

THE CITY OF SAN DIEGO

January 22, 2002

Mr. Homayoon Gerami
Caltrans
District 11
P.O. Box 85406, MS 35
San Diego, CA 92186-5406

Dear Mr. Gerami:

Subject: Will Serve Letter: 11-SD-15, R10.3/12.1, 11-223-064901

This letter is to confirm water availability for the above referenced subject project. Its location is within the City of San Diego water service area. This location will have potable water facilities for this project's use (3400 gallons per day) in the existing fronting City streets, at existing fire hydrants. The existing water facilities that serve this area are complete.

The City of San Diego will be able to provide adequate potable water through the existing potable water facilities for this construction project at this time. On April 21, 1991 the San Diego City Council instituted a 20 percent water conservation goal. This goal remains in effect today, since San Diego imports 90 percent of its water. San Diego's water customers are encouraged to use water efficiently and not to waste it or use it unreasonably.

Water service connections are available. These connections are requested per required demand. All services are governed by City ordinances and regulations concerning connections, construction, capacity charges, permit fees and matters pertaining thereto.

If further information is required, please contact me at (619) 533-5146.

Sincerely,

Rudy Benitez, Jr.
Assistant Engineer-Civil

cc: Mark Stone, Deputy Director, Water Department
Bob Didion, Assistant Deputy Director, Development Services Department
Shahin Moshref, Senior Civil Engineer, Development Services Department
Hooman Partow, Associate Engineer-Civil, Development Services Department
