FOR IMMEDIATE RELEASE

## Expansion Joint Replacement Project on Bay Bridge West Span

**San Francisco** – The California Department of Transportation (Caltrans) is replacing six expansion joints on the upper deck of the west span of the San Francisco-Oakland Bay Bridge. During the project, steel plates will be placed at various locations on the decks in order to accommodate the work. The steel plates are tapered on both ends in order to make for a less jarring transition.

Changeable message signs have been activated to alert drivers of the project. The project is expected to last until the end of December. Drivers are advised to expect some delays and to allow for additional travel time.
