Caltrans Schedules Tree Removal on Southbound U.S. 101

Novato - Caltrans has begun removing trees west of Southbound U.S.101 in Marin County, between the Birkenstock Factory and the Redwood Landfill bridge. The removal will clear the way for a frontage road and bike path that will be constructed as part of the \$23 million Marin Sonoma Narrows project from Novato to just north of San Antonio Road. Construction is scheduled to begin in April. The tree removal may require a few late night lane closures, which will be announced in advance. The area will be re-landscaped upon completion of the roadwork.
