Oakland, California 94623-0660

Subject: Species List for Project on State Route 121 in Napa County, California

Dear Mr. Morton:

We are sending the enclosed list in response to your February 20, 2004, request for information about endangered and threatened species (Enclosure A). This list fulfills the requirement of the Fish and Wildlife Service (Service) to provide species lists under section 7(c) of the Endangered Species Act of 1973, as amended (Act).

The animal species on the Enclosure A quad list are those species we believe may occur within, or be affected by projects within, the following USGS quads, where your project is planned: Cuttings Wharf, Sonoma and Napa Quads.

Any plants on the quad list are ones that have actually been observed in the project quad(s). Plants may occur in a quad without having been observed there. Therefore we have included a species list for the whole county in which your project occurs. We recommend that you survey for any relevant plants shown on this list.

Fish and other aquatic species appear on your list if they are in the same watershed as your quad or if water use in your quad might affect them. Amphibians will be on the list for a quad or county if pesticides applied in that area may be carried to their habitat by air currents.

Executive Order 13186, January 17, 2001, directs Federal agencies to take specific steps to conserve migratory birds. Species of Concern (see below) are specifically included in this
Executive Order 13186, January 17, 2001, directs Federal agencies to take specific steps to conserve migratory birds. *Species of Concern* (see below) are specifically included in this Executive Order. (The Order can be found at www.nara.gov/fedreg/eo.html) Birds are shown on our species lists regardless of whether they are resident or migratory. Relevant birds on the county list should be considered regardless of whether they appear on a quad list.

If a species has been listed as threatened or endangered by the State of California, but not by its nor by the National Marine Fisheries Service, it will appear on your list as a Species of Concern.

*However you must contact the California Department of Fish and Game for official information about these species.* Call (916) 322-2493 or write Marketing Manager, California Department of Fish and Game, Natural Diversity Data Base, 1416 Ninth Street, Sacramento, California 95814.

Some of the species listed in Enclosure A may not be affected by the proposed action. A trained biologist or botanist, familiar with the habitat requirements of the listed species, should determine whether these species or habitats suitable for them may be affected. For plants, we recommend using the enclosed Guidelines for Conducting and Reporting Botanical Inventories for Federally Listed, Proposed and Candidate Species (Enclosure C).

Some pertinent information concerning the distribution, life history, habitat requirements, and published references for the listed species is available upon request. This information may be helpful in preparing the biological assessment for this project, if one is required. Please see Enclosure B for a discussion of the responsibilities Federal agencies have under section 7(c) of the Act and the conditions under which a biological assessment must be prepared by the lead Federal agency or its designated non-Federal representative.

Formal consultation, under 50 CFR § 402.14, should be initiated if you determine that a listed species may be affected by the proposed project. If you determine that a proposed species may be adversely affected, you should consider requesting a conference with our office under 50 CFR § 402.10. Informal consultation may be utilized prior to a written request for formal consultation to exchange information and resolve conflicts with respect to a listed species. If a biological assessment is required, and it is not initiated within 90 days of your receipt of this letter, you should informally verify the accuracy of this list with our office.

When a species is listed as endangered or threatened, areas of habitat considered essential to its conservation may be designated as *critical habitat*. These areas may require special management considerations or protection. They provide needed space for growth and normal behavior; food, water, air, light, other nutritional or physiological requirements; cover or shelter; and sites for breeding, reproduction, rearing of offspring, germination or seed dispersal. Although critical habitat may be designated on private or State lands, activities on these lands are not restricted unless there is Federal involvement in the activities or direct harm to listed wildlife.
If any species has proposed or designated critical habitat within a quad, this will be noted on the species list. Maps and boundary descriptions of the critical habitat may be found in the Federal Register. The information is also reprinted in the Code of Federal Regulations (50 CFR 17.95).

Candidate species are being reviewed for possible listing. Contact our office if your biological assessment reveals any candidate species that might be adversely affected. Although they currently have no protection under the Endangered Species Act, one or more of them could be proposed and listed before your project is completed. By considering them from the beginning, you could avoid problems later.

Your list may contain a section called Species of Concern. This term includes former category 2 candidate species and other plants and animals of concern to the Service and other Federal, State and private conservation agencies and organizations. Some of these species may become candidate species in the future.

