

**SR-710 Tunnel Technical Study  
Exploration Program Notice  
THURSDAY, MARCH 5, 2009**

In June 2008, Caltrans and Metro began the SR-710 Tunnel Technical Study to examine the possibility of constructing a tunnel to close the gap between the northern SR-710 termini and the Foothill Freeway (I-210). This geotechnical study will involve research, exploration and technical analysis of the soil and sub-surface conditions found while tunneling at depths of more than 250 feet.

<b>What type of testing will be performed?</b>	Testing of local soils will be studied by taking an electronic image of soil conditions along a specific area. Information on rock layers and layering, near-surface faulting, sub-surface voids, and bedrock elevations or depths will be gathered.
<b>Where is the testing site located?</b>	The testing site is located on Via Del Rey, north of Camino Verde in the <u>City of South Pasadena</u> .
<b>*When will testing in this location begin and end?</b>	Work will begin and end on Thursday, March 5, 2009.
<b>*What time will testing crews be present?</b>	Crews will be on-site from 7 a.m. to 7 p.m.
<b>What can I expect during working hours?</b>	Intermittent minor vibrations, temporary parking restrictions in place for one day only and slight traffic delays.
<b>Will local access be permitted during the testing?</b>	Access to private property and driveways will be maintained at all times. No traffic detours are planned. Please follow all applicable traffic and safety laws.
<b>Where can I call to get more information?</b>	Call 1-877-710-4111 or visit <a href="http://www.710tunnelstudy.info">http://www.710tunnelstudy.info</a>

**\*Schedule is subject to change.**

**Please use extreme caution while walking, bicycling or driving near the testing area and obey all traffic signs.**

***Thank you for your patience and cooperation!***
