

Caltrans District 9 Bicycle Guide

SR 182

Description:

SR 182 is a 2-lane conventional highway with narrow shoulders. The route begins at its junction with US 395 in the community of Bridgeport and traverses north to the Nevada state line. The highway is a shared roadway which has rolling grades and winding road geometry with very light traffic. The highway parallels the East Walker River and meanders through the shallow canyon formed by the river which separates the Sweetwater Mountains to the west from the Bodie Hills to the east. The rural, low mountain/high desert scenery is noteworthy along this route.