If the proposed project will impact wetlands, riparian habitat, or other jurisdictional waters as defined by the U.S. Army Corps of Engineers (Corps), a Corps permit will be required, under section 404 of the Clean Water Act and/or section 10 of the Rivers and Harbors Act. Impacts to wetland habitats require site specific mitigation and monitoring. You may request a copy of the Service’s General Mitigation and Monitoring Guidelines or submit a detailed description of the proposed impacts for specific comments and recommendations. If you have any questions regarding wetlands, contact Mark Littlefield at (916) 414-6580.

Please contact Dan Buford at (916) 414-6625, if you have any questions about the attached list or your responsibilities under the Endangered Species Act. For the fastest response to species list requests, address them to the attention of Species Lists at this address. You may fax requests to 414-6712 or 414-6713. You may also email them to harry_mossman@fws.gov.

Sincerely,

Catrina Martin
Deputy Assistant Field Supervisor

ENCLOSURE A
Endangered and Threatened Species that May Occur in or be Affected by
Projects in the Area of the Following California Counties
Reference File No. 1-1-04-SP-1004
February 24, 2004

NAPA COUNTY

Listed Species

Mammals
  salt marsh harvest mouse, *Reithrodontomys raviventris* (E)

Birds
  California brown pelican, *Pelecanus occidentalis californicus* (E)
  California clapper rail, *Rallus longirostris obsoletus* (E)
  California least tern, *Sternula antillarum (=albifrons) browni* (E)
  bald eagle, *Haliaeetus leucocephalus* (T)
  northern spotted owl, *Strix occidentalis caurina* (T)
  western snowy plover, *Charadrius alexandrinus nivosus* (T)

Reptiles
  giant garter snake, *Thamnophis gigas* (T)

Amphibians
  California red-legged frog, *Rana aurora draytonii* (T)

Fish
  Central California Coastal steelhead, *Oncorhynchus mykiss* (T) NMFS
  Central Valley spring-run chinook salmon, *Oncorhynchus tshawytscha* (T) NMFS
  Critical habitat, coho salmon - central CA coast, *Oncorhynchus kisutch* (T) NMFS
  Critical habitat, winter-run chinook salmon, *Oncorhynchus tshawytscha* (E) NMFS
  coho salmon - central CA coast, *Oncorhynchus kisutch* (T) NMFS
  delta smelt, *Hypomesus transpacificus* (T)
  tidewater goby, *Eucyclogobius newberryi* (E)
  winter-run chinook salmon, *Oncorhynchus tshawytscha* (E) NMFS

Invertebrates
  California freshwater shrimp, *Syncaris pacifica* (E)
  Conservancy fairy shrimp, *Branchinecta conservatio* (E)
  Critical habitat, vernal pool invertebrates, (X)
  callippe silverspot butterfly, *Speyeria callippe callippe* (E)
  valley elderberry longhorn beetle, *Deutomeros californicus dimorphus* (T)
  vernal pool fairy shrimp, *Branchinecta lynchii* (T)
Plants

Calistoga allocarya (popcorn-flower), Plagiobothrys strictus (E)
Clara Hunt's milk-vetch, Astragalus clarianus (E)
Contra Costa goldfields, Lasthenia conjugens (E)
Critical habitat, vernal pool plants, (X)
Napa bluegrass, Poa napensis (E)
Sebastopol meadowfoam, Limnanthes vinculans (E)
Tiburon paintbrush, Castilleja affinis ssp. neglecta (E)
few-flowered navarretia, Navarretia leucocephala ssp. pauciflora (E)
showy Indian clover, Trifolium amoenum (E) *
soft bird's-beak, Cordylanthus mollis ssp. mollis (E)

Proposed Species

Amphibians

California tiger salamander, Ambystoma californiense (PT)

Candidate Species

Birds

Western yellow-billed cuckoo, Coccyzus americanus occidentalis (C) *

Fish

Central Valley fall/late fall-run chinook salmon, Oncorhynchus tshawytscha (C) NMFS
Critical habitat, Central Valley fall/late fall-run chinook, Oncorhynchus tshawytscha (C) NMFS
green sturgeon, Acipenser medirostris (C)

Species of Concern

Mammals

Pacific western big-eared bat, Corynorhinus (=Plecotus) townsendii townsendii (SC)
San Joaquin pocket mouse, Perognathus inornatus (SC)
Suisun ornate shrew, Sorex ornatus sinuosus (SC)
Yuma myotis bat, Myotis yumanensis (SC)
fringed myotis bat, Myotis thysanodes (SC)
greater western mastiff-bat, Eumops perotis californicus (SC)
long-eared myotis bat, Myotis evotis (SC)
long-legged myotis bat, Myotis volans (SC)

