP 110)
SCALE 1:40

NOTES:

1. Reference:
   - For circuit, conduit/cable tray schedules, see sheets starting at E-401.
2. For location of pipe sleeves at the Crossbeam/Service platform, see Typical crossbeam details sheets.
3. For cable tray support details, see AS sheets.
4. (SP) Denotes spare pipe sleeve with conduit. Contractor to provide plug at each ends.

SHEET NOTES:

1. For continuation inside WB girder, -at Crossbeam #4, see sheet E-96.
2. For continuation inside EB girder, -at Crossbeam #4, see sheet E-181.
3. For continuation inside Crossbeam,

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 56 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum:

Provide compensation for additional engineering expenses resulting from inconsistencies on plan Sheet 743 of 1204 of the Contract Plans. The cable suspender forces (Force "F") shown on the Suspender Schedule on Sheet 743 do not correspond with other information shown on the Contract Plans.

This Change Order provides compensation for additional engineering cost only, as indentified in ABF's Request for Change Order No. 16. This Change Order does not resolve associated issues identified in ABF-CAL-LTR-000763, dated December 3, 2008.

For this work, the Contractor will be paid the sum of $109,694.00. This sum constitutes full compensation, including markups, for this change.

Consideration of a time adjustment will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

Cost of Adjustment of Compensation at Lump Sum $109,694.00

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$109,694.00**

By reason of this order the time of completion will be adjusted as follows: **Deferred**

Submitted by

Signature Gary Pursell **Resident Engineer** Gary Pursell, Sup.T.E. **Date** 5/12/09

Approval Recommended by

Signature for **Supervising Bridge Engineer** Richard Morrow, Sup.T.E. **Date** 5/12/09

Engineer Approval by

Signature Gary Pursell **Supervising Transportation Engineer** Gary Pursell, Sup. T.E. **Date** 5/19/09

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

THIS CHANGE ORDER PROVIDES FOR:

Additional Contractor engineering effort for modeling the bridge. This change also addresses engineering cost in Contractor submitted Request for Change Order (RFCO) 16.

The Contractor expended additional resources in an effort to resolve a conflict between Department provided suspender forces and the deck box girder moment diagram during the development of their bridge model. Contract plan sheet 743 provides suspender forces that correspond to the bridge deck box girder moment diagram. When these forces were used in the Contractors model they did not conform to the provided deck moment diagram limits. As a result of this plan sheet conflict the Departments Designer of Record provided revised suspender forces. The newly provided suspender forces will be used by the Contractor to model the bridge again and resolve the identified conflict.

For this change, the Contractor will receive a lump sum of $109,694.00, which can be financed from the contingency fund. A detailed analysis of this cost adjustment is on file in the project records.

Adjustment of contract time is deferred pending completion of the work specified in this change as it may affect the controlling operation.

This change order received concurrence from Rick Morrow (Structure Representative), Ken Terpstra (Project Manager), Mike Forner (Principal Construction Engineer) and Gary Pursell (Resident Engineer). Maintenance concurrence is not required for this change as this work is temporary in nature. Design

This change order was field approved by the Supervising Transportation Engineer, Gary Pursell, on May 19, 2008.

10-1.59 STEEL STRUCTURES

Welding of HPS 485W Steels

4. Qualification Testing: Weld procedure qualification test requirements for HPS 485W groove welds shall be evaluated using Welding Procedure Specification (WPS) Test Plates from the greatest thickness to be welded in production and, for formed members, the as-formed base metal representing the highest forming strain, i.e., lowest ratio of diameter to thickness of a tubular, to be used in fabrication. Testing shall conform to AWS D1.5 qualification requirements, except fillet weld procedures shall be qualified in each position used, macroetch specimens shall be taken and additional sets of Charpy V-Notch specimens shall be taken within one millimeter of both the inside and outside tubular surfaces and centered on the coarse-grained area of the heat affected zone (HAZ). The test results shall meet the following properties:

   Transverse tensile ultimate strength: ≥ 620 Mpa
   Transverse tensile ultimate strength – Deviation Saddles Post Weld Heat Treated: ≥ 600 MPa if the failure is initiated in the weld metal and ≥ 585 MPa if the failure is initiated in the base metal.
   All-Weld-Metal: yield strength: ≥ 485 MPa
   All-Weld-Metal: ultimate tensile strength: ≥ 620 Mpa
   All-Weld-Metal – Deviation Saddles: ultimate tensile strength after Post Weld Heat Treatment: ≥ 600 MPa
   All-Weld-Metal: percent elongation: ≥ 19% in 50 mm
   Charpy V-Notch: as specified under Materials above.

10-1.60 CABLE SYSTEM

Cable Band Bolts

Cable band bolts shall conform to the requirements of ASTM Designation: A354, Grade BC. Nuts shall conform to the requirements of ASTM Designation: A563. Washers shall conform to ASTM Designation: F436. Cable band bolts, nuts and washers shall be galvanized. The cable band bolts shall have drilled recesses in the center of the bolt head and the center of the bolt shank for extensometer length measurements. All bolts shall receive heat treatment after final machining.

Perform ~~T~~ tensile tests to failure on cable band bolts assemblies with nuts and washers ~~shall be performed on a minimum of 30 bolts, but not less than 6 per heat. If one bolt fails to meet the required strength two more bolts from the heat shall be tested. If both bolts meet the specified requirements, the heat will be accepted. If any two bolts from one heat fail to meet the requirements, the heat will be rejected.~~ Test a minimum of one bolt per heat treatment lot but not less than 30 bolts evenly distributed among heat treatment lots and not less than 6 bolts per mill heat evenly distributed among heat treatment lots. If a bolt fails to meet the required strength, test two more bolts from the same lot. If both bolts meet the required strength the lot is accepted. If two bolts from the same heat treatment lot fail to meet the required strength the lot is rejected. Test, for load extension and ultimate tensile strength, one bolt per lot of the bolts supplied for the Friction Test.

Tensile tests, to obtain load-extension curves, shall be carried out on five cable band bolts, but not less than one per heat. Test bolts from different heat treatment lots if possible or evenly among lots to the extent possible. The testing apparatus shall be proposed by the Contractor and approved by the Engineer. The load-extension curve shall be recorded continuously. The extension may be measured from the separation of the jaws of the test apparatus. The yield point of the tested specimen shall be compared to that of the specified yield point. If any of the tests does not meet the minimum requirements, two additional tests shall be conducted for that heat. Both tests shall pass the requirements or the heat will be rejected.

CONTRACT CHANGE ORDER MEMORANDUM

TO: Mike Forner, Prin. TE / Gary Pursell, P.E., Sup T.E.	FILE: **E.A.** 04 - 0120F4
	CO-RTE-PM SF-80-13.2/13.9
FROM: Gary Pursell, P.E., Sup.T.E.	**FED. NO.**
CCO#: **57** SUPPLEMENT#: **0** Category Code: **CHSA**	CONTINGENCY BALANCE (incl. this change) **$134,080,012.40**
COST: **$0.00** INCREASE ☐ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☑ YES ☐ NO
SUPPLEMENTAL FUNDS PROVIDED: **$0.00**	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Weld Strength and Cable Band Sampling	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**30** Day(s)	**1** %	**2**

THIS CHANGE ORDER PROVIDES FOR:

Revising the Special Provisions Section 10-1.59, "STEEL STRUCTURES" subsection "Welding of HPS 485W Steels," to provide a minimum tensile strength requirement of 600 MPa if the failure is initiated in the weld metal and 585 MPa if the failure is initiated in the base metal, in lieu of the 620 MPa requirement, in the post weld heat-treated condition for the deviation saddles.

Revise Section 10-1.60, "CABLE SYSTEM" subsection "Cable Band Bolts," of the Special Provisions to provide a minimum of one bolt per heat treatment lot for cable band bolt testing.

