

Russian River Bridge Update
July 6, 2006

- Foundation Constructors, Inc. (FCI) continued pile driving for the retaining wall at the south side of abutment 11. FCI also placed steel caging for the two cast-in-shell piles at bent 3 for the scheduled concrete pour tomorrow.
- Fontana Steel continued with placing steel stirrup and rebar for the bent cap at bent 10, and steel rebar cage for the two cast-in-shell piles at bent 5.