Birds

Allen's hummingbird, Selasphorus sasin (SC)
American bittern, Botaurus lentiginosus (SC)
American peregrine falcon, Falco peregrinus anatum (D)
Bell's sage sparrow, Amphispiza belli belli (SC)
California thrasher, *Toxostoma redivivum* (SC)
San Pablo song sparrow, *Melospiza melody samuelis* (SC)
Vaux’s swift, *Chaetura vauxi* (SC)
black rail, *Laterallus jamaicensis coturniculus* (CA)
ferruginous hawk, *Buteo regalis* (SC)
little willow flycatcher, *Empidonax traillii brewsteri* (CA)
loggerhead shrike, *Lanius ludovicianus* (SC)
long-billed curlew, *Numenius americanus* (SC)
mARBled godwit, *Limosa feda* (SC)
mountain plover, *Charadrius montanus* (SC)
oak titmouse, *Baeolophus inornatus* (SLC)
olive-sided flycatcher, *Contopus cooperi* (SC)
rufous hummingbird, *Selasphorus rufus* (SC)
saltmarsh common yellowthroat, *Geothlypis trichas sinuosa* (SC)
tricolored blackbird, *Agelaius tricolor* (SC)
western burrowing owl, *Athene cunicularia hypugaea* (SC)
whimbrel, *Numenius phaeopus* (SC)
white-faced ibis, *Plegadis chihi* (SC)
white-tailed (=black shouldered) kite, *Elanus leucurus* (SC)

Reptiles

California horned lizard, *Phrynosoma coronatum frontale* (SC)
northwestern pond turtle, *Clemmys marmorata marmorata* (SC)

Amphibians

Northern red-legged frog, *Rana aurora aurora* (SC)
foothill yellow-legged frog, *Rana boylii* (SC)
western spadefoot toad, *Spea hammondii* (SC)

Fish

Pacific lamprey, *Lampetra tridentata* (SC)
Sacramento splittail, *Pogonichthys macrolepidotus* (SC)
longfin smelt, *Spirinchus thaleichthys* (SC)
river lamprey, *Lampetra ayresi* (SC)

Invertebrates

California linderiella fairy shrimp, *Linderiella occidentalis* (SC)
Ricketson’s water scavenger beetle; *Hydrochara ricketsonii* (SC)
Sonoma arctic skipper, *Carterocephalus palaemon ssp.* (SC)

Plants

Baker’s narvarretia, *Navarretia leucocephala ssp. bakeri* (SC)
Brewer’s dwarf-flax (=western flax), *Hesperolinon breweri* (SC)
Calistoga ceanothus, *Ceanothus divergens* (SC)
Cobb Mountain lupine, *Lupinus sericus* (SLC)
Colusa layia (=Colusa tidytips), *Layia septentrionalis* (SLC)
Contact (Socrates) Mine jewelflower, *Streptanthus brachiatius ssp. brachiatius* (SC)
Gairdner’s yampah, *Perideridia gairdneri ssp. gairdneri* (SC)
Hall’s madia (=Hall’s harmonia), *Madia hallii (=Harmonia hallii)* (SC)
Jepson’s linanthus, *Linanthus jepsonii* (SLC)
Jepson’s milk-vetch, *Astragalus rattanii var jepsonianus* (SLC)
Kruckeberg’s jewelflower, *Streptanthus morrisonii ssp. kruckebergii* (SC)
Marin County navarretia (=San Anselmo navarretia), *Navarretia rosulata* (SLC)
Marin checkermallow (=checkerbloom), *Sidalcea hickmanii ssp. viridis* (SLC)
Marin knotweed, *Polygonum marinense* (SLC)
Mason’s lilaeopsis, *Lilaeopsis masonii* (SC)
Mt. Saint Helena morning-glory, *Calystegia collina ssp. oxyphylla* (SLC)
Napa false indigo, *Amorpha californica var. napensis* (SLC)
Napa western flax, *Hesperolinon serpentinum* (SC)
Northern California black walnut, *Juglans californica var. hindsii* (SC)
Pacific cordgrass (=California cordgrass), *Spartina foliosa* (SLC)
Rincon Ridge ceanothus, *Ceanothus confusus* (SC)
San Joaquin spearscale (=saltbush), *Atriplex joaquiniana* (SC)
Snow Mountain buckwheat, *Eriogonum nervulosum* (SC)
Sonoma ceanothus, *Ceanothus sonomensis* (SC)
St. Helena fawn lily, *Erythronium helenae* (SLC)
Suisun Marsh aster, *Aster lentus* (SC)
Three Peaks jewelflower, *Streptanthus morrisonii ssp. elatus* (SC)
Tiburon buckwheat, *Eriogonum caninum* (SLC)
adobe lily, *Fritillaria pluriflora* (SC)
alcali milk-vetch, *Astragalus tener var. tener* (SC)
bent-flowered fiddleneck, *Amsinckia lunaris* (SLC)
big-scale (=California) balsamroot, *Balsamorhiza macrolepis var macrolepis* (SLC)
delta tule-pea, *Lathyris jeponii var. jeponii* (SC)
drymaria dwarf-flax (=western flax), *Hesperolinon drymaroides* (SC)
green (=serpentine) jewel-flower, *Streptanthus breweri var hesperidis (=S. hesperidii)* (SLC)
holly-leaved ceanothus, *Ceanothus purpureus* (SLC)
legener, *Legenera limosa* (SC)
narrow-anthered California brodiaea, *Brodiaea californica var leptandra* (SLC)
narrow-leaved daisy (=serpentine fleabane), *E*rigeron angustatus* (SLC)
pink creamsacs, *Castilleja rubicundula* ssp. *rubicundula* (SLC)
robust monardella (=robust coyote mint), *Monardella villosa* ssp *globosa* (SLC)
salt marsh owl’s clover (=johnny-nip), *Castilleja ambigua* ssp. *ambigua* (SLC)
serpentine (=Cleveland’s) cryptantha, *Cryptantha clevelandii* (SLC)
two-carpeled dwarf-flax (=western flax), *Hesperolinon bicarpellatum* (SC)
water sack (=saline) clover, *Trifolium depauperatum var. hydrophilum* (SC)
water-loving checkermallow (=marsh checkerbloom), *Sidalcea oregana* ssp. *hydrophila* (SC)