The welding electrodes are commonly certified to a minimum tensile strength or 620 MPa but heat treatment is not considered. Presently, there are no AISI certified weld electrodes that meet the 620 MPa requirements for the post heat-treated condition. This change will allow the tensile strength to be reduced to a 600 MPa requirement, which is both achievable and sufficient for this application.

The Special Provisions require the Contractor to provide 30 cable band bolts per mill heat for testing. All 1,400 bolts are from a single heat, which will result in only 30 bolts being tested. This change will amend the Special Provisions to require the Contractor to provide a minimum of one bolt per heat treatment lot, which is estimated to be 40 lots. This change will provide a more uniform sampling of the cable band bolts to be tested and mitigate schedule risk of bolt failure.

This change order is done as a no cost change. A detailed cost analysis is in the project files.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Mike Forner (Principal TE), Rob Kobal (HQ Oversight), Marwan Nader (Design of Record), Vankatesh Iyer (METS), Ken Terpstra (Project Manager) and Wenyi Long (Design Oversight).

This change order received an Issue and Approve from the Division of Construction on April 21, 2008. A copy is attached for reference.

CONTRACT CHANGE ORDER

Change Requested by: Contractor

CCO: 57 **Suppl. No. 1** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Perform casting weld repairs for the cable system steel casting components as described in this change order.

Adjustment of Compensation at Lump Sum:

Insert after the fourteenth (14th) paragraph of Section 10-1.60, "Cable System," subsection, "Materials and Fabrication," subsection, "Steel Castings," of the Special Provisions with the following:

Perform casting repairs by welding in accordance with either:

1. American Welding Society (AWS) D1.5 as modified by Section 8-3, "Welding" of these provisions, or
2. 2004 American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code, Section IX (ASME IX), for welding upgrades only, subject to review and approval of the Engineer.

Notify the Engineer at least 24 hours prior to the start of welding.

Submit Welding Procedure Specifications (WPS) qualifications and welder qualifications for upgrades per ASME IX for review and approval. WPS shall comply with ASTM A 488 and ASME IX as modified below:

1. Additional essential variables required for WPS other than SMAW shall include welding travel speed (limited to ±10%), heat input (limited to +10%, -30%), and, for FCAW, the brand name of the electrode.
2. Weld procedures with all supporting Procedure Qualification Records (PQR) shall be submitted in writing to the Engineer for each welding location.

Certified Welding Inspectors (CWI), qualified to the standards of the American Welding Society (AWS) QC1 shall perform visual Inspection. Other nondestructive (NDT) testing personnel shall be qualified to the standards of the American Society of Nondestructive Testing (ASNT) ASNT-TC-1A, (a version dated no earlier than 2001) or an equal, subject to review and approval by the Engineer. The NDT firm's written practice, shall be in accordance with ASNT-TC-1A (version as described previously), or an equal, subject to review and approval by the Engineer. Non-visual inspection shall be by ASNT Level II technicians or Level III personnel certified to act as Level II technicians, or an equal, subject to review and approval by the Engineer.

CONTRACT CHANGE ORDER

Change Requested by: Contractor

CCO: 57 **Suppl. No.** 1 **Contract No.** 04 – 0120F4 **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

This change order resolves cost and time impacts associated with Contractor Request For Information (RFI) No. 1242 and Request for Change Order (RFCO) No. 26.

For this work, the Contractor agrees to perform this work at no additional cost to the Department.

Adjustment of Compensation at Lump Sum Price $0.00

Estimated Cost: Increase ☐ Decrease ☐ $0.00

By reason of this order the time of completion will be adjusted as follows: 0

CCO DESCRIPTION: Cable Band Casting Welding	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	0 Day(s)	30 Day(s)	1 %	5

THIS CHANGE ORDER PROVIDES FOR:

Revising Section 10-1.60, "Cable System," subsection, "Materials and Fabrication," subsection, "Steel Castings," of the Special Provisions to allow the Contractor to perform weld repairs in accordance with American Welding Society (AWS) D1.5 or American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code, Section IX. This change applies to cable system steel casting components, which consist of cable bands, cable strand sockets, suspender sockets, split collars, and suspender separators.

This change will incorporate industry standard steel casting weld repair specification into Special Provisions section 10-1.60, "Cable System," subsection, "Steel Castings." The industry standard repair method is already included in Special Provisions section 10-1.59, "Structural Steel," but was inadvertently omitted from the Cable System section. This change also resolves Contractor Request for Information (RFI) 1242 and Request for Change Order (RFCO) 26.

This is a Contractor requested change order. The Contractor agrees to perform this work at no additional cost to the Department. CCO 57S0 was also a Contractor requested change order at no cost. This will result in a cumulative amount of $0.00 for this change order. A detailed cost analysis is on file in the project records.

No time adjustment is warranted, as this change order does not affect the controlling operation.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Mike Forner (Principal TE), Patrick Treacy (HQ Oversight), Marwan Nader (Design of Record), Vankatesh Iyer (METS), Project Manager (Ken Terpstra) and Design Oversight (Wenyi Long). Maintenance concurrence is not required for this change.

The Resident Engineer received an Issue and Approve from Division of Construction for this change on 12/22/08.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 58 | Suppl. No. 0 | Contract No. 04 - 0120F4 | Road SF-80-13.2/13.9 | FED. AID LOC.:

To: AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENT

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Allow "Check Testing" of steel plate samples at local facility in lieu of shipping samples to Transportation Laboratory in Sacramento, California.

Adjustment of Compensation at Lump Sum:

Revise the first sentence of the sixth paragraph in Section 10-1.59 STEEL STRUCTURES, subsection "CHECK TESTING" as shown below:

From: "Check samples shall be delivered to the Transportation Laboratory at the Contractor's expense"

To: "Check samples shall be delivered to the Transportation Laboratory or a local facility as directed by the Engineer at the Contractor's expense."

For this work, the Contractor will credit the Department the sum of ($80,000.00). This price constitutes full compensation, including all markups, for the work of this change.

Cost of Adjustment of Compensation at Lump Sum .....($80,000.00)

Estimated Cost: Increase ☐ Decrease ☑ **($80,000.00)**

By reason of this order the time of completion will be adjusted as follows: 0 days

CCO DESCRIPTION:
Shipping Check Samples

PROJECT DESCRIPTION:
CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	0 Day(s)	150 Day(s)	6 %	6

THIS CHANGE ORDER PROVIDES FOR:

Allowing "Check Testing" of steel plates to be performed locally in lieu of shipping samples to the Transportation Laboratory in Sacramento California.

This change Revises the first sentence of the sixth paragraph in Section 10-1.59 STEEL STRUCTURES, subsection "CHECK TESTING" from "Check samples shall be delivered to the Transportation Laboratory at the Contractor's expense" to "Check samples shall be delivered to the Transportation Laboratory or a local facility as directed by the Engineer at the Contractor's expense."

Special Provisions require the Contractor to ship steel plate check samples to the Transportation Laboratory in Sacramento. The Department has determined that the sample testing will be performed locally in China to obtain results in a timely manner. A saving of $80,000.00 will be realized by this change, which will be returned to the contingency fund. A detailed cost analysis is on file.

The change does not impact the critical path, therefore a time adjustment is not warranted.

This change order has concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Mike Forner (Principal TE), Patrick Treacy (HQ Oversight), Sang Le (HQ METS) and Ken Terpstra (Project Manager).

This change order originally received a Division of Construction Issue and Approve on April 16, 2009 and a Request for Information on May 20, 2009 (copies attached). The information requested has been resolved and the Engineer received a revised Issue and Approve (I&A) on June 18, 2009.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 59 **Suppl. No.** 0 **Contract No.** 04 – 0120F4 **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum Price:

ITEM 1.

Provide one hundred seventy eight (178) additional penetrations in the Orthotropic Box Girder (OBG), as listed in sheets two (2) through twelve (11) of this change order.

