

DEVIL'S SLIDE TUNNELS & BRIDGES

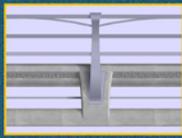

THE TWO BRIDGE STRUCTURES TRAVERSE A SMALL VALLEY INSCRIBED BY THE ROLLING TREE COVERED TERRAIN OF SAN PEDRO MOUNTAIN.

THE NATURAL BEAUTY OF THE SITE IS AT ONCE ENHANCED BY THE GRAZING OF HORSES INHABITING THE PASTURES OF THE VALLEY BELOW; AND OF THE SIGHT OF BIRDS SOARING IN THE SKY ABOVE.

THE DEEPLY HAUNCHED SHAPE OF THE BRIDGE SUPER-STRUCTURE IS INSPIRED BY, AND IS REFLECTIVE OF THESE BEAUTIFUL AND NATURAL ASPECTS OF THE PROJECT SITE.

THE UNIQUE CURVES, CHARACTERISTIC TO THE CALIFORNIA BROWN PELICAN PROVIDE A SPECIAL INSPIRATION FOR THE BRIDGE RAIL POST.
