

June 23, 2006 Update
U.S. 101 Widening Project, Santa Rosa

Closures

- The Steel Lane undercrossing will continue to be closed from 9pm-6am weeknights June 26 through the morning of June 29. On and offramps will remain open with left-hand turns prohibited. Crews are continuing to demolish the bridge at Steele Lane.
- There will be various lane closures along the roadway and ramps overnight as crews continue to place concrete barriers, clear medians, and prepare for grading.

Construction

- While the Prince Memorial Greenway was scheduled to close by June 23, the contractor has not yet had to do so yet. Crews will begin work on the temporary construction trestle in the area of Santa Rosa Creek early the week of June 26.
- Crews will be driving piles in mid-July. This will be loud work that may affect surrounding residents and businesses. There will be noise as a result of this week's work.

Other issues

- Crews are making efforts to keep dust at a minimum as they do work at the median and structures.
- Caltrans, contractors, and other partners continue to address signage concerns in light of the Downtown offramp closure.