For this work, the contractor will be paid the sum of $54,014.00. This sum constitutes full compensation, including markups, for this change.

Adjustment of Compensation at Lump Sum Price..... $54,014.00

ITEM 2.

The items identified above in this change order have been paid as part of CCO 108 resolution. Therefore, the amount due under this change order will be adjusted by the amount paid under CCO 108 to prevent a double payment. Total amount paid under CCO 108, and to be credited to this change, is $54,014.00.

Adjustment of Compensation at Lump Sum Price..... <$54,014.00>

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation for work pursuant to this change order	$54,014.00
(ITEM 2) Amount paid under CCO 108 for this change order	<$54,014.00>
Total net pay for this change order	$0.00

Contract time is not addressed in CCO 108 for work identified in this change order. Therefore, consideration of a time adjustment will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

Estimated Cost: **Increase** ☐ **Decrease** ☐ **$0.00**

By reason of this order the time of completion will be adjusted as follows: **Differed**

CONTRACT CHANGE ORDER MEMORANDUM

DATE: 6/10/2008 Page 1 of 1

TO: Pete Siegenthaler, Prin TE /	FILE: E.A. 04 - 0120F4
M: Gary Pursell, Sup. TE	CO-RTE-PM SF-80-13.2/13.9
	FED. NO.

CCO#: 59	SUPPLEMENT#: 0	Category Code: ~~CBRT~~ CHPT	CONTINGENCY BALANCE (incl. this change) $80,269,899.40
COST: $0.00	INCREASE ☐ DECREASE ☐		HEADQUARTERS APPROVAL REQUIRED? ☐ YES ☑ NO
SUPPLEMENTAL FUNDS PROVIDED: $0.00			IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO

CCO DESCRIPTION:
Additional OBG Penetrations

PROJECT DESCRIPTION:
CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	DEF 0 Day(s)	227 Day(s)	9 %	6

THIS CHANGE ORDER PROVIDES FOR:

Reimbursing the Contractor for detailing and fabrication costs due to additional Orthotropic Box Girder (OBG) MEP penetrations along the deck, side plates, shear plates, bottom plates and crossbeam plates.

This work is not covered by any contract items. Therefore, payment for this work will be at Adjustment of Compensation at Lump Sum for the amount of $54,014.00. Since the cost, of $54,014.00 in this change, is included in Contract Change Order 108 Supplement 1 (CCO 108S1) Claim Settlement Report No. 1 resolution costs the net payment in this change order is zero.

Contract time is not addressed in CCO 108 for work identified in this change order. Therefore, consideration of a time adjustment will be deferred until completion of the work specified herein. Determination of a commensurate time adjustment will be made in accordance with Section 10-1.13, "PROGRESS SCHEDULE (CRITICAL PATH METHOD)" and Section 10-1.14, "TIME-RELATED OVERHEAD" of the Special Provisions, as well as Section 8-1.07, "LIQUIDATED DAMAGES", of the Standard Specifications.

This change order received concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Peter Siegenthaler (Principal TE), Rich Foley (HQ Oversight), Ken Terpstra (Project Manager), Richard Land (Chief Engineer), Jon Tapping (HQ Coordinator), Tony Anziano (Toll Bridge Program Manager), Brian Maroney (Project Engineer), Wenyi Long (Design Oversight), and Lina Ellis (Structure Maintenance).

Claims Settlement Report (CSR) No. 1, for this project, revises the authority to "Issue and Approve" the changes listed in CCO 108S1 Appendices A & B. The authority to "Issue and Approve" the changes listed in Appendices A & B for the values of time and money contemplated therein has been delegated to the District for approval, therefore approval of this change order by the Headquarters CCO Desk will not be required. Since this change order is included in CCO 108S1 no Headquarters CCO Desk "Issue and Approve" is required, a copy of CCO 108S1 is attached for reference

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 60 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Purchase cable band assembly and transport as described below:

Extra Work at Lump Sum:

Perform the following work after the cable band friction tests are complete:

1. Provide the 3.5M PWS cable (as is) and the B4 cable band full size model (as is) used in the friction test to the Department.
2. Clean and paint the inside of the cable band before storage as directed by the Engineer.

For this work, the Contractor agrees to accept a lump sum of $56,209.00. This sum constitutes full compensation, including all markups, for this work.

Cost of Extra Work at Lump Sum $56,209.00

Extra Work at Force Account:

Transport the cable assembly, fabricate display support and perform miscellaneous handling and modifications as directed by the Engineer.

Labor, equipment and material approved by the Engineer, as necessary will be paid in accordance with the provisions of Section 4-1.03D, "Extra Work" of the Standard Specifications and Section 5-1.24, "Force Account Payment" of the Special Provisions.

Estimated cost of Extra Work at Force Account $60,000.00

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$116,209.00**

By reason of this order the time of completion will be adjusted as follows: **0 days**

Submitted by

Signature Gary Pursell **Resident Engineer** Gary Pursell, Sup.T.E. **Date** 08/19/08

Approval Recommended by

Signature R. J. Morrow **Supervising Bridge Engineer** Richard Morrow, Sup.T.E. **Date** 8/19/08

Engineer Approval by

Signature Gary Pursell **Supervising Transportation Engineer** Gary Pursell, Sup.T.E. **Date** 9/5/08

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature Michael D. Flowers **(Print name and title)** Michael D. Flowers Project Director **Date** 9-2-08

CCO#: 60 SUPPLEMENT#: 0 Category Code: CXXX	CONTINGENCY BALANCE (incl. this change) $134,066,258.40
COST: $116,209.00 INCREASE ☑ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? ☐ YES ☑ NO
SUPPLEMENTAL FUNDS PROVIDED: $0.00	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? ☑ YES ☐ NO
CCO DESCRIPTION: Cable Display	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	0 Day(s)	30 Day(s)	1 %	2

THIS CHANGE ORDER PROVIDES FOR:
Purchasing, transporting, cleaning, painting, and fabricating display support for the cable band mock-up assembly.

The contract requires the Contractor to perform a friction test utilizing a mock-up assembly which consists of a section of the main cable and a cable band. The contract specifications allow the Contractor to reuse the cable band from the assembly in the permanent structure. Toll Bridge Management has directed the Department to obtain the mock-up assembly when testing is complete for use in a future public display. Cable strands displayed in the assembly will be painted different colors to illustrate the movements of the strands during cable compaction. The strand arrangement differs from typical bridge cables and will be of interest to both the public and the bridge engineering community.

For obtaining the cable assembly, cleaning and painting the inside of the cable band, the Contractor will receive a lump sum payment of $56,209.00. Additional cost to transport the cable assembly, fabricate display support and perform misc. handling and modifications as directed by the Engineer, will be paid for as Extra Work at Force Account for an estimated amount of $60,000.00. A detailed cost analysis is on file.

The total estimated cost of this Contract Change Order is $116,209.00, which can be financed from the contingency fund.

No adjustment of contract time is warranted, as this change does not affect the controlling operation.

This change order received concurrence from Rick Morrow (Structure Representative), Ken Terpstra (Project Manager), Mike Forner (Principal Construction Engineer) and Ken Brown (Division of Maintenance).

The Resident Engineer approved this Change Order on September 5, 2008.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 61 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum Price:

Revise electrical warning systems on SAS Main Tower, Pier E2, Pier E3, and along Skyway Piers including, but not limited to, navigation marker lights and relay cabinets, aviation light, fog detection panels, fog bells and horns, associated pull boxes, and conductors, conduits, and mounts for the navigation lights.

All new exterior surfaces and any areas of damaged existing paint shall be cleaned, primed, and finish painted in accordance with Special Provisions Section 10-1.69 "CLEAN AND PAINT STRUCTURAL STEEL."

