State Route 99
Manteca 6-Lane Widening
Project Information Update

Issue 1 October 16, 2012

Improving mobility on State Route 99

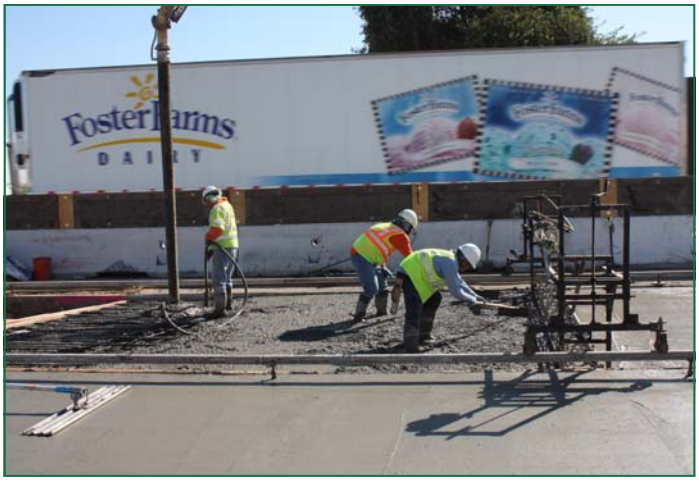
Caltrans is reminding drivers in Manteca to take caution in construction zones as crews work to widen an 11-mile stretch of State Route 99 (SR-99) from four to six lanes from Austin Road to Arch Road.

Phase I of the project, which began in May, widens the mainline highway in the median, and constructs new median barriers and sound walls between Cottage Avenue and Lathrop Road.

Phase II, scheduled to begin in mid-October, will replace the French Camp Road Interchange, improving sight distance for drivers.

"When the project is complete motorists will have a smoother road with less congestion," said District 10 Director Carrie Bowen. "We appreciate everyone's patience while we work. Remember that crews are working on or near the road – so please Slow for the Cone Zone."

The speed limit along this stretch of highway has been lowered to 55 mph.



A construction crew pours concrete feet away from busy State Route 99 traffic—Please remember to Slow For The Cone Zone.

Phase III of the project, scheduled for construction in Spring 2013, will remove the partial interchanges at both Main Street and Lathrop Road and combine them into one full-service interchange at Lathrop Road. Crews will also construct an auxiliary lane and retaining walls, and a sound wall between Lathrop and French Camp.

Phase IV, which will provide landscaping, is scheduled for 2015 when Phases I through III are complete.

Motorists can expect delays as crews move k-rail, place falsework and perform other construction related activities. Lane and ramp closures are scheduled during off-peak traffic times. Signed detours will accompany any full ramp closures. Crews will also be doing periodic night work.

"Our goal is to keep traffic moving as smoothly as possible," said Project Manager Joy Pinne.

The $250 million project is funded through $133 million in bonds, plus $112.5 million in Measure K and $4.5 million in Regional Improvement Program funds.

"We strive to be good stewards of taxpayer money by meeting the need and purpose of the project without overspending," said Pinne.
