1. Bend steel plates to conform to shape of concrete barrier.
2. For barrier, galvanize all metal hardware after fabrication.
3. External plate edges to be rounded (R = 1/2").
4. Not all reinforcement is shown for clarity.

NOTES:
- Bend steel plates to conform to shape of concrete barrier.
- For barrier, galvanize all metal hardware after fabrication.
- External plate edges to be rounded (R = 1/2").
- Not all reinforcement is shown for clarity.