Revise Special Provisions Section 10-3.14 "LIGHTING," subsection "NAVIGATION WARNING SYSTEM" and subsection "FOG DETECTION SYSTEM" as shown on sheets 2 through 6 of this change order.

The following revised plan sheets detail the changes addressed in this change order: 83R3, 83S4R1, 83S5, 86S17, 86S18, 86S19, 86S20, 86S21R1, 93R11, 128R3, 129R3, 138R2, 138S1R3, 142R4, 170R5, 201R3, 202R3, 203R3, 212R4, 261S8R1, 281R1, 291R2, 292R2, 292S1R2, 293R5, 293S1, 293S2, 293S3R1, 293S4R1, 293S5, 293S6, 294R3, 294S1, 294S2, 294S3R2, 294S4, 294S5, 294S6, 294S7, 294S8R1, 294S9R1, 294S10, 294S11R1, 294S12R1, 294S13R1, 294S14R1, 294S15, 294S16, 294S17, 294S18, 295R4, 296R2, 297R3, 298R2, 298S1, 299R4, 300R3, 301R1, 311R2, 312R2, 314R2, 361R6, 362R5, 363R7, 364R5, 369S1R2, 369S2R1, 369S3R1, 369S4R1, 369S5R1, 369S6R1, 373R6, 373S1, 374R9, 375R7, 376R6, 376S1R1, 386R7, 386S2R1, 387R4, 388R5, 389R5, 395R8, 400R8, 401R3, 401S1R2, 401S2R2, 405R2, 406R2, 407R8, 407S6R4, 407S7R3, 407S9R3, 407S11R2, 407S12R5, 407S13R2, 407S14R2, and 407S15R2 (of 1204) as shown on sheets 7 through 104 of this change order.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 873R0, 1334R0, 1334R1, 1404R3, 2593, and 2666 with respect to changes listed above.

For this work, the Contractor will receive a lump sum price of $998,928.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Adjustment of Compensation at Lump Sum.....$998,928.00

Estimated Cost: Increase ☒ Decrease ☐ $998,928.00

By reason of this order the time of completion will be adjusted as follows: 0 Days

Submitted by

Signature **Resident Engineer** Darryl Schram, Senior T.E. **Date** 1/18/13

Approval Recommended by

Signature **Supervising Transportation Engineer** William Casey, Supervising T.E. **Date** 1-18-13

Engineer Approval by

Signature **Supervising Transportation Engineer** William Casey, Supervising T.E. **Date** 2-5-13

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefore the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

CCO DESCRIPTION: SAS/Skyway Electrical Warning Systems	**PROJECT DESCRIPTION:** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time:	Time Adj. This Change:	Previously Approved CCO Time Adjustments:	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**501** Day(s)	**20** %	**3**

THIS CHANGE ORDER PROVIDES FOR:

Revising electrical warning systems on SAS Main Tower, Pier E2, Pier E3, and along Skyway Piers including navigation marker lights and relay cabinets, aviation light, fog detection panels, fog bells and horns, associated pull boxes, and conductors, conduits, and mounts for the navigation lights.

Revising Special Provisions Section 10-3.14 "LIGHTING," subsection "NAVIGATION WARNING SYSTEM" and subsection "FOG DETECTION SYSTEM."

The electrical warning system was not finalized and approved by the United States Coast Guard (USCG) before the SAS project was put out to bid. The navigation and aviation warning system and fog detection system will be revised to meet USCG requirements. Navigation fixtures will be changed from incandescent bulbs to LED in order to reduce power consumption and maintenance costs. The navigation warning system fixtures, conductors, and electrical enclosures will be modified to accommodate the use of LED.

This change order resolves the costs associated with Contractor Request for Information (RFI) numbers 873R0, 1334R0, 1334R1, 1404R3, 1901R1, 2593, and 2666 with respect to changes listed above.

The total cost of this change order is $998,928.00 lump sum, which can be financed from the contingency fund. A detailed cost analysis is on file.

There will be no time adjustment for this change, as it does not affect the controlling operation.

This change order has concurrence from William Casey (Supervising TE), Rich Foley (HQ Oversight), Ken Terpstra (Project Manager), Lina Ellis (Maintenance), and Jing Chen (District Design).

NOTES:

1. The contractor shall verify all controlling field dimensions before ordering or fabricating any material.
2. Unless otherwise noted, all framing elements are L102x102x13.
3. All structural steel shall be AASHTO M270M Grade 36.
4. Steel pipe shall be ASTM A-53 grade B.
5. All bolts shall be conforming to ASTM A325 and shall be 19.05 mm diameter unless noted otherwise on plans.
6. All welded connections shall conform to the requirements of AASHTO/ AWS D1.5 Bridge Welding Code. Weld electrodes shall be E70XX.
7. All structural steel shall be Hot-dipped galvanized.
8. Electrical panel support designed for uniformly distributed wind load on vertical surface of 2.4 kPa (50psf).
9. Design weight of electrical panel assumed 544 kg (1200 lbs).
10. For structural notes, see sheet AS-1.
11. Contractor has the option to perform welds shown on this drawing in the shop or in the field.
12. Before drilling mounting holes in support frame, contractor shall verify location of the mounting holes in electrical panel.

NOTES:

1. The contractor shall verify all controlling field dimensions before ordering or fabricating any material.
2. All structural steel shall be AASHTO M270M Grade 36.
3. Steel pipe shall be ASTM A-53 grade B
4. All welded connections shall conform to the requirements of AASHTO/AWS D1.5 Bridge Welding Code. Weld electrodes shall be E70XX.
5. All structural steel shall be Hot-dipped galvanized.
6. Fog horn support designed for uniformly distributed wind load on vertical surface of 2.4 kPa (50psf).
7. Design weight of fog horn system assumed 113 kg (250 lbs).
8. The contractor shall verify location of existing rebars in concrete pile cap before drilling holes for "drill and bond" threaded rods installation to avoid damage to the existing reinforcement.
9. For "drill and bond" threaded rods the contractor shall use "HILTI" HIT RE 500 Epoxy Adhesive Anchor or approved equal.

GENERAL NOTES

1. Conduit routing is diagrammatic. Pull box locations shall be located as shown on plan drawings. The Contractor shall provide additional pull boxes as required. Exact locations of equipment and devices may be adjusted depending on field conditions or by the Engineer.
2. Minimum size of conduits shall be 21 mm. Exposed conduits shall be PVC coated rigid galvanized steel, and conduits located inside girder shall be rigid galvanized steel. (unless noted otherwise)
3. Conduit fittings for 78 mm conduits and larger shall have a 610 mm minimum bending radius.
4. All conduits, including spares, shall be provided with pull wires prior to cable installations.
5. All equipment and devices shall be provided with nameplate tags per drawings.
6. All feeders and branch circuits shall be provided with ground wire.
7. 15 kV splice boxes shall be installed as shown and permanently marked "DANGER-HIGH VOLTAGE-KEEP OUT". The letters shall be block type and at least 50 mm in height.
8. The Contractor shall label all conductors and cables per wiring diagrams.
9. Padlocks shall be installed on all cabinets located on the platforms to prevent unauthorized access.
10. Call boxes will be State-furnished. (The Contractor shall install and terminate conductors per wiring diagram.
11. Ladder type cable trays shall be installed for each 15 kV and 600 V systems.
12. Solid bottom cable trays shall be installed for each low level signals, CALTRANS communications, fiber optic systems, and for Non-Caltrans utilities.
13. For Strong Motion Detection System general notes, see sheet E-361.
14. All E sheets are accurate for electrical work only.
15. All dimensions are in millimeters unless otherwise shown.
16. All unused conductors inside pull boxes shall be taped and coiled.
17. "Similar" when shown on the plans means this detail is applicable to different structure and conduit sizes.
18. Electrical fixtures shall not be field welded to the box girders or crossbeams. All welding to the box girders and crossbeams shall be shown on the box girder and crossbeam shop drawings for review and approval by the Engineer.
19. All welding of electrical fixtures to the tower shall be shown on the tower shop drawings for review and approval by the Engineer.
20. All connections to steel elements of the self-anchored suspension bridge superstructure of electrical equipment and fixtures, including conduits, pull boxes, lighting fixtures, messenger cables and others, shall be shop welded or bolted. All connection details shall appear on the working drawings for review and approval by the Engineer.
21. Prior to ordering any cable tray support structures, the Contractor shall:
    - Refer to Structural sheets to determine the locations of cable tray support structures.
    - Determine, based upon field conditions, when and where to use cable tray vertical or horizontal bends, horizontal tees or reducers.
    - Refer to AS-sheets to determine the type of cable tray support to use based on field conditions.
    - Cable tray support structures shown on the AS-sheets are generic and may have to be adapted to suit field conditions.
    - All modifications to the cable tray support structures as shown on the AS-sheets shall be approved by the Resident Engineer.
22. All installation of electrical conduit, equipment or pull boxes shall be either shop welded or bolted.
23. All cable trays shall be securely anchored to support. Appropriate type of anchors (hold down brackets, hold down clamps or guides) shall be used to suit the cable tray type, location and supports. For similar attachment details, see TYPE I & II on E-122A and E-205A.
24. Contractor shall seal all wall penetrations with conduit within the dehumidified area using a rubber pipeseal that will expand to fill the gap between the penetration sleeve and conduit to create a seal. Caulking (silicone caulk) shall not be used at these locations.

