

CROSTOWN BIG FIX

Weekend closures will save 50 working construction days and reduce lane closures from 140 to only 15 days

The California Department of Transportation (Caltrans) announces a public education campaign, called The Crosstown “Big Fix,” a collection of major rehabilitation work taking place on the State Route 4 (SR-4) Crosstown Freeway in Stockton, between Interstate 5 (I-5) and SR-99. Work is scheduled between April 2016 and December 2016. A total of four major projects will take place on the Crosstown Freeway during this timeframe.

- **SR-4 Bridge Deck Treatment**
- **SR-4 Automated Warning System Installation**
- **SR-4 Crosstown Viaduct Bridge Repair**
- **Extreme Maintenance**

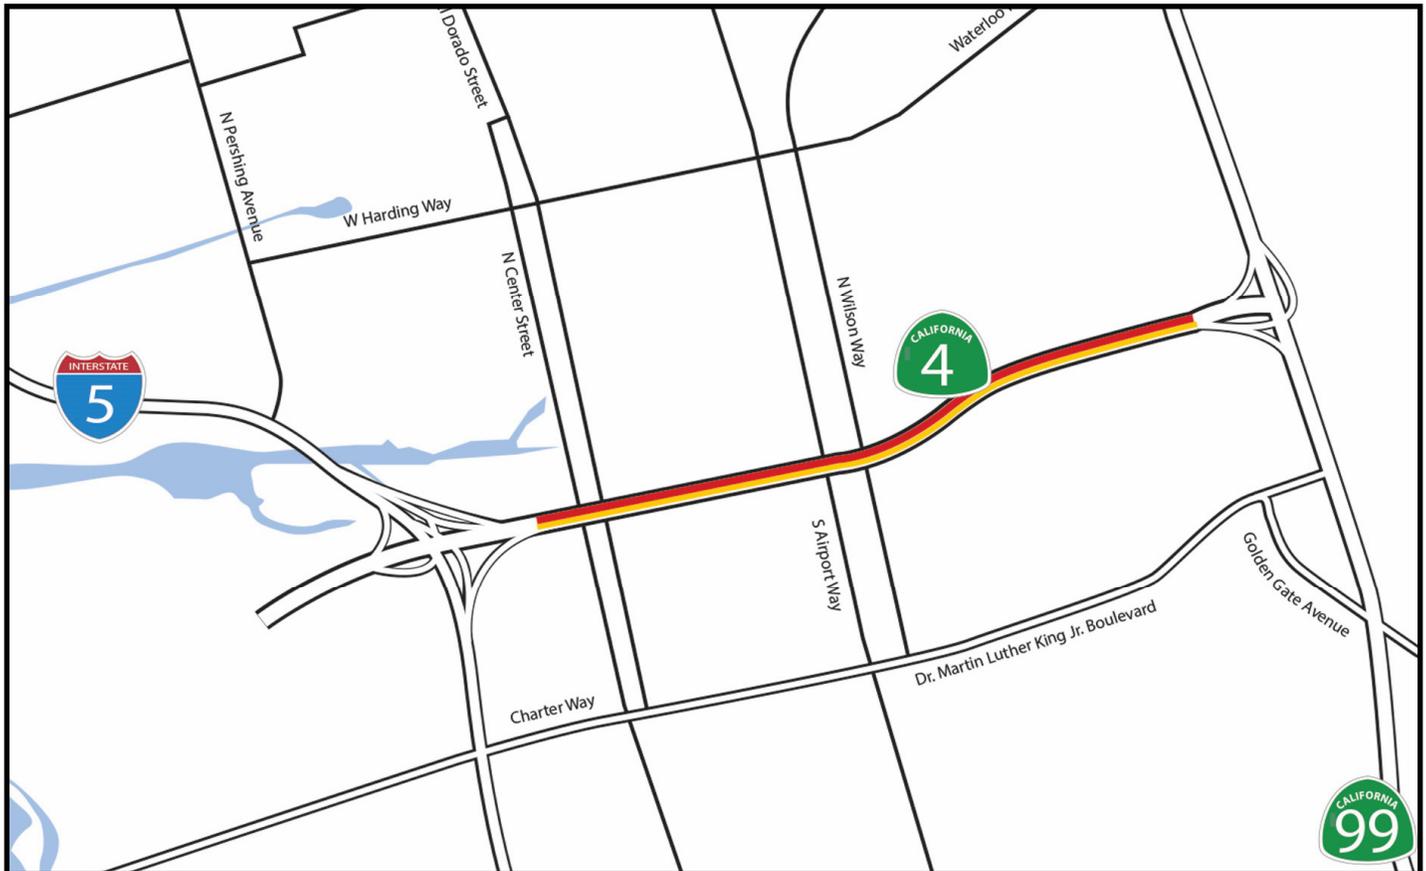

The projects will enhance future safety and traffic operations by renovating the bridges on the Crosstown Freeway. Work includes replacing worn hinge bearing pads, installing new joint seals and sealing the bridge decks. Automated warning systems will be installed which include Closed Circuit TV's and Electronic Changeable Message Signs to warn drivers of upcoming hazards. Our maintenance crew will also perform several maintenance functions such as graffiti removal, debris and litter abatement, and landscaping.

The majority of the work will take place at night, however, eight 55-Hour weekend closures will be required between April 29 – October 24, 2016. (See attached for dates) One direction per weekend of the Crosstown Freeway will be closed at a time for rehabilitation. By performing weekend closures, it will save 50 working days of construction and reduce lanes closures from 140 to only 15 days. I-5 & SR-99 traffic will be redirected to detours and alternate routes at SR-120 and SR-12. Motorists coming to and through Stockton are encouraged to carpool and take alternate modes of transportation such as walking, biking, or bus when traveling on weekend closure days. Downtown Stockton businesses will be open and we encourage you to visit.

This work is scheduled to begin as listed, but is subject to change due to traffic incidents, weather, availability of equipment and/or materials, and construction related issues. For additional information, please visit the Crosstown Big Fix Project's web pages at <http://www.dot.ca.gov/dist10>, or contact the District 10 Public Information Office at (209) 942-6062.
