THE CALIFORNIA STATE HIGHWAY SYSTEM

CALTRANS DISTRICT 5

STATE OF CALIFORNIA
BUSINESS, TRANSPORTATION AND HOUSING AGENCY
DEPARTMENT OF TRANSPORTATION
DIVISION OF TRAFFIC OPERATIONS
1120 N Street
Sacramento, CA 95814

CORRECTION OF DATA:

The data contained in this publication are the result of efforts by many individuals in each district and Headquarters, and represents accurately the existing conditions of various State highways. There are instances, however, where data may not be current or may be incorrect in other respects. When the user of this publication becomes aware of any data which are not current or are incorrect, the user should contact the TASAS Highway Data Base Coordinator in the Traffic Department of the district concerned.

Prepared in Cooperation with the

U.S. DEPARTMENT OF TRANSPORTATION
Federal Highway Administration

Price $ 12.00

The CALIFORNIA STATE HIGHWAY LOG is a record of the State Highway System as it existed on December 31, of the year shown on the front leaf of this book. It is an inventory of all highway routes adopted, or established by legislation.

This book contains the data for one of the twelve districts of the State Highway System. The district, county and route number are printed near the top of each page, centered just above the data portion of the page. * (see footnote)

Route Suffix Code

In the California State Highway System, no two routes can be assigned the same route number. However, there are certain special route cases which are an integral part of an existing route, (though not a piece of mainline, per se). These are assigned to the same route number but with the addition of a route suffix code. These cases are:

- supplementary roadways.
- partially completed relocations.
- designated routes for future construction.
- state highway segments superseded by new alignment but not yet relinquished and having the same route number (and usually numerically the same postmile range) as other parallel and/or new segments.

The route suffix is used to separate these "special" highway cases from the regular routes in the state highway system.

The three route suffix codes are S, U, and Z.

S - Supplemental Route

The S suffix identifies spurs, supplemental truck lanes and bus lanes where all or part of the roadway is on separate alignment. It also identifies new construction where the alignment is entirely separated from the existing route and traffic on the existing cannot be routed over it until an adjacent project is built.

U - Unrelinquished Route

The U suffix identifies a road superseded by new construction, but not yet relinquished to the city or county and which continues to be maintained by the state.

Z - Budgeted or Unconstructed Route

This code identifies a route budgeted for future construction.

POSTMILE

The Post Mile is a numeric value based upon the mileage measured from the county line, or from the beginning of a route. The post mile when used in combination with the district, county, and route make each location of the state highway system unique.

The post mile values are developed by Headquarters, Office of Traffic, for the following purposes:

1. To identify major landmarks, i.e. bridges, structures, ramps and intersections.

2. To identify changes in the highway characteristics, or geometrics due to constructions or realignments.

3. To identify limits of route adoptions or relinquishments.

4. To identify the location of all traffic accidents on state highways.

5. To identify the city limits and county boundaries.

6. To use as reference for the recordation of contract plans and other documents.

PP: POST MILE PREFIX

New post mile values are assigned whenever a length of highway is changed due to construction or realignment. To differentiate the new values from the old, an alpha code is added prefixing the post mile for the new values.

PP CODES

C--Commercial lanes
D--Duplicate post mile at meandering county line
G--Reposting of duplicate post mile at the end of a route
H--Realignment of D mileage
L--Overlap post mile
M--Realignment of R mileage
N--Realignment of M mileage
R--First realignment
S--Spur
T--Temporary connection

PS: POST MILE SUFFIX

E--Equation

LENGTH

The mileage to the next highway point.

NA: NONADD MILEAGE

N--Mileage not accumulated in state totals.

COUNTY ODOMETER

This value is the summation of mileage from the preceeding county line to this point. This totaling continues until a different county line or the end of the route is encountered, at which time the count is zeroed.

CITY CODE

This highway point is not within the city limits when this column is blank. When it is within the city limits the abbreviated city code is shown.