LAST REVISION 00-00-00
DATE PLOTTED => 04-MAY-2012
TIME PLOTTED => 13:50

EQUIPMENT SCHEDULE:

Equipment for Westbound

- (A) Utility Panel, UP-108, 100A 208/120 V, 3-phase, 4-wire
- (A1) 480 V Breaker for (A2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (A2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (C) Remote Terminal Unit RTU #11W Size: 1830 H X 940 W X 610 D
- (L) TOS/COM-8WA Pull Box (PB-2B)

Equipment for Eastbound

- (F) Utility Panel, UP-208, 100 A, MLO 208/120 V, 3-phase, 4-wire
- (F1) 480 V Breaker for (F2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (F2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (F3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (G) Lighting Panel LP-223, 100 A, MLO 208/120 V, 3-phase, 4-wire
- (G1) 480 V Breaker for (G2) (Nema 4X) Size: 495 H X 232 W X 124 D
- (G2) 15 kVA Transformer, 3 phase, 60 hertz 480 V-208/120 V, 3 phase (Nema 4X) Size: 375 H X 485 W X 311 D
- (G3) Enclosed circuit breaker 10 kAIC 240 V 3 phase in NEMA 4X enclosure.
- (H) Remote Terminal Unit RTU #11E Size: 1830 H X 940 W X 610 D
- (M) TOS/COM-8EA Pull Box (PB-2B)

Equipment Common for Westbound/Eastbound

- (E) Navigation Relay Cabinet NAP-8 (PB-6C)
- (J) Telephone Terminal Box #TEL-8 (PB-7C)
- (K) Communication Terminal Box COM-8 (PB-7B)
- (2) (N) Fog Detection Panel FDP-6

SHEET NOTES:

1. For electrical panel support details, see AS-sheets.
2. 600 V Stainless steel wireway, Nema 4X with cover.
3. Low level Stainless steel wireway, Nema 4X with cover.

NOTES:

1. The contractor shall verify the sizes and mounting dimensions of all rack mounted equipment prior to the fabrication of service platform racks. The contractor shall also verify the wireway mounting dimensions and support locations and make adjustment as needed to suit field condition.
2. Contractor to provide cover plate and sealant to all cabinets with open bottom. Cover plate shall be of the same material. See Sheet E-78B for details.
3. References:
   - For platform 5 conduit, lighting and grounding plan, see sheet E-118.
   - For location of platform 8, see sheet E-50.
   - TOS are shown for conduit routing only. For typical details of TOS controller and devices, see sheets E-344 through E-361.
   - For schedule of utility panel UP-108, see sheet E-63.
   - For schedule of utility panel UP-208, see sheet E-154.
   - For schedule of lighting panel LP-223, see sheet E-157.
   - For typical panel arrangement details of SCADA communications terminal box, see sheet E-321.
   - For pull box schedule, see sheet E-83.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For platform elevations, see sheet E-75A.

SHEET NOTES:

1. For electrical panel support details, see AS-sheets, AS-13, AS-13A, AS-13B, AS-13C and AS-13D.
2. 600 V Stainless Steel Wireway, Nema 4X with cover.
3. Low level Stainless Steel Wireway, Nema 4X with cover.
4. Empty conduits shall be capped for future use.
5. Conduit contains Ckt. 2366-1,2,4,5 & 7 via wireway. See sheets E-300 & E-441.
6. Conduit contains Ckt. 2366-8 for synchronization of FDP-6 and FDP-7 via wireway. See sheets E-293D & E-300.
7. See Detail 4, Dwg E-111B for Structural rack grounding.
8. Bare Copper Wire (BCW) for equipment grounding shall be installed in the same conduit that connects to the equipment for mechanical protection as shown in Detail 8, Dwg E-111B.
9. See Detail 6, Dwg E-111A for additional detail.

NOTES:

1. Equipment dimensions mounted at panel racks shall be verified by Contractor prior to purchase and installation. Dimensions for equipment location are approximate and may be adjusted to suit field condition.
2. (SP) Denotes spare pipe sleeve for 78 mm conduit. Contractor to provide plug at each ends

SHEET NOTES:

(1) The Contractor shall extend and coil 5.0 meters of cable in manhole #25. All cables shall be tagged with circuit numbers as shown.

(2) See sheet E-73 for Equipment Schedule.

NOTES:

1. The Contractor shall provide nameplates and circuit schedules as shown.
2. Deleted.
3. References:
   - For LVCC-B single line diagram, see sheets E-32 thru E-34.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
   - For pull box schedule, see sheet E-169.

LOAD SUMMARY IN VA (INCLUDES .90 PF)

Lighting (At 100%): 2,214 VA
Gen Use (1st 10 kVA at 100% Plus 50% of remainder): 7.220 VA (2)

TOTAL kVA: 9.324 kVA
TOTAL A: 25.90 A at 208 V, 3ø (2)

BALANCE (kVA)

Phase A - 3.055
Phase B - 3.320
Phase C - 3.059 (2)

VOLTAGE: 208/120 V
PHASE/WIRES: 3 PH,4 W
BUS RATING: 100 A
MAIN: 60 A
MOUNTING: Surface in Fiberglass Enclosure
K.A.I.C.: 10

SHEET NOTES:

(1) Utility Panels are existing in Skyway Structures Service Platforms. Contractor to verify As-Built conditions.

(2) Contractor shall verify if existing circuit breaker is in good working condition. Replace as required.

(3) Connections to UP-131 breaker #11 are per SAS Contract only.

NOTE:

1. Unless noted with sheet notes (2)(3), everything shown is furnished and installed under Skyway Contract

SHEET NOTES:

1. Fog detector, see Detail 2, sheet E-293.
2. One mile fog horn, see Detail 3, sheet E-293.
3. Red axis lights shall be attached to the channel-ward face of pier. Each light shall show through a horizontal arc of 180 degrees and shall be mounted on the navigational pier as low as practicable but not lower than two feet above navigable high water, to show 90 degrees either side of a line parallel to the axis of the bridge.
4. Conduit penetration for Fog Detection and Navigation Systems.
5. Conduit #8143 shall be installed to accommodate the termination of cable (ckt #2366-4) based on maximum cable length of 9000 mm.
6. Conduit up to cable tray #1T43 inside the girder. Use conduit elbow fitting for pulling cable as required.

