

State Route 76 East Segment Project

South Mission Road to Interstate 15

The Project

The SR 76 East Segment Project is the last segment in the construction of a four-lane conventional highway that connects I-5 and I-15 through the City of Oceanside, and the unincorporated communities of Bonsall and Fallbrook. This segment's project area is from South Mission Road to just east of I-15. This will complete one of the high-priority transportation projects included in the region's *TransNet* Early Action Program.

Project Schedule

Phase 1: Interchange completed
October 2012 – August 2013

Phase 2: Roadway construction
Fall 2014 – Summer 2017

Goals

The goals of this project are to relieve existing and future traffic congestion, implement safety improvements, and protect and enhance the natural environment.

Traffic

The current traffic volume on SR 76 between South Mission Road and I-15 is approximately 20,000 average daily trips. Planned growth will increase the traffic volume to approximately 46,000 average daily trips by the year 2030. Once completed, this project will efficiently handle increased traffic and improve motorist safety.

Progress

The first phase of the project improved the interchange at SR 76 and I-15 and opened to traffic in August 2013. The second phase widened SR 76 to a four-lane highway from South Mission Road to the newly improved SR 76/I-15 interchange. Construction began in November 2014 and the project will be completed in summer 2017.

Budget

The estimated total project cost is \$202 million, and is funded with a mix of funds: the regional *TransNet* half-cent sales tax for transportation, federal funds, developer fees, County of San Diego Transportation Impact Fee, and Native American tribes' contributions.
