FOR IMMEDIATE RELEASE

Speed Limit Changed to 55 for I-680 Express Lane Construction Zone

ALAMEDA COUNTY – Caltrans announced today that the speed limit has been reduced to 55 miles per hour for the I-680 Express Lane project construction zone, due to the narrow 11-ft. lane width. The 55 MPH Zone is in effect for southbound I-680, from just north of the State Route 84 in Sunol to Calaveras Blvd. in Milpitas.

Traffic signs were installed yesterday from the SR 84 / I-680 Interchange to South Mission Blvd. Additional signage will also be installed for southbound I-680 between South Mission Blvd. and Calaveras Blvd.

The reduced speed is necessary both for the safety of construction workers and motorists traveling through the construction zone. Caltrans would like to remind the public that traffic fines are doubled in a construction zone. Please remember to Slow for the Cone Zone.