NOTES:

1. References:
   - For SAS Superstructure and tower plan and elevation, see sheet E-291.
   - For SAS Superstructure girder plan, see sheet E-292.
   - For navigation and aviation lighting fixture schedule, see sheet E-297.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.
2. For other related work not shown on this sheet, see Electrical Special Provisions.

The State of California or its officers or agents shall not be responsible for the accuracy or completeness of electronic copies of this plan sheet.

Caltrans now has a web site! To get to the web site, go to http://www.dot.ca.gov

SHEET NOTES:

(1) Pier footing wall mounted devices shall be secured to the concrete with manufacturer recommended mounting and approved by resident engineer.

(2) Red axis lights shall be attached to the channel-ward faces of the piers. Each light shall show through a horizontal arc of 180 degrees and shall be mounted on the navigational channel face of the pier as low as practicable but not lower than 2 feet above navigable high water, to show 90 degrees either side of a line parallel to the axis of the bridge, so as to be visible from an approaching vessel.

(3) Installed and furnished per SAS Contract.

(4) Core drill 41 mm diameter hole and seal opening gap after conduit is installed.

(5) For pier E6E, use existing penetration sleeve located on the west side face of the pier.

(6) Contractor shall replace the existing conduits and any fittings that connects the light fixtures and receptacle inside the stairwell. Rework shall be performed as follow.

a. Contractor to de-energize power to the stairwell light fixtures and receptacle. Disconnect all stairwell lighting and receptacle splices inside existing pull box located below the girder. Remove all existing wires, conduits, light fixtures/ J-boxes and receptacle inside the stairwell and up to the existing pull box below the girder. Existing light fixtures & J-boxes and receptacle shall be salvaged for re-installation.

b. Contractor shall furnish and install 1 (41C) rigid galvanized steel between the 600V cable tray and the existing pull box located below the girder. Contractor shall also furnish and 1 install (41C) rigid galvanized steel and pull boxes PB-2L inside stairwell along the same routing of the previous conduits. Conduits shall be connected to existing pull box below the girder and shall be routed through the same openings and penetrations where previous lighting conduits were installed at the stairwell landing.

c. Contractor shall re-install the light fixture J-boxes and shall furnish and install 21C, rigid galvanized steel or nipple between the light fixture J-box and the new pull box. Contractor shall also furnish and install 21C, rigid galvanized steel to receptacle.

d. Contractor shall pull the 2/C#10 with #10 gnd cable for the navigation light from the cable tray down to the existing pull box located below the girder. Cut to length for splice.

e. Contractor shall furnish and install 6-1/C#10 + 1C#10 gnd, 1 1-2/C#14 and splice conductors with the respective conductors in pull box located below the girder. Contractor shall pull all wires through the newly installed conduits to respective stairwell lighting fixtures, receptacle and pier navigation light. Loop and secure wires inside pull box to prevent slippage.

f. Contractor shall re-install the light fixtures & receptacle and connect the new wires. Light fixtures and receptacle shall be inspected for damage and replace as required prior to installation.

AVIATION AND NAVIGATION LIGHTING FIXTURE SCHEDULE

Type	Description	Remarks
AV-1	Main Tower Marker Light FAA L-864, medium intensity, flashing, red, obstruction light. The light shall consist of a red lantern with six marine signal lamps controlled by a six-place microprocessor lamp changer. The flashing shall be at a rate of 20 flashes per minute. Input power shall be 480 VAC, single phase and be input to a transder.	
AV-2	Main Cable Marker Light FAA L-810, steady, red, obstruction light. The light shall consist of a red lantern with four marine signal lamps controlled by a four-place microprocessor lamp changer. Incoming power shall be 480 VAC, single phase and shall be input to a transformer.	
NV-1	Main Channel Marker Navigation Light with LED Green in color, with a 360-degree horizontal arc visibility. Housing shall be corrosion resistant and gasketed with remote lamp monitoring capability, 120VAC with 3x4 LED Array. Pharos Marine/Automatic Power Inc. Model FA-249LED or approved equivalent. (4)	
NV-2	Channel Marker Navigation Light shall consist of a green lantern with a 360-degree horizontal arc, with six marine signal lamps controlled by a six-place microprocessor lamp changer. Incoming power shall be 120 VAC, single phase and shall be input to a transformer. The rectified output shall be at 12 VDC to power the lamps. The housing shall be corrosion-resistant and gasketed.	Not used in this contract.
NV-3	Pier Marker Navigation Light with LED, Red in color, with a 180-degree horizontal arc visibility. Housing shall be corrosion resistant and gasketed with remote lamp monitoring capability, 120VAC with 3x4 LED Array. Lights shall conform to the latest provisions of Title 33 CFR chapter 1, Section 118.60. Pharos Marine/Automatic Power Inc. Model FA-249LED or approved equivalent. (4)(1)	
NV-4	Red in color, with 360 degree visibility. Pharos Marine/Automatic Power FA-249 LED Bridge Lantern, 120VAC, with 3x4 LED Array, or approved equivalent.	To mark reduced vertical clearance under OBG Travelers.

TOWER T1

FOG HORN AND FOG DETECTION SYSTEM

SHEET NOTES:

1. Fog Detector FD-5 and Fog Horn (FH-5) for Main Tower T1 shall be installed at the Tower Base.
2. Fog Detection Panel FDP-5 shall be Installed at the Main Tower T1 platform elevation 53.85 m Enclosure shall be Nema 4X.
3. DELETED
4. Junction Box (TB-A) shall be Nema 4X enclosure.
5. Fog Detection System at Main Tower T1, see SCADA Wiring Diagram RTU # 10E Sheet E-331. For Pier E2, see SCADA Wiring Diagram RTU # 11E. Sheet E-333.
6. Fog Horns FH-5 & FH-6 shall be synchronized in accordance with the chart shown on drawing E-293D.
7. Refer to Nameplate Schedules.
8. Cable (10/C #16 AWG Type S.O.) between Fog Detector and TB-A is furnished and installed by vendor.

NOTE:

1. For Fog Synchronization, see chart on dwg E-293D.

SAS SUPERSTRUCTURE AVIATION LIGHTING

SHEET NOTES:

1. Conductors spliced inside junction box located at tower.
2. The Contractor shall extend and coil 5 meters of cable in Manhole-25. All cables shall be tagged with circuit numbers as shown. For location of Manhole-27, see sheet E-11.
3. Conductors spliced inside junction box PB-1F located at Suspender Main Cable.
4. For connection to RTU #10W, #10E, #11W and #11E, see sheets E-330, E-331, E-332 and E-333 respectively.
5. Conductors spliced inside junction box PB-2A located inside girder.
6. Install 5A in-line fuse for AV-1 light fixture, inside PB-1B. PB-1B is located inside main tower NW quadrant at elev. 156.750, see Detail 1.
7. Install 5A in-line fuse per AV-2 light fixture, inside PB-1F located along the Suspender main cable, see Detail 1.
8. 480VAC-24VDC Power Supply located inside junction box PB-1F at Suspender Main Cable. See sheet E-251H for Detail.
9. Contractor to connect incoming wires into the Monitoring Box per the vendor wiring diagram.

NOTES:

1. References:
   - For Aviation and Navigation Lighting Fixture Schedule, see sheet E-297.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.

REGISTERED PROFESSIONAL ENGINEER — JENS ERLINGSSON — No. 8249 — Exp. 9/30/06 — ELECTRICAL — STATE OF CALIFORNIA

PB POWER, Inc.
A Parsons Brinckerhoff Company
303 Second St., Suite 700N
San Francisco, CA 94107-1317

The State of California or its officers or agents shall not be responsible for the accuracy or completeness of electronic copies of this plan sheet.

