Update

San Rafael – Caltrans announced today the lane reduction on the westbound 580 to northbound 101 connector ramp, originally scheduled to take place the morning of April 13, has been postponed until Wednesday, April 14, due to inclement weather.

Traffic on the westbound 580/northbound 101 ramp will be reduced to one lane, and shifted onto the southbound 101/eastbound 580 ramp. The shift will enable construction crews to demolish the existing ramp and build a new one.

Traffic on the southbound 101 to eastbound 580 connector ramp was reduced to one lane this past Wednesday morning.

More information about this project is available on our web page:
