- 13 Disabled Veteran Business Enterprises
- 31 Micro Businesses

- » \$37.7 Million Paid Small Businesses Subcontractors & Vendors

- CP 2-3

- » 9 Small Businesses Working

*As of May 31, 2016

July Construction Update

FRESNO, Calif. – Hard work is paying off at the high-speed rail project sites in the Central Valley. Since the start of construction more than a year ago, the project now has seven active sites with more to come this fall. In this month's construction update we showcase multiple images that highlight the progress we are making to build high-speed rail. For more pictures and continuous updates on construction, visit BuildHSR.com. For road closure information visit Caltrans QuickMap.

Fresno River Viaduct

Near Madera

The first glimpses of a finished product can be seen at the Fresno River Viaduct in Madera County. A long section of the viaduct is now free-standing after the "falsework" or support structure was removed. Concrete continues to be poured to finish the bridge deck on both sides of SR-145. Work to cross the highway will begin soon as will construction of the abutments.

Tuolumne Bridge Construction

Downtown Fresno

After more than 40 girders were placed in June, workers are now focused on the bridge deck at the Tuolumne Bridge in downtown Fresno. Form work is underway to create a mold for the bridge deck. Crews are working to complete this portion of the bridge by October.

State Route 99 Realignment

Central Fresno

These two photos show major progress in the early work at the southbound State Route 99 off-ramp to Golden State Blvd. This is part of the SR-99 Realignment project. Paving at Ashlan Avenue is also complete. Caltrans will soon close the Clinton Avenue off-ramp as it makes preparations to tear down and rebuild the bridge there.
