INFORMATIONAL NOTICE SAN BERNARDINO FREEWAY (I-10) RESTORATION PROJECT

The California Department of Transportation (Caltrans) is currently restoring San Bernardino Freeway (I-10) lanes and ramps between I-5 and I-605.

As part of this project, Caltrans will be performing concrete barrier installation work along eastbound I-10 adjacent to Flair Drive *between* Aerojet Avenue and Eaton Wash in the City of El Monte. Flair Drive will be *temporarily* restriped to accommodate construction work *and* will remain open to traffic in both directions. Once barrier installation work is completed, the street will be restriped to its original configuration.

Beginning September 19 2011, parking will be prohibited on *the north side* of Flair Drive between Aerojet Avenue and Eaton Wash and on *the south side* of Flair Drive between Rio Hondo Avenue and Eaton Wash. Temporary no parking signs will be posted.

Along with concrete barrier installation work, landscaping will also take place. These improvements along Flair Drive, which are anticipated to be completed *by* January of 2012, will provide an aesthetically pleasing freeway for local residents and businesses.

Work will be performed *during the day and night time*. Noise and dust are anticipated during construction *and the contractor and Caltrans will minimize and mitigate the noise and dust*. Caltrans apologizes for this *temporary* inconvenience as we work to improve the I-10.

Once completed, the I-10 restoration project will provide *for* a smoother driving surface, *will* extend the life of the freeway and reduce future maintenance. *The entire* project is estimated to *be completed by the* summer of 2012.

For additional information, please contact Yessica Jovel at (213) 897-1876, or via e-mail at yessica.jovel@dot.ca.gov
