Please print.

my concern is for the Drainage of runoff rainwater on my street.

Currently the water drains by means of a ditch at the end of the street which connects at its end to Cal Trans drainage. AT Times ditches Fill in (on both sides of the fence.) and need to be redug periodically. The ditch on the Cal Trans side must be lower than our street or the ditches backup and also freeway runoff comes across properties and under houses.

Is there a more Permanent Solution than redigging ditches every year? Will drainage be adressed at all?

A

PLEASE PLACE THIS IN THE COMMENT BOX TONIGHT OR MAIL TO:

Response #4 – Comment Sheet
Cheryl Cook

Comment Number	Response
4-A	There will be a drainage system installed on Caltrans' right of way adjacent to the soundwall to replace the existing ditch. This system will include an inlet to allow water presently draining from Poplar Street to enter the system, thus maintaining the existing drainage pattern.
