This project involves replacing the existing metal beam and temporary barriers with decorative concrete barriers that reflect the stonework architecture seen throughout the surrounding communities. Historic reproduction lighting will also be installed.

Project benefits include improved safety for motorists, reduced maintenance costs, improved appearance of the historic highway, and protection for Caltrans maintenance workers

The \$17-million project is expected to be completed in fall 2011. The contractor is Cooper/Myers. Project and closure updates will be announced as they occur.
