

I-5 Thomes Creek Bridge

CALIFORNIA DEPARTMENT OF TRANSPORTATION

TEHAMA - INTERSTATE 5 BRIDGE REPLACEMENT

FACT SHEET- FEBRUARY 2010

The Project

Replace the Thomes Creek Bridge in Interstate 5, located approx 3.5 miles north of Corning.

The Need

The Thomes Creek drainage channel is a source for aggregate and has been heavily mined over the years. As a result the channel continues to degrade and is now to a point that existing supports for the bridge could possibly be undermined during heavy rainfall caused by scour activity at the bridge. This project will provide a new structure with deep foundations that will address any scour activity for years to come.

Jobs/Benefits

Shasta Constructors, a local Redding contractor was awarded this project and will likely provide for 200-250 people over the duration of the project.

Project Status

This project was awarded May 2008 and is currently under construction.

Project Costs

The contract was awarded at \$26 million SHOPP

Project Schedule

Currently under construction:
Project Completion: 2011