Caltrans now has a web site! To get to the web site, go to http://www.dot.ca.gov

SHEET NOTES:

1. For connection diagram to call boxes, see sheet E-400.
2. For connection diagram to scada system, see Table A, sheet E-325.
3. For connection diagram to navigation system, see sheet E-303.
4. Connections to panel door switch. For remote alarm status to RTU.
5. Field to tape cable overall shield wire.
6. Conductors spliced inside junction box PB-2A located inside the girder.
7. The Contractor shall install resistors, approximately equal to the impedance (Zo) of the twisted pairs, at the extreme ends of the multidrop network.

NOTES:

1. All spare conductors shall be coiled and taped at conductor ends unless terminated.
2. Terminate cable shields to low level ground bus.
3. References:
   - For Up-208 panel schedule, see sheet E-154.
   - For navigation system elementary diagram, see sheet E-298.
   - For RTU #11E panel layout, see sheet E-320.
   - For circuit and conduit/cable tray schedules, see sheets starting at E-401.

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 62 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum Price:

ITEM 1.

Incorporate into the work the tower shaft and splice details shown on sheets 2 through 10 of this change order. The following revised contract plan sheets detail all changes: 539R3, 543R2, 544R2, 546R3, 548R2, 549R2, 551R2, 553R3 and 554R2 (of 1204).

This change order resolves the costs associated with Contractor Request For Information (RFI) Nos. 215, 478, 618, 618R1, 708, 708R1, 826, 995, 1028, 1047, 1054, 1145, 1149, 1149R1, 1254, 1327 and 1333 with respect to changes listed above.

For this work, the Contractor will receive a lump sum price of $241,251.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Adjustment of Compensation at Lump Sum Price..... $241,251.00

ITEM 2.

The items identified above in this change order have been paid as part of CCO 108 resolution. Therefore, the amount due under this change order will be adjusted by the amount paid under CCO 108 to prevent a double payment. Total amount paid under CCO 108, and to be credited to this change, is $241,251.00.

Adjustment of Compensation at Lump Sum Price.....<$241,251.00>

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation for work pursuant to this change order	$241,251.00
(ITEM 2) Amount paid under CCO 108 for this change order	<$241,251.00>
Total net pay for this change order	$0.00

Contract time is addressed in CCO 108 for all work identified in this change order. Therefore contract time will not be adjusted in this change order.

Estimated Cost: **Increase** ☐ **Decrease** ☐ **$ 0.00**

By reason of this order the time of completion will be adjusted as follows: 0 days

Submitted by

Signature Mark Woods **Resident Engineer** Mark Woods for Gary Pursell, Sup.T.E. **Date** 10 Feb 2010

Approval Recommended by

Signature Gary Pursell **Supervising Transportation Engineer** Gary Pursell, Sup.T.E. **Date** 2/10/10

Engineer Approval by

Signature Gary Pursell **Supervising Transportation Engineer** Gary Pursell, Sup.T.E. **Date** 2/23/10

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature Michael D. Flowers **(Print name and title)** Michael D. Flowers Project Director **Date** 2-22-10

NOTES:

1. For doubler plate details, see "Tower Shaft Details No. 10" sheet.
2. For longitudinal stiffener spacing and size, see "Tower Shaft Details No. 3" and "Tower Shaft Details No. 7" sheets.
3. Seal weld all around doubler plate opening. For details, see "Tower Shaft Details No. 10" sheet.
4. Doubler plate cope is only located at tower cross bracing elevations. For tower cross bracing details, see "Tower Strut Details No. 9" sheet.
5. Cope doubler plate as necessary to accommodate cross bracing gusset plate.
6. Bolts for tower strut connection not shown for clarity. For tower strut connection details, see "Tower Strut Details" sheets.
7. For bolt layout, see "Tower Strut Facade Details" sheet.
8. For Reference Line definition, see "Tower Strut Facade Details" sheets.
9. At the Contractor's option and subject to the approval of the Engineer, cope width may be enlarged to facilitate installation of gusset plate to skin plate, provided that the enlarged cope is filled with insert plates joined by CJP welds to the doubler plate and the gusset plate.

1. Weld of the longitudinal stiffener to the tower shaft skin plates beyond the length indicated shall be in accordance with Table 1 in "Tower Splice Details No.2" sheet.
2. Perimeter of exterior splice plates shall be caulked.
3. Longitudinal stiffener splice plates shall be A709M HPS 485W steel.
4. Dimension shall be increased by 25 mm for (E1), (E2), (E3) to account for shim plate between skin plate and interior splice plate.
5. For elevation of end of stiffener PL see "Tower Shaft Details No.7" sheet.

CONTRACT CHANGE ORDER MEMORANDUM

DC-CEM-4903 (OLD HC-39 REV. 6/93) CT# 7541-3544-0

DATE: 3/16/2010

TO Pete Siegenthaler, Principal TE	FILE 04-0120F4 04-SF-80-13.2/13.9
FROM Gary Pursell, STE / Richard Morrow, SBE	
CCO NO. **62** / SUPPLEMENT NO. **0** / CATEGORY CODE **CHPA**	CONTINGENCY BALANCE (including this change) **$8,014,909.40**
$0.00 INCREASE ☒ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? YES ☐ NO ☒
SUPPLEMENTAL FUNDS PROVIDED $	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? YES ☒ NO ☐
CCO DESCRIPTION: Tower Doubler Plates and Splice Corner Plates	**PROJECT DESCRIPTION** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time	Time Adj.: This Change	Previously Approved CCO Time Adjustments	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**227** Day(s)	**9** %	**6**

THIS CHANGE ORDER PROVIDES FOR:

1. Enlarging doubler plate cope, weld cross bracing to skin plate, and restoring doubler plate to original dimensions.
2. Deleting cap screws, connecting the cover plates to the skin plates, that conflict with exterior tower corner splice cap screws.
3. Revising tower plan sheets in order to incorporate minor clarifications addressed in Department responses to Contractor Requests for Information (RFI's) 215, 478, 478R1, 618, 708, 708R1, 826, 995, 1028, 1047, 1054, 1145, 1149, 1149R1, 1254, 1327 and 1333.

The above listed changes are not addressed in the contract documentation and are being made for the following, respectively:

1. This change allows the doubler plate to be welded to the tower skin plate, prior to shaft assembly, in order to control skin plate distortion. Doubler plate cope shall be enlarged, to provide access for welding cross bracing to skin plate, and then be restored to its original dimensions.
2. Cap screws, installed along the exterior corners of the tower, that intrude on other cap screws shall be deleted to alleviate this conflict.
3. The Contractor and the Department have agreed to address RFI tower clarification issues, primarily involving plate and bolt spacing dimensions, by issuing revised plan sheets.

This work is not covered by any contract items. Therefore, payment for this work will be at Adjustment of Compensation at Lump Sum Price for the amount of $241,251.00. Since the cost, of $241,251.00 in this change, is included in Contract Change Order 108 Supplement 1 (CCO 108S1) Claim Settlement Report No. 1 resolution costs the net payment in this change order is zero.

A determination of the delay in completion of the contract due to work specified by this change order, has been made in CCO 108S1 and is part of the Claims Settlement Report (CSR) No. 1 for this project. Therefore, no adjustment of time is warranted by reason of this change order.

This change order received concurrences from Gary Pursell (Resident Engineer), Rick Morrow (Structure Rep.), Patrick Treacy (HQ Liaison), Peter Siegenthaler (Principal Engineer), Marwan Nader (Design of Record), Wenyi Long (OSCM Oversight), Lina Ellis (OSMI Oversight) and Ken Terpstra (Project Manager).

Claims Settlement Report (CSR) No. 1, for this project, revises the authority to "Issue and Approve" the changes listed in CCO 108S1 Appendices A & B. The authority to "Issue and Approve" the changes listed in Appendices A & B for the values of time and money contemplated therein has been delegated to the District for approval and approval of each of these change orders by the Headquarters CCO Desk will not be required. Since this change order is included in CCO 108S1 no Headquarters CCO Desk "Issue and Approve" is required, a copy of CCO 108S1 is attached for reference.

