The solid or dashed lines representing the traffic line designation, use quotation marks.

As a "best practice", pavement markings (words and numerals) are shown by spelling out the word or numeral using a callout. A "dot" with a leader line represents the location of the pavement marking.

Other methods of identifying words and numerals are not as easily distinguished on the plan sheet.

ROUTE 65 BYPASS PROJECT.

The important point is that the proposed striping will stand out on the plan sheet.
