1. Please list three specific goals that your firm would like to gain from participating in the program?
 - a. SKS is in the process of relocating our primary focus area from South Florida to the SF Bay Area. Our first goal would be to establish relationships with large Construction Management (CM) firms to become their "go to" company not only for DBE % fulfillment, but for our quality of service in the area of CM environmental compliance.
 - b. Although Construction Management is our main focus, SKS can also provide professional arborist services, and would like to perform tree permitting / survey services for Caltrans IV, as we have completed over 50 such surveys for Florida DOT District IV (coincidence!) to date.
 - c. As the owner of a Woman-Owned firm in business for 16 years, I fully understand the value of a "big brother" relationship with firms having long-standing relationship with local governmental clients, i.e., Caltrans.
2. Please list three items that your firm brings to the relationship?
 - a. The Principal of SKS, Teri Beckett, has 23 years of professional experience in construction management of

projects performed in environmentally sensitive areas.
 SKS' Mission Statement: "To Make Permit Conditions Constructable."

- b. SKS Performed Resident Engineer services (CM in charge) for FDOT VI's largest mitigation project to date, a 7.1 million dollar wetland restoration area in an extremely protected area in the Everglades Crocodile Refuge. Environmental Agency representatives holding permits on the project were very pleased with the result, and are on SKS' client list for references.
- c. SKS' Principal, a Civil Engineer registered in CA and FL, as well as a nationally certified arborist and a General Contractor in Florida, has years of experience on the contractor side as well. As such, our recommendations re: permit compliance issues take into account the contractor's point of view, and can make even the most strict requirements constructable. Also, as an Environmental Project Manager at the shipping port in Fort Lauderdale for 8 years, Ms. Beckett also has extensive experience in the construction of large coastal facilities, and is currently in charge of CM environmental compliance of the construction of the Jewfish Creek Bridge to the Florida Keys, soon to be completed.
