FOR IMMEDIATE RELEASE

###UPDATE No.2###

## TRAFFIC SWITCH ON 101 SANTA MARIA RIVER BRIDGE BEGINS TOMORROW

**SAN LUIS OBISPO COUNTY** – Construction to widen the U.S. Hwy. 101 Santa Maria River Bridge will result in motorists on **southbound Hwy. 101** being temporarily detoured off Hwy. 101 at the southbound Hwy. 166 off-ramp before re-entering the southbound highway on-ramp on Wednesday night, Oct. 24 for only **three hours from 9 pm until midnight**.

This detour will allow for the realignment of the southbound lanes of Hwy. 101 onto the newly constructed center median structure which will be used by motorists for approximately six months. This realignment will allow for improvements to be made to the existing southbound lanes.

Cyclists should be aware of limited shoulder space on the bridge at all times during this phase of construction. The following detour is recommended. Cyclists traveling southbound can detour along Thompson Avenue to Highway 166 East to Bull Canyon Road to Donovan Road. Those traveling northbound can detour along Donovan Road to Bull Canyon Road to Highway 166 West to Thompson Avenue.

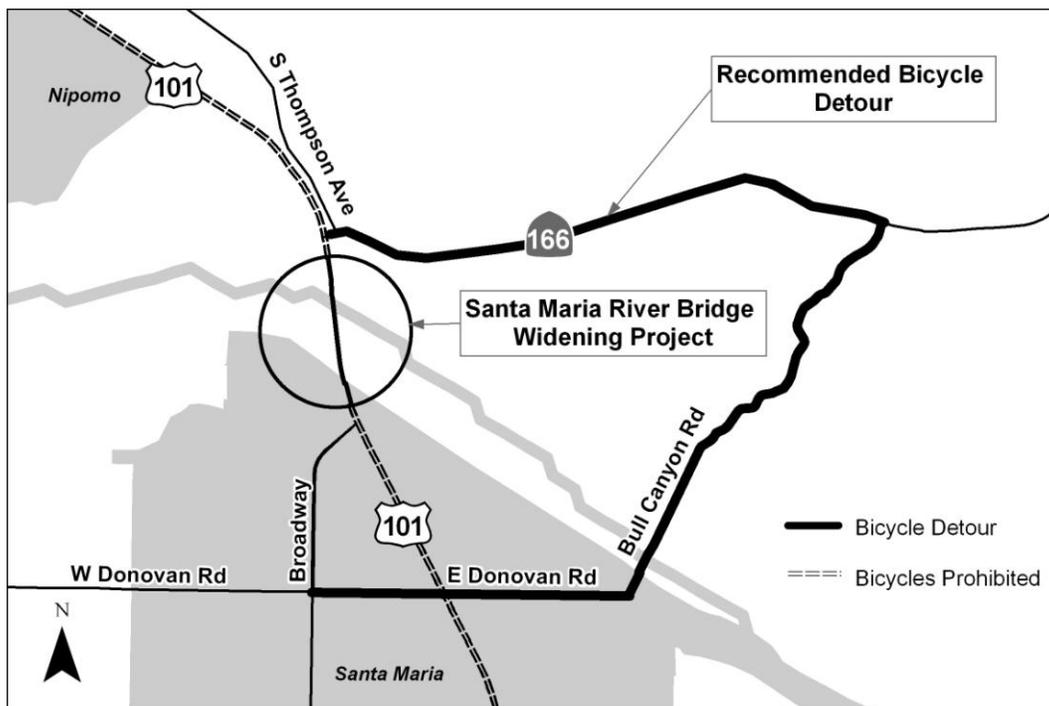

This project will widen the bridge from two to three lanes in each direction with inside/outside shoulders and will include a bicycle path near the southbound lanes behind a concrete barrier. In addition, all existing traffic lanes will be resurfaced.

The contractor for this \$31 million project is Flatiron West Inc. of San Marcos, CA. The project is about 65% complete. It is expected to be completed in early 2014.