RU: RURAL, URBAN or URBANIZED

The rural, urban and urbanized area limits are based upon population density as determined by the U.S. Census Bureau. The criteria are:

Rural - under 5,000 population
Urban - 5,000 to 50,000 population
Urbanized - over 50,000 population

Rural Codes	Urban Codes	Urbanized Codes	
(Inside City Limit)			
A	J	S	Entirely inside city limit.
B	K	T	1/2 inside, 1/2 outside, same city.
C	L	U	1/2 in one city, 1/2 in another city.
D	M	V	1/2 in one county, 1/2 in another co.
E	N	W	Independent alignment in another co.
(Outside City Limit)			
F	P	X	1/2 in one county, 1/2 in another co.
G	Q	Y	Entirely outside city limit.
H	R	Z	Independent alignment in another co.

FA: FEDERAL AID DESIGNATION

0--None of the following
2--In lieu of interstate
3--In lieu of primary

FC: FUNCTIONAL CLASSIFICATION COMPONENT

0--None of the following conditions
1--Principal Arterial - Connecting link to Principal Arterial
2--Principal Arterial - Connecting link of Minor Arterial
3--Principal Arterial - Nonconnecting Link
4--Minor Arterial
5--Major Collector - Includes all Urban Collectors
6--Minor Collector - Rural only
7--Local

FED RTE: FEDERAL AID ROUTE NUMBER AND PREFIX

PREFIX (First digit)

I--Interstate
P--Primary
5--FAS or FAU final alignment
6--FAS or FAU not final alignment

ROUTE NUMBER (Last 3 digits)

000 - Not a federal aid route
001 to 999 - Federal aid route number (same as state route number)

TF: TOLL OR FOREST HIGHWAY

0--None
1--Toll road and bridges
2--Forest highways

NL: NATIONAL LANDS

0--None
1--National monuments
2--National recreational areas
3--National forests
4--Military reservations
5--Indian reservations
6--Bureau of Land Management

SF: SCENIC FREEWAY

0--Nonscenic (nonfreeway, nonexpressway)
1--Scenic (nonfreeway, nonexpressway)
2--Nonscenic (freeway and expressway systems)
3--Scenic (freeway and expressway systems)

HG: HIGHWAY GROUP

R--Independent alignment - right
L--Independent alignment - left
D--Divided highway
U--Undivided
X--Unconstructed

AC: ACCESS CONTROL

C--Conventional highway (no access control)
E--Expressway (partial control)
F--Freeway (full control)
S--One-way city street (no control)

LEFT ROADBED INFORMATION

ST: SURFACE TYPE

B--Bridge
C--Concrete (less than 2" AC surface)
E--Unpaved earth
F--Undetermined (ferry mileage)
G--Bridge (unpaved, other than codes B or P)
H--AC base and surface (at least 7" thick)
M--AC base and surface (less than 7" thick)
O--Oiled earth gravel
P--Bridge (2" or more AC surface)

NO LN: NUMBER OF LANES

00 to 99

SF: SPECIAL FEATURES

A--One-lane road with occasional turnouts for passing
B--Lane transition
C--Passing or truck climbing lanes
D--Bus lane (for buses only, not in median)
E--Auxiliary lane (included in no ln field)
F--Auxiliary lanes (included in no ln field)
G--Tunnel
H--Toll plazas and approaches
J--"Bug" or border patrol stns.
K--Bottom deck of two-deck structure
L--Top deck of two-deck structure
M--Construction zone (open to traffic but not yet completed)
N--Median lane is HOV lane
P--Median lanes are HOV lanes
Q--Reversible peak hour lane(s)
Z--No special features

OT-SH: OUTSIDE SHOULDER

TO--Total shoulder width, 00 to 99 feet
TR--Treated shoulder width, 00 to 99 feet

