**FOR IMMEDIATE RELEASE**

## **CALTRANS COMPLETES REPLACEMENT OF CHANNELIZERS**

**SOLANO** – The California Department of Transportation (Caltrans) announced today that it has completed replacement of damaged channelizer posts on State Route 12 one day ahead of schedule.

Replacement of the channelizer posts was originally scheduled to start on Monday and end on Friday, November 7. But bad weather earlier in the week disrupted the schedule.

Approximately 400 damaged channelizer posts were replaced by Caltrans in a stretch of the roadway between Denverton Road, near Suisun City and Drouin Road in Rio Vista.

In addition to replacing the damaged channelizer posts, Caltrans crews also conducted vital maintenance work on this rural route that has become a major transportation corridor.

Another round of channelizer replacements on SR-12 is scheduled by Caltrans for January 5, 2009, weather dependent.