KEY:

(E) **Endangered** Listed (in the Federal Register) as being in danger of extinction.
(T) **Threatened** Listed as likely to become endangered within the foreseeable future.
(P) **Proposed** Officially proposed (in the Federal Register) for listing as endangered or threatened.
(PX) **Proposed Critical Habitat** Proposed as an area essential to the conservation of the species.
(C) **Candidate** Candidate to become a proposed species.
(SC) **Species of Concern** Other species of concern to the Service.
(SLC) **Species of Local Concern** Species of local or regional concern or conservation significance.
(D) **Delisted** Delisted. Status to be monitored for 5 years.
(CA) **State-Listed** Listed as threatened or endangered by the State of California.
NMFS **NMFS species** Under jurisdiction of the National Marine Fisheries Service. Contact them directly.
* **Extirpated** Possibly extirpated from the area.
** **Extinct** Possibly extinct
*Critical Habitat* Area essential to the conservation of a species.

FEDERAL AGENCIES' RESPONSIBILITIES UNDER
SECTIONS 7(a) and (c) OF THE ENDANGERED SPECIES ACT

SECTION 7(a) Consultation/Conference

Requires: (1) Federal agencies to utilize their authorities to carry out programs to conserve endangered and threatened species; (2) Consultation with FWS when a Federal action may affect a listed endangered or threatened species to insure that any action authorized, funded, or carried out by a Federal agency is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of critical habitat. The process is initiated by the Federal agency after determining the action may affect a listed species; and (3) Conference with FWS when a Federal action is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat.

SECTION 7(c) Biological Assessment-Major Construction Activity

Requires Federal agencies or their designees to prepare a Biological Assessment (BA) for major construction activities. The BA analyzes the effects of the action on listed and proposed species. The process begins with a Federal agency requesting from FWS a list of proposed and listed threatened and endangered species. The BA should be completed within 180 days after its initiation (or within such a time period as is mutually agreeable). If the BA is not initiated within 90 days of receipt of the list, the accuracy of the species list should be informally verified with our Service. No irreversible commitment of resources is to be made during the BA process which would foreclose reasonable and prudent alternatives to protect endangered species. Planning, design, and administrative actions may proceed; however, no construction may begin.