T-W WID: TRAVELED WAY WIDTH

00 to 99 feet

IN-SH: INSIDE SHOULDER

TO--Total shoulder width, 00 to 99 feet
TR--Treated shoulder width, 00 to 99 feet

MEDIAN INFORMATION

TY: MEDIAN TYPES

UNDIVIDED ROADWAY

A--Not separated or striped
B--Single traffic stripe, one-way or two-way barrier stripe
C--Reversible peak hour lane(s)

DIVIDED ROADWAY

E--Reversible peak hour lane(s)
F--Two-way, left turn lane
G--Continuous left-turn lane
H--Paved median
J--Unpaved (dirt) median
K--Separate grades
L--Separate grades with retaining wall
M--Sawtooth (unpaved)
N--Sawtooth (paved)
P--Ditch (not to include normal median drainage)
Q--Separate structures
R--Railroad (includes rapid transit)
S--Bus lanes
T--Paved area occasionally used as traffic lane
U--Bus lane and/or railroad in median
V--Contains reversible peak hour lane(s)
Z--Others not listed above

CL: CURB AND LANDSCAPING

1--Curbed median
2--Curbed median with trees (may incude shrubs)
3--Curbed median with shrubs (no trees)
4--Raised traffic bars
5--Median with trees (may include shrubs)
6--Median with shrubs (no trees)
7--No curbs or shrubs in median, or no median

BA: BARRIERS

A--Cable barrier
B--Cable barrier with headlight glare screen
C--Metal beam barrier
D--Metal beam barrier with headlight glare screen
E--Concrete barrier
F--Concrete barrier with headlight glare screen
G--Bridge barrier
H--Chain link fence
J--Guardrail in median inside edge of shoulder, both roadways
K--Guardrail at inside edge of shoulder, left roadway
L--Guardrail at inside edge of shoulder, right roadway
N--Thrie beam barrier
P--Thrie beam barrier with headlight glare screen
X--External barriers on reversible peak hour ln(s)
Y--Others not listed above
Z--No barrier

(Independent Alignment)

Q--Concrete barrier on both roadways
R--Concrete barrier on left roadway
S--Concrete barrier on right roadway

WD: MEDIAN WIDTH

00 to 99 feet

VA: MEDIAN VARIANCE

The term median denotes the width between the inside edges of the left traveled way and right traveled way of a multi-lane divided highway. The median width includes the inside (or median) shoulders. In this log the same column heading also includes the separation between the two traveled ways of a two-lane separated highway.

Median variance is used during the transition of one median width to another. The valid codes are:

Z--No variance (the median is a constant width)
V--Variable median width (up to 99 feet)
P--Median width 100 feet or greater, with or without variance

RIGHT ROADBED INFORMATION

(Data fields and codes same as those defined for Left Roadbed)

ADT INFORMATION

LOOK BACK: Average daily traffic of the back leg.
PP: P-Profile point. S-Status point.
LOOK AHEAD: Average daily traffic of the ahead leg.

DATE OF RECORD: A 640101 (January 1, 1964) effective date is shown for all highways completed prior to 1964. Any realignment or new construction subsequent to 1964 is assigned the "open to traffic" date.

SIGNIFICANT CHANGE DATE: Constructions involving changes in the following fields of data are considered significant changes: access control, number of lanes, pavement width, median width, shoulder width.

ADDITIONAL ROADWAY DATA

(a) Summations of mileage and traffic volumes are given at profile point locations, city boundaries, the end of a county or a route The mileage is expressed to the nearest 0.001-mile, and the volumes expressed in DVM's (Daily Vehicle Miles). To obtain the annual vehicle miles of travel, multiply the DVM by 365.

(b) Refer to the Place Names publication for the city codes.

(c) Occasionally an english language description of some pertinent feature of the highway point will be listed on it's second line, just below where the city code is listed on the first line.

Any questions relating to the aforementioned data may be referred to the district TASAS HDB coordinator.
