

Updated February 2015

Fact Sheet – NAPA 29 Channelization

In Napa County In and Near St. Helena from Mee Lane to Charter Oak Avenue

Location Map

Project Schedule

Complete Env. Clearance: June 29, 2007

Construction: Spring 2015 to Early 2017

Project Description:

The purpose of the project is to rehabilitate the pavement, widen the shoulders to standard, construct a two-way left turn lane, and improve bicycle/highway/railroad crossing at Whitehall Lane.

Purpose and Need:

The project addresses operational and congestion conditions on State Route (SR) 29. This segment of SR 29 is heavily traveled by both locals and visitors and is congested on both weekends and weekday peak hours which result in lengthy delays. The existing roadway will be rehabilitated.

Right of Way:

Many parcels are required for this project. The majority of the parcels are temporary construction easements from commercial or vineyard properties as well as from the Napa Valley Wine Train.

Existing aerial utilities (PG&E, AT&T and Comcast) are being undergrounded along the existing State Right of Way in an advance project led by the County of Napa and the City of St. Helena.
