

# San Juan Rd Interchange Project

CALIFORNIA DEPARTMENT OF TRANSPORTATION

## FACT SHEET

### The Project

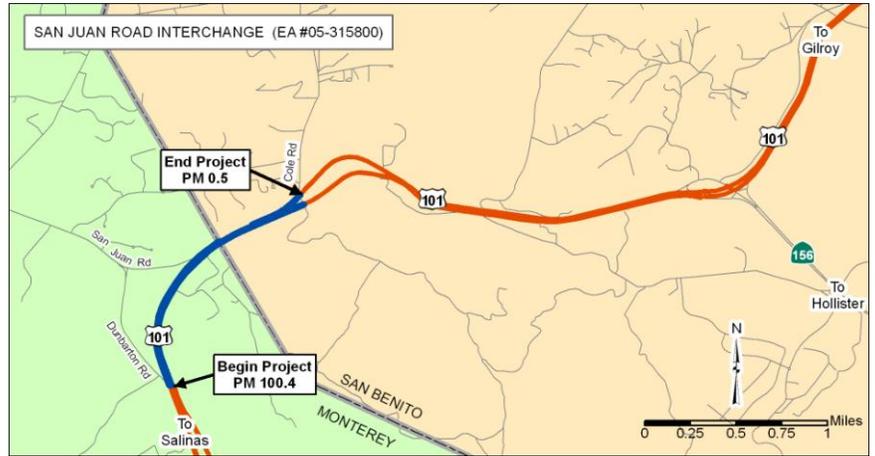

Located in northern Monterey County, this project proposes to remove three major at-grade intersections (San Juan Road, Dunbarton Road and Cole Road) and replace them with a single interchange at San Juan Road and Route 101. Additionally, this project will convert a portion of US 101 within the project limits from expressway to freeway.

### The Need

The US 101/San Juan Road area is a choke point for interregional travel of goods movement, commuters and visitors. For many years, Caltrans District 5 and the counties of Monterey and San Benito have recognized that the movement of goods and passenger vehicles is threatened by the safety and operational concerns in the vicinity of San Juan Road and US 101. The project purpose is to improve safety by reducing fatal and injury accidents and to reduce peak hour congestion by improving operations.

### The Benefits

- Enhancing the facilitation of goods movement
- Reducing delay
- Reducing the conflict between interregional traffic and slower moving trucks and agricultural traffic
- Improve interregional and local travel

