FOR IMMEDIATE RELEASE

Eastbound I-580 Portola Avenue Off-Ramp to Close Permanently on March 14

Livermore – As part of the construction activities for the Interstate 580/State Route 84 Interchange project at Isabel Avenue in Livermore, Caltrans is working to complete the new overcrossing at Portola Avenue and is now ready to connect Portola Avenue south of I-580 with the new structure.

On Monday, March 14, 2011 Caltrans will close the eastbound I-580 Portola Avenue off-ramp. The off-ramp will be closed to accommodate the construction of Portola Ave on the south side of I-580. When the Portola Ave realignment is completed, traffic will be able to go across the newly constructed bridge over I-580 and continue to Isabel Ave. **The closure of the eastbound I-580 Portola Avenue off-ramp is permanent. The ramp will not reopen when the project is complete.**

The current eastbound I-580 Portola Avenue off-ramp will ultimately be replaced by the new eastbound I-580 Isabel Avenue Interchange off-ramp. Eastbound I-580 traffic can use the Airway Boulevard and North Livermore Avenue Interchanges for local City access while the new Isabel Interchange is under construction.

The Department of Transportation thanks you for your patience as we build these improvements. Please remember to Slow for the Cone Zone.
