Chapter 3 Coordination

Early and continuing coordination with the general public and appropriate public agencies is an essential part of the environmental process to determine the scope of environmental documentation, the level of analysis, potential impacts and mitigation measures and related environmental requirements. Agency consultation and public participation for this project will be accomplished through a variety of formal and informal methods, including project development team meetings, and interagency coordination meetings. This chapter summarizes these efforts. The objective is to fully identify, address and resolve project-related issues through early and continuing coordination.

The Initial Study-Proposed MND for the State Route 4 Discovery Bay Median Buffer Zone Safety Project was released for public review on October 5, 2007. A Notice of Availability for the environmental document was published in local newspapers. Copies of the environmental document were placed online, in public libraries, and at the Caltrans District 4 Office of Environmental Analysis. Copies of the environmental document were also sent to federal, state, regional, and local agencies and the residents of properties abutting the proposed project area. After forty-five days, the comment period closed on November 30, 2007. At the request of various individuals, the comment period was extended to December 6, 2007.

During a Discovery Bay Community Services District Board Meeting on December 7, 2007, Caltrans presented the project to the Board and attendees. Board members and attendees provided oral comments. The Board produced a transcript of the oral comments.
