

# PROJECT FACT SHEET

Chinese Camp Capital Preventative Maintenance (CAPM) Project  
State Route 120 (SR-120): Lancaster Road to Moccasin Creek Bridge (31 miles)  
SR-108: SR-108/120 Junction to Montezuma Road (3 miles)

## LOCATION MAP:

## PROJECT DESCRIPTION:

This project will apply a 2-inch thick layer of Rubberized Hot Mix Asphalt (RHMA) concrete to existing lanes, shoulders, and pull-outs on 34 miles of highways in Stanislaus and Tuolumne counties. Scheduled to start in spring 2017 and be completed in late 2018, this project is intended to extend the service life of the pavement by five to seven years.

Heavily distressed pavement locations on travelled lanes will be repaired by grinding and applying Hot Mix Asphalt prior to the RHMA overlay. Dikes (used to channel water from the roadway to a drain), as well as metal-beam guard railing and end treatments will be upgraded to current standards. Drainage grates will be upgraded with bicycle friendly grates, as needed, and several culverts will be replaced.

The project will improve SR-120 from Lancaster Road in Stanislaus County to the Moccasin Creek Bridge in Tuolumne County, a distance of 31 miles. It also will improve SR-108 in Tuolumne County, from the SR-108/120 junction to Montezuma Road (three miles). It includes striping, and the existing center-line and shoulder rumble strips will be replaced. Faded and damaged signs will be replaced.

**PURPOSE AND NEED:**

The purpose is to preserve and extend the life of the existing pavement, and improve ride for this section of road which is characterized as having major pavement distress and a bad ride.

**FUNDING SOURCE:**

The total project cost is estimated at \$35.4 million and it is programmed in the 2014 State Highway Operation and Protection Program.

**SCHEDULE:**

Ready to List	Fall 2016
Advertise	Early 2017
Bid opening	Early 2017
Approved Construction Contract	Spring 2017
Start of Project	Spring 2017
Project Completion	Late 2018

**PROJECT STATUS:**

The project is just beginning the design phase.