### Project Costs

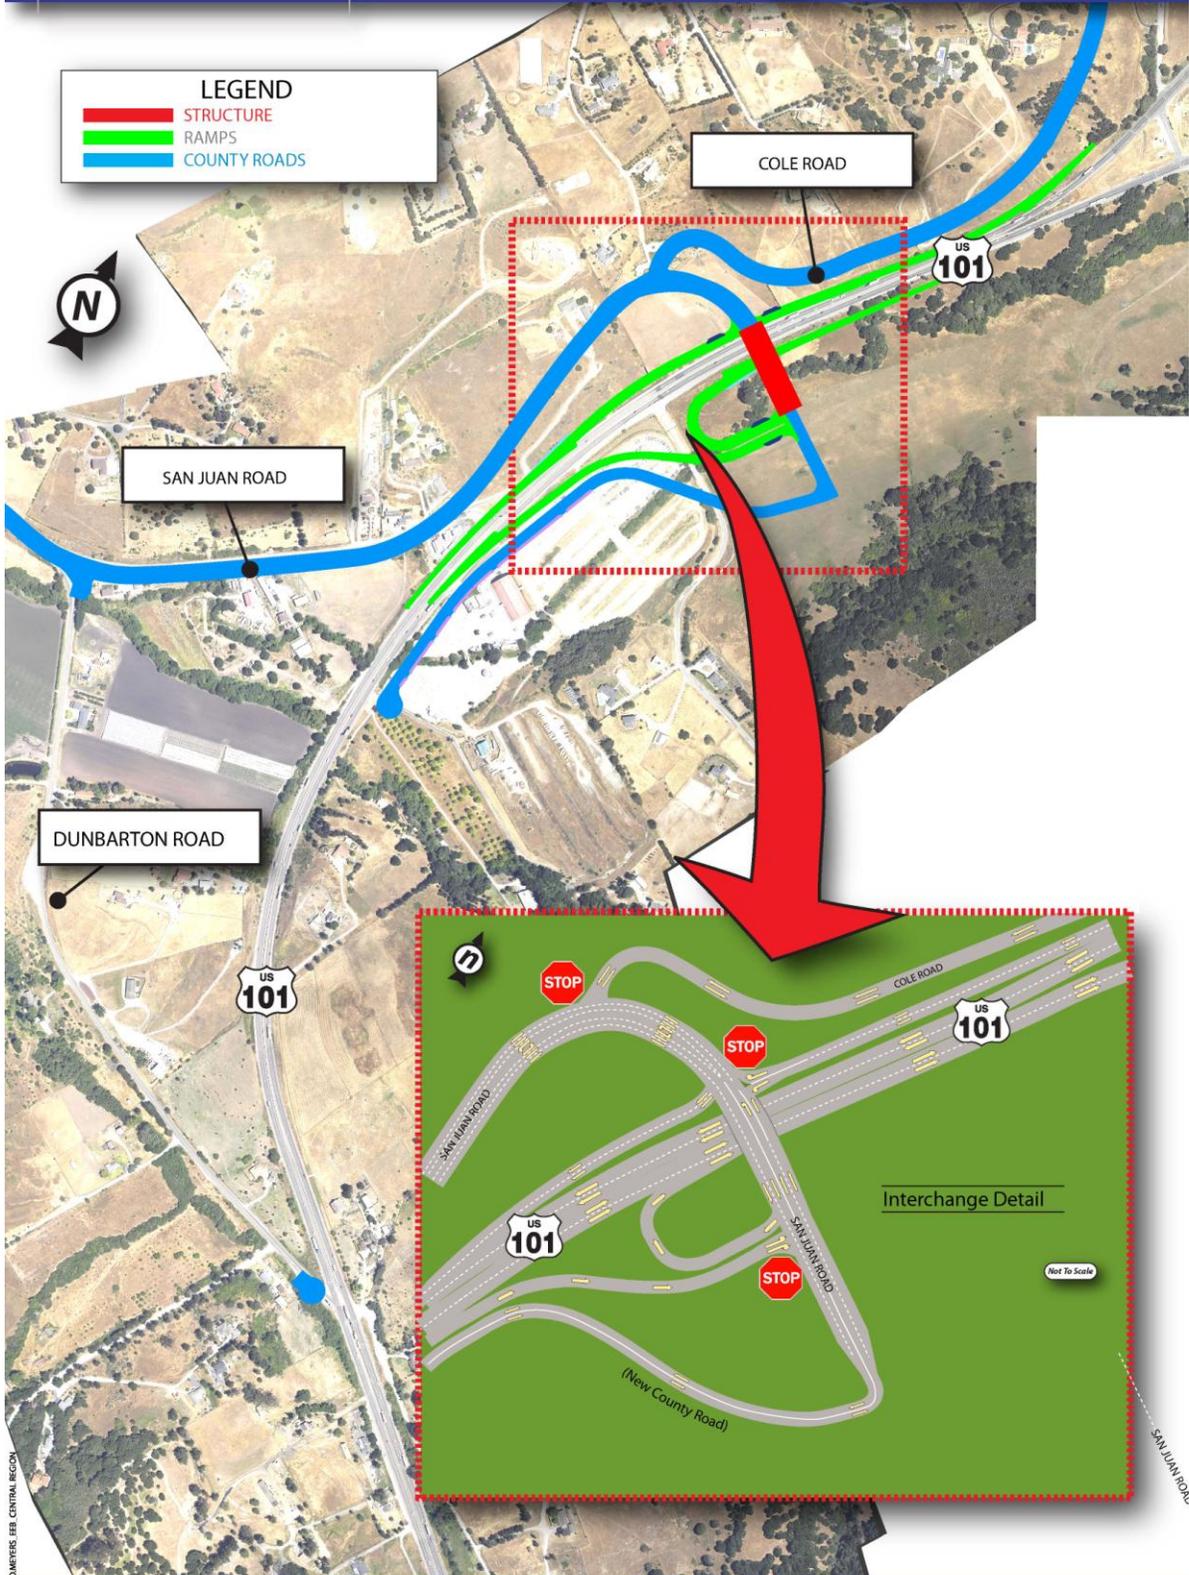

PA&ED Support	4,700
PS&E Support	5,000
R/W Support	2,000
Construction Support	5,800
Construction Capital	46,200
Right of Way Capital	26,900
(All figures x \$1000) Total	\$90,600

### Project Schedule

Approved Environmental Doc.	1/29/2010 Actual
Submit Project To HQ	8/15/2011
Right of Way Certification	4/2/2012
Project Ready For Bids	4/2/2012
Begin Construction	1/15/2012
End Construction	1/15/2014
