

CONSTRUCTION NOTICE

Fruitvale Avenue Overhead Rehabilitation Project

September 17, 2009

OAKLAND—Demolition for the barrier for southbound Interstate 880 is ongoing for the Fruitvale Avenue Overhead Rehabilitation Project.

The demolition is a noisy operation and is expected to take place near your residence for several days, beginning Friday night and continuing through Saturday night. Construction crews will be working at night and will require jack hammering to demolish portions of the old bridge structure.

After the demolition is complete for southbound 880, work will begin for northbound 880.

Motorists, pedestrians, and bicyclists are advised to use caution when traveling through the construction area. We truly appreciate your understanding and patience during the construction and will diligently work to minimize traffic delays and inconvenience.

Questions may be directed to (510) 286-6445.