NOTES:

1. The tower splice connections are designed as slip critical connections with class B contact surface (slip coefficient 0.5). The Contractor shall ensure that the flatness requirements are met at the faying surfaces.
2. Silicone caulk sealing shall be applied around the perimeter (horizontal and vertical edges) of all exterior splice plates.
3. Skin plate splice seam not covered by exterior splice plate shall be covered by cover plate and secured by cap screws with 8 mm all-around silicone caulk sealing (see Detail H). Corner CD is shown in Detail H. Corners AB, BC, DE and EA similar.
4. Elevation view of adjacent skin plate not shown for clarity.

5. Whenever it is not practicable to have two screw rows, stagger the screw pattern using 3 bolts may be used subject to the approval of the Engineer.
6. Wherever it is not practicable to have cap screws, the cover plate shall be fillet seal welded to the splice plate.

STATE OF CALIFORNIA - DEPARTMENT OF TRANSPORTATION

CONTRACT CHANGE ORDER

Change Requested by: Engineer

CCO: 63 **Suppl. No. 0** **Contract No. 04 – 0120F4** **Road** SF-80-13.2/13.9 **FED. AID LOC.:**

To: **AMERICAN BRIDGE/FLUOR ENTERPRISES INC A JOINT VENTURE**

You are directed to make the following changes from the plans and specifications or do the following described work not included in the plans and specifications for this contract. ***NOTE: This change order is not effective until approved by the Engineer.***

Description of work to be done, estimate of quantities and prices to be paid. (Segregate between additional work at contract price, agreed price and force account.) Unless otherwise stated, rates for rental of equipment cover only such time as equipment is actually used and no allowance will be made for idle time. This last percentage shown is the net accumulated increase or decrease from the original quantity in the Engineer's Estimate.

Adjustment of Compensation at Lump Sum Price:

ITEM 1.

Within the tower shaft, modify the longitudinal stiffeners, additional field welding channels in the diaphragm and cut holes in the diaphragm as shown on sheets two (2) through seven (7) of this change order. The following revised contract plan sheets detail all changes: 0546R2, 0556R2, 0583R2, 0590R1, 0591R1 and 0592R2 (of 1204).

This change order resolves the costs associated with Contractor Request For Information (RFI) Nos. 262, 262R1, 399, 544, 544R1, 885 and 1023 with respect to changes listed above.

For this work, the Contractor will receive a lump sum price of $700,000.00. This sum constitutes full and complete compensation for furnishing all labor, material, tools and incidentals including all markups by reason of this change.

Adjustment of Compensation at Lump Sum Price..... $700,000.00

ITEM 2.

The items identified above in this change order have been paid as part of CCO 108 resolution. Therefore, the amount due under this change order will be adjusted by the amount paid under CCO 108 to prevent a double payment. Total amount paid under CCO 108, and to be credited to this change, is $700,000.00.

Adjustment of Compensation at Lump Sum Price..... <$700,000.00>

CHANGE ORDER COST AND TIME SUMMARY

(ITEM 1) Adjustment of Compensation for work pursuant to this change order	$700,000.00
(ITEM 2) Amount paid under CCO 108 for this change order	<$700,000.00>
Total net pay for this change order	$0.00

Contract time is addressed in CCO 108 for all work identified in this change order. Therefore contract time will not be adjusted in this change order.

Estimated Cost: **Increase** ☒ **Decrease** ☐ **$0.00**

By reason of this order the time of completion will be adjusted as follows: **0 days**

Submitted by

Signature [signature] **Resident Engineer** Mark Woods for Gary Pursell, Sup.T.E. **Date** 10 Feb 2010

Approval Recommended by

Signature [signature] **Supervising Transportation Engineer** Gary Pursell, Sup.T.E. **Date** 2/10/10

Engineer Approval by

Signature [signature] **Supervising Transportation Engineer** Gary Pursell, Sup.T.E. **Date** 2/23/10

We the undersigned contractor, have given careful consideration to the change proposed and agree, if this proposal is approved, that we will provide all equipment, furnish the materials, except as otherwise be noted above, and perform all services necessary for the work above specified, and will accept as full payment therefor the prices shown above.

NOTE: If you, the contractor, do not sign acceptance of this order, your attention is directed to the requirements of the specifications as to proceeding with the ordered work and filing a written protest within the time therein specified.

Contractor Acceptance by

Signature [signature] (Print name and title) Michael D. Flowers Project Director **Date** 2-22-10

NOTES:

1. Weld of the longitudinal stiffener to the tower shaft skin plates beyond the length indicated shall be in accordance with Table I in "Tower Splice Details No. 2" sheet.
2. Perimeter of exterior splice plates shall be caulked.
3. Longitudinal stiffener splice plates shall be A709M HPS 485W steel.
4. Dimension shall be increased by 25 mm for (E1), (E2), (E3) (E5) to account for shim plate between skin plate and interior splice plate.
5. For elevation of end of stiffener PL see "Tower Shaft Details No. 7" sheet.

$0.00 INCREASE ☐ DECREASE ☐	HEADQUARTERS APPROVAL REQUIRED? YES ☐ NO ☒
SUPPLEMENTAL FUNDS PROVIDED $	IS THIS REQUEST IN ACCORDANCE WITH ENVIRONMENTAL DOCUMENTS? YES ☒ NO ☐
CCO DESCRIPTION: Tower Internal Shaft	**PROJECT DESCRIPTION** CONSTRUCT SELF-ANCHORED SUSPENSION BRIDGE

Original Contract Time	Time Adj.: This Change	Previously Approved CCO Time Adjustments	Percentage Time Adjusted: (including this change)	Total # of Unreconciled Deferred Time CCO(s): (including this change)
2490 Day(s)	**0** Day(s)	**227** Day(s)	**9** %	**6**

THIS CHANGE ORDER PROVIDES FOR:

Modifying the longitudinal stiffeners, additional field welded channels in the diaphragm, and cutting holes in the diaphragm within the tower shaft. This change revises the following contract plan sheets: 0546R2, 0556R2, 0583R2, 0590R1, 0591R1 and 0592R2 (of 1204).

This change order is needed to resolves Contractor Requests for Information (RFI) Nos. 262, 262R1, 399, 544, 544R1, 885 and 1023 with respect to changes listed above. These resolved RFI's address minor conflicts and other issues identified in the interior of the tower.

This work is not covered by any contract items. Therefore, payment for this work will be at Adjustment of Compensation at Lump Sum Price for the amount of $700,000.00. Since the cost, of $700,000.00 in this change, is included in Contract Change Order 108 Supplement 1 (CCO 108S1) Claim Settlement Report No. 1 resolution costs the net payment in this change order is zero.

A determination of the delay in completion of the contract due to work specified by this change order, has been made in CCO 108S1 and is part of the Claims Settlement Report (CSR) No. 1 for this project. Therefore, no adjustment of time is warranted by reason of this change order.

This change order received concurrence from Gary Pursell (Resident Engineer), Rick Morrow (Sup. Structure Rep), Peter Siegenthaler (Principal TE), Rich Foley (HQ Oversight), Ken Terpstra (Project Manager), Richard Land (Chief Engineer), Jon Tapping (HQ Coordinator), Tony Anziano (Toll Bridge Program Manager), Brian Maroney (Project Engineer), Wenyi Long (Design Oversight), and Lina Ellis (Structure Maintenance).

Claims Settlement Report (CSR) No. 1, for this project, revises the authority to "Issue and Approve" the changes listed in CCO 108S1 Appendices A & B. The authority to "Issue and Approve" the changes listed in Appendices A & B for the values of time and money contemplated therein has been delegated to the District for approval and approval of each of these change orders by the Headquarters CCO Desk will not be required. Since this change order is included in CCO 108S1 no Headquarters CCO Desk "Issue and Approve" is required, a copy of CCO 108S1 is attached for reference.
