FOR IMMEDIATE RELEASE

Traffic Lighting System Upgrade Project on State Route 82/84 in Various Cities (San Mateo County)

San Mateo County – The California Department of Transportation (Caltrans) began a Traffic Lighting System Improvement Upgrade Project in various cities in San Mateo County.

The proposed improvements in thirty three locations throughout the county include the installation of pedestrian crosswalk safety enhancements consisting of regulatory signs and warning signs with new traffic lighting systems. Longer mast arms will be provided to enhance visibility for pedestrians and motorists. Pedestrian Hybrid Beacons will be installed at some locations where additional enhancements are necessary. (American Disabilities Act) ramp upgrades to ADA standards will be included at various locations as part of this project.

Crews will work in various locations between the hours of 9:00 A.M. to 4:00 P.M. Monday through Friday. (Weather permitting) Some night work will be required.

One lane will remain open at all times on State Route 82 (El Camino Real) in both directions during construction. Motorists should allow for extra travel time and expect minor delays. Changeable Message Signs will be in place to warn motorists of this work.

Scheduled completion date of construction is end of June 2017.

NOTE: Residents and Businesses may notice increased noise from mandatory backup alarms while the contractor is working in the construction zone.
