

# Interstate 80 / San Pablo Dam Road Interchange Improvements

## PROJECT #7002

The Interstate 80/San Pablo Dam Road interchange provides access between residential areas north and east of the interchange and Bay Area employment centers. The interchange is currently experiencing severe peak hour congestion, resulting in extensive delays. Future traffic forecasts indicate that existing congestion is projected to increase, resulting in further deterioration of traffic operations. The project significantly benefits both vehicular and pedestrian/bicycle traffic by enhancing operations and safety within the interchange area.

## Did You Know?

The Hayward Fault crosses I-80 in the vicinity of the San Pablo Dam Road requiring special design for the bridge structure.

### SCHEDULE

PRELIMINARY STUDIES/PLANNING: Completed  
ENVIRONMENTAL CLEARANCE: Completed  
DESIGN (PHASE 1): Fall '11 - Fall '14  
RIGHT OF WAY (PHASE 1): Fall '11 - Fall '14  
CONSTRUCTION (PHASE 1): Spring '15 - Fall '16

### FUNDING PLAN

Source (\$ in millions)	Amount
Measure J	\$ 12.0
Subregional Transportation Fees (WCCTAC)	\$ 7.1
Local City Funds	\$ 3.0
State Transportation Improvement Program (STIP)	\$ 24.2

### DESCRIPTION

Reconstruct the existing I-80/San Pablo Dam Road interchange and provide improved pedestrian and bicycle facilities. Due to their close proximity, the project will also construct modifications to the ramps at El Portal Drive and McBryde Avenue.

To match available funding the project will be completed in two phases. The first phase will relocate El Portal Drive on-ramp to Westbound I-80 to the north, extend the auxiliary lane along Westbound I-80 between San Pablo Dam Road off-ramp and El Portal Drive on-ramp, and reconstruct the Riverside Ave pedestrian overcrossing. Remaining improvements will be completed as part of the second phase.

### STATUS

Final design and right-of-way clearance activities are underway. Phase 1 is targeted for construction in early 2015.
