## Russian River Bridge Update

- Foundation Constructors, Inc (FCI) finished welding the top 80-foot pipe piles at abutment 1. They started splicing the top 95-foot pipe pile at bent 2. FCI also installed steel cages at bent 6.
- C.C. Myers continued preparing bents 9 and 10 for the isolation casings. They also finished pouring concrete for four columns at bents 7 and 8.
