

U.S. 101 San Mateo County Ramp Metering Project State Route 92 to SM/SF County Line

The Project

Caltrans and its project partners City County Association of Governments of San Mateo County (C/CAG), and Metropolitan Transportation Commission (MTC) are working together on improving operations on U.S. Route 101 in San Mateo County. The improvements include the installation and activation of ramp meters at various locations.

Benefits

Ramp metering is a traffic management strategy using traffic signals and accompanying equipment and techniques to improve flow on the freeway system by managing the on-ramps. Caltrans expects the ramp metering system to improve safety and travel times during the peak periods of heavy traffic along the corridor.

What to Expect

Ramp metering will begin in the Northbound direction of U.S. Route 101 in San Mateo County at 18 locations from State Route 92 in San Mateo to the San Mateo/San Francisco County line.

November 4, 2014, ramp meters will be activated, but meters will rest in green. November 12, 2014, ramp meters will start cycling (or metering) during Northbound PM peak time from 3:00pm to 8:00pm. November 18, 2014, ramp meters will start cycling during Northbound AM peak time from 6:00am to 10:00am.

Most ramps will operate at “1 car per green” except for two connector ramps which will operate at “2 cars per green”. These connector on-ramps include the Westbound State Route 92 to Northbound U.S. Route 101 connector, and the Eastbound I-380 to Northbound U.S. 101 connector.