We recommend the following for inclusion in the BA: an on-site inspection of the area affected by the proposal which may include a detailed survey of the area to determine if the species or suitable habitat is present; a review of literature and scientific data to determine species’ distribution, habitat needs, and other biological requirement; interviews with experts, including those within FWS, State conservation departments, universities and others who may have data not yet published in scientific literature; an analysis of the effects of the proposal on the species in terms of individuals and populations, including consideration of indirect effects of the proposal on the species and its habitat; an analysis of alternative actions considered. The BA should document the results, including a discussion of study methods used, and problems

---

1A construction project (or other undertaking having similar physical impacts) which is a major federal action significantly affecting the quality of the human environment as referred to in NEPA (42 U.S.C. 4332(2)(C).

2"Effects of the action" refers to the direct and indirect effects of an action on the species or critical habitat, together with the effects of other activities that are interrelated or interdependent with that action.
Enclosure C

GUIDELINES FOR CONDUCTING AND REPORTING BOTANICAL INVENTORIES FOR FEDERALLY LISTED, PROPOSED AND CANDIDATE PLANTS

(September 23, 1996)

These guidelines describe protocols for conducting botanical inventories for federally listed, proposed and candidate plants, and describe minimum standards for reporting results. The Service will use, in part, the information outlined below in determining whether the project under consideration may affect any listed, proposed or candidate plants, and in determining the direct, indirect, and cumulative effects.

Field inventories should be conducted in a manner that will locate listed, proposed, or candidate species (target species) that may be present. The entire project area requires a botanical inventory, except developed agricultural lands. The field investigator(s) should:

1. Conduct inventories at the appropriate times of year when target species are present and identifiable. Inventories will include all potential habitats. Multiple site visits during a field season may be necessary to make observations during the appropriate phenological stage of all target species.

2. If available, use a regional or local reference population to obtain a visual image of the target species and associated habitat(s). If access to reference populations(s) is not available, investigators should study specimens from local herbaria.

3. List every species observed and compile a comprehensive list of vascular plants for the entire project site. Vascular plants need to be identified to a taxonomic level which allows rarity to be determined.

4. Report results of botanical field inventories that include:
   a. a description of the biological setting, including plant community, topography, soils, potential habitat of target species, and an evaluation of environmental conditions, such as timing or quantity of rainfall, which may influence the performance and expression of target species.
   b. a map of project location showing scale, orientation, project boundaries, parcel size, and map quadrangle name.
   c. survey dates and survey methodology(ies).
   d. if a reference population is available, provide a written narrative describing the target species reference population(s) used, and date(s) when observations were made.
   e. a comprehensive list of all vascular plants occurring on the project site for each habitat type.
f. current and historic land uses of the habitat(s) and degree of site alteration.

g. presence of target species off-site on adjacent parcels, if known.

h. an assessment of the biological significance or ecological quality of the project site in a local and regional context.

5. If target species is(are) found, report results that additionally include:

a. a map showing federally listed, proposed and candidate species distribution as they relate to the proposed project.

b. if target species is (are) associated with wetlands, a description of the direction and integrity of flow of surface hydrology. If target species is (are) affected by adjacent off-site hydrological influences, describe these factors.

c. the target species phenology and microhabitat, an estimate of the number of individuals of each target species per unit area; identify areas of high, medium and low density of target species over the project site, and provide acres of occupied habitat of target species. Investigators could provide color slides, photos or color copies of photos of target species or representative habitats to support information or descriptions contained in reports.

d. the degree of impact(s), if any, of the proposed project as it relates to the potential unoccupied habitat of target habitat.

6. Document findings of target species by completing California Native Species Field Survey Form(s) and submit form(s) to the Natural Diversity Data Base. Documentation of determinations and/or voucher specimens may be useful in cases of taxonomic ambiguities, habitat or range extensions.

7. Report as an addendum to the original survey, any change in abundance and distribution of target plants in subsequent years. Project sites with inventories older than 3 years from the current date of project proposal submission will likely need additional survey. Investigators need to assess whether an additional survey(s) is (are) needed.

8. Adverse conditions may prevent investigator(s) from determining presence or identifying some target species in potential habitat(s) of target species. Disease, drought, predation, or herbivory may preclude the presence or identification of target species in any year. An additional botanical inventory(ies) in a subsequent year(s) may be required if adverse conditions occur in a potential habitat(s). Investigator(s) may need to discuss such conditions.
9. Guidance from California Department of Fish and Game (CDFG) regarding plant and plant community surveys can be found in Guidelines for Assessing the Effects of Proposed Developments on Rare and Endangered Plants and Plant Communities, 1984. Please contact the CDFG Regional Office for questions regarding the CDFG guidelines and for assistance in determining any applicable State regulatory requirements.
